SOUND OFF

729-4006

Sound Off 729-4006 is your personal forum and squawk box. We broadcast your comments on most any subject. To sound your voice, please call 729-4006 after 5 p.m. on weekdays and anytime over the weekend. Or leave a message at our new website at www.micommnews.com. A word to the wise: you must not speak ill of your fellow citizens. Be brief. Be interesting. Otherwise we may edit you.

And please, lay off Westland Councilman David Cox. Enough is enough.

Thanks to school worker who dumped school supplies

I'm calling to say thank you to the employee at this Romulus elementary school.

On Sept. 3, they were observed throwing into dumpsters behind the school the following items: computer paper, unlined writing paper, art paper, lined writing paper, construction paper, large brand new bottles of Elmer's glue, chalkboards and chalk, all in new or very good condition.

The children in my family and neighborhood enjoy these items immensely. They have spent hours drawing, gluing, writing and coloring.

They love the chalk and chalkboards.

I have just one request, however: please donate it to daycare centers and preschoolers from now on.

Is our district so wealthy that we can throw these things away? Is this a common practice?

Has this happened before and gone unnoticed at any of our other schools? I probably will never know. Nobody at the board office would admit it to me, but I hope that they will never be this wasteful again. It's not a good example to be setting.

Are you covering up the city hall death of Wayne man?

This is a concerned citizen in Wayne. I am so upset that you didn't put anything in the paper about that man dying in Wayne. Is this a cover up or what?

I'm tired of people not putting stuff in the paper about things happening in Wayne. It's about time that you did. [Your Sound Off calls are always welcome to fill perceived gaps - Ed.]

Good-bye. It's a cover-up.

Caller suspects self-interest drives candidate's run

Why has no one brought up this campaign issue when it is so obvious? Westland City Council candidate David James's one issue in his campaign is to increase property values. This makes sense considering he is the owner of a real estate company.

Teachers picket

Romulus school teachers -- including Maryann Tyrchniewicz -- began the 1999-2000 school year by picketing at Romulus High prior to opening their first classes last week. They later picketed also Monday night outside the Romulus School District Board meeting. Earlier the teachers' union voted to take a "neutral" stance on the Sept. 27 referendum. Pumpkinfest to open

By AL POST
MCN Staff Writer

While the city's first Parade of Lights will kick-off the 1999 Romulus Pumpkin Festival tomorrow night at 9 o'clock, the festival itself won't officially begin until Saturday morning in downtown Romulus.

The growing sprawl of crafters, juvenile games and free

Parade of Lights and 40 crafter and other style booths will be in operation on Goddard Road, between Shook and Olive streets.

A wide assortment of musical tastes will be offered Saturday and Sunday.

The Romulus Police K-9 Corps also will put on a demonstration.

family style musical entertainment will begin about 10 a.m. on Saturday on Goddard Road.

While the symbol of the festival remains the pumpkin, autumn season pleasures of all types will be stressed.

Billy McCraight, festival spokesman, told TV viewers last week that about 25 entries have been signed up for the Parade of Lights.

Despite Columbine: God still is in control today: massacre victims claim

By AL POST
MCN Staff Writer

For some the tragic memories of the Columbine High School massacre will never end.

The resounding pain is etched forever in the faces of at least two victims' mothers and even more vividly in the flesh of one surviving victim, Mark Taylor.

Sixteen-year-old Taylor, his mother, Donna; as well as Michael and Vonda Shoels, the parents of Isaiah Shoels brought the tragic event to the heart of the Romulus-Taylor

area this past weekend.

They first held a press conference at the Double Tree Hotel in Romulus and the following day took part in an emotional "Stop the Violence" service at the Greater Grace Temple in Taylor.

Despite the despair caused by the multiple shooting at the upbeat Colorado high school, all felt that God is using the tragedy for good.

In fact, young Taylor said the Christian comments "Yes, I believe in God" reported by two slain girl students in the Columbine library room have

helped to create a new outbreak of religious fervor among youth in that Colorado area.

Michael Shoels complained that he felt that many in Littleton, Colorado and around the U.S. are still in "denial" of the hate that is so prevalent in society today.

Shoels, whose son was the only African American killed that day, said his home was vandalized four times by hatemongers, who oppose those in the community with darker skins.

He found it unnatural that his son was forced to remove athletic shoes because they bore "gang colors," while the accused shooters were permitted to sport long coats and flaunt Nazi emblems on their person prior to the massive shooting.

The Nazi emblems were even erected again within the school when it reopened last month, Taylor said.

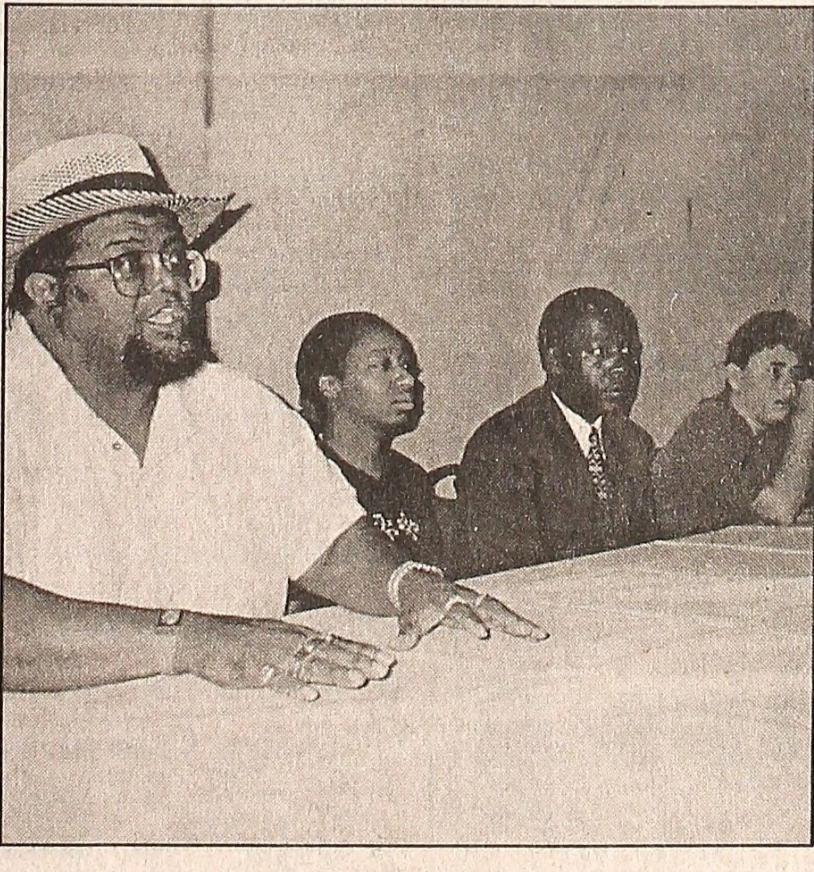

Because of that evidence of "denial," the Shoels and Taylors are traveling about the country in an effort to end the needless string of youth violence.

They have already spoken in New York, Los Angeles, Cal., Dayton, Ohio; Atlanta, Ga. and Amarillo, Tex.

Both Taylor and Shoels said that security was limited at the school. Taylor said it appears more than 105 bombs were carried into the suburban school unchallenged, two nights before the shootings during a prom night festivity.

Luckily the two youth accused of the mass killings were themselves slain prior to the using of those bombs.

Published reports said the slain killers had hoped to kill up to at least 500 students that day in honor of the birthday of their hero, Adolf Hitler.

Michael Shoels, father of the only slain African-American student killed at Columbine High School, declares parents have to take back roles in homes and schools across the U.S. Joining him at Romulus press conference are his wife, Vonda; Pastor Gary Harper and surviving Columbine victim, Mark Taylor. Pressure builds for more info on '99 voter issues

By AL POST
MCN Staff Writer

session ended. At last Thursday night's Mayor's Chair Cable TV Show, Oakley admitted he had a site in mind for the city's planned Recreation Center, but didn't wish to divulge it at this time, since other persons would also be part of the decision process on where the center would actually be erected.

Linda Norman, senior center director, said she called off the planned talks by Mayor William Oakley and Assistant Superintendent Joel Carr last Thursday morning "because of an apparent lack of interest."

Norman said "I put a sign-up sheet for senior citizens, who wished to attend the forum, and no one put their name on it!"

On Monday night, former assistant Romulus Department of Public Works Director Melvin Zilka pressed Oakley saying that he wants "both those who favor and oppose the twin governmental issues should be informed of what the issues are so that we can have more than 13-15 percent of the voters turn out on Sept. 27."

Zilka's statement was challenged by City Councilman Donald Morris, who claimed residents would have had to "have their head in a hole to not know a referendum was slated on Sept. 27."

Zilka misunderstood Morris' statement...thinking that the councilman had said he "had a hole in his head."

Morris tried to correct the statement in Zilka's mind both at the meeting and after the

Carr emphasized that homeowners will get a tax break if both the city and school district's millages are both passed.

Carr said that persons owning a house valued at \$100,000 would actually save \$23 a year in taxes, while still supporting the erection of a new 600 student elementary school, new technology and upgrades at all current schools, improvements to the district's outdoor athletic facilities as well as erecting the city's new recreation center.

Two new swimming pools, one at the high school and one at the recreation center are part of the package, Carr said.

In depth details on both the city and school district's millage proposals will appear in next week's edition of the Romulus Roman.

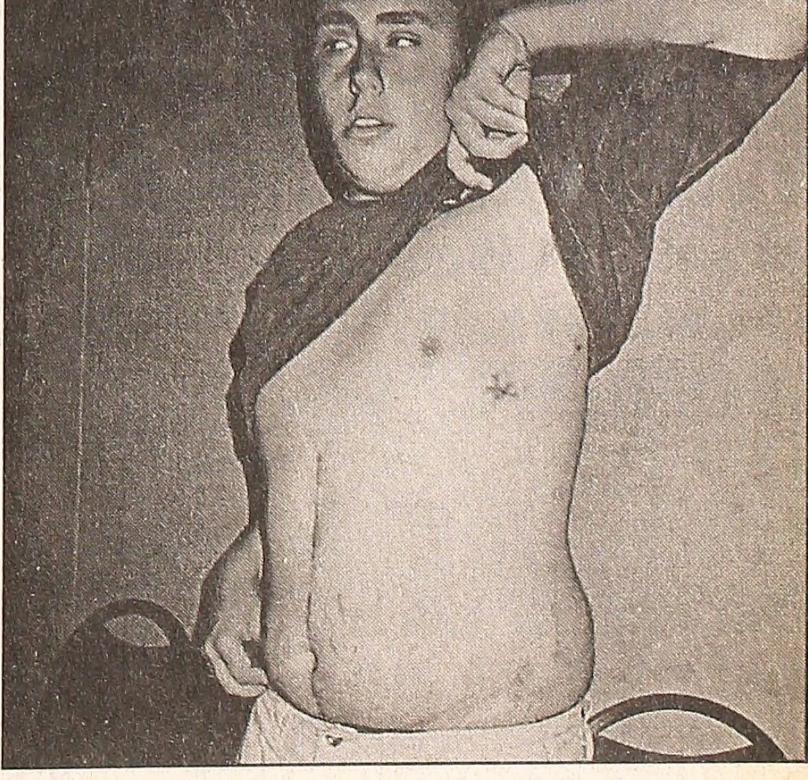

prayer be brought back into our schools," Shoels said unrelentingly.

While prayer creates healing, Shoels said, parents also need to take back their parental roles both at home and in the schools.

The strong-willed father, who admits to being a "dictator" in his home, said schools will not become safer until parents get reinvolved in the classroom scene.

Shoels liked the concept of school "mental detectors" outlined by a local reporter, but said while they are needed "they shouldn't replace metal detectors."

For more information call the Greater Grace Temple of Taylor at 313-295-4472. The pastor is Gary H. Harper.

MICHIGAN COMMUNITY NEWSPAPERS

September 16, 1999

People in the news...

By AL POST
MCN Staff Writer

Jay M. Morningstar IV of Belleville has started training as a Michigan State Trooper as a member of the 118th Michigan State Trooper Recruit School. After 19 weeks of intense training, Morningstar will graduate on Dec. 3 and be assigned to one of the 64 state police posts in Michigan.

Nicole Hrycik, a resident of Canton, has been named president of Cardinals in Action at North Central College for the 1999-2000 school year.

Cardinals in Action provides opportunities for members of the campus community to participate in community service and advocacy activities.

A senior psychology major with a minor in speech communication, Hrycik is a graduate of Plymouth-Canton High School.

Hrycik, daughter of Nicolas and Andrea Hrycik of Canton, earlier was named a Wingspread Scholar for the 1999-2000 school year.

She also is a recipient of a Presidential Scholarship from the college and has appeared on the President's list - which requires a GPA of 3.6 out of a possible 4.0.

Jeffrey S. Borders, son of Patricia (Clark) and James Borders of Romulus, graduated from Wayne State Medical School on June 8.

He will conduct his surgical internship at Beaumont Hospital of Royal Oak.

Borders also is a graduate of Michigan State University.

Wade Tornquist, a professor of chemistry at Eastern Michigan University, has been selected by the American Chemical Society to participate in the *Shaping the Pre-*

ration of Future Science and Mathematics Faculty program.

Tornquist, an expert in analytical chemistry, will be working in collaboration with the University of Michigan's department of chemistry.

Orin Mazzoni, president of the family-owned Orin Jewelers of Garden City, has been re-elected as a board member of the Michigan Retailers Services Association.

He also serves as president of the Michigan Jewelers Association, a division of MRA.

MRA is the unified voice of retailers in Michigan and the nation's largest state trade association of general merchandise retailers - with more than 4,900 members.

Marine PFC Kevin C. Mack, son of Karen L. and Walter J. Mack III of Romulus, recently completed basic training at Marine Corps Recruit Depot at Parris Island, S.C.

Angela M. Smith, who graduated with highest honors from Belleville High School, is now among the freshman class of Eastern Michigan University, majoring in education.

She recently was awarded an Associated Food Dealers scholarship from Donna Zalewski of Detroit Edison.

While in high school, Angela was a member of the National Honor Society and was vice president of the marching band.

Her scholarship entry was submitted by Hobart Corp. of Belleville.

Angela Smith

Edward Buckberry, ex-farmer dies...

By AL POST
MCN Staff Writer

Long time Romulus farmer Edward William Buckberry, 79, who also specialized in knowledge of Romulus High School alumni, died Sept. 11.

For years Mr. Buckberry farmed on the old family homestead at 12752 Huron River Drive in Romulus. He later moved to Sharon Street in the Petrosky subdivision.

Family members said Mr. Buckberry graduated from Romulus High in 1940 and later became a featured resource for persons, who wanted to know "where are they now?"

The questions referred obviously to Romulus graduates and their latest life's adventures.

Mr. Buckberry also was a member of the Community

United Methodist Church and its Men's Club. He often served as an usher and helped serve the church's community-wide roast beef suppers.

He is survived by a sister, Verna (Bill) Stubblefield of Westland, two brothers, Donald V. (Joan) Buckberry of Fennville and Hugh F. Buckberry, also of Romulus.

He also is survived by 47 nieces, nephews, great-nieces and nephews and great-great nieces and nephews.

A memorial service will be offered by the Rev. William Kren of the Community United Methodist Church of Romulus at 1:30 p.m. Sept. 26.

Cremation has taken place and interment will occur at Romulus Cemetery. In lieu of flowers, the family recommends that memorial gifts be sent to the church.

Brian Banyai and Barbara Markowski

Markowski, Banyai married recently...

By AL POST
MCN Staff Writer

Barbara Markowski and **Brian Banyai**, who are both Romulus High School graduates, married on June 26th at Solid Rock Bible Church in Plymouth.

The bride graduated from Romulus High in 1993 and months later enrolled at Olivet College. In 1997 she received her Bachelor's degree in Education and currently is a second grade teacher in the Lincoln Park School District. The groom is a 1988 Ro-

mulus High graduate and later earned his Bachelor's degree at Central Michigan University.

Banyai continued his education at Michigan State University in the turf management program.

He currently is employed with HMP, where he is an assistant superintendent at Lake Erie.

Following a wedding reception at Plymouth Manor, they traveled to Jamaica for their honeymoon.

They now reside in Rockwood, Mich.

Jason Orme earns \$300 scholarship

By AL POST
MCN Staff Writer

Jason Orme, currently a lieutenant in the Romulus Police Explorer unit, has been awarded a \$300 scholarship by the Romulus Police Officers Association.

Orme, who graduated from Romulus High School last June, is working on a law enforcement degree at Schoolcraft College in Livonia.

Orme, who is one of the original Explorers in Romulus, joined the unit at the age of 14 in 1994.

Police Officer Jeff Lazarski, who heads the Explorers unit, said "Jason has worked hard and was promoted to lieutenant, the highest rank within the Explorer Unit. He deserves the money from the scholarship to help with his tuition and his books."

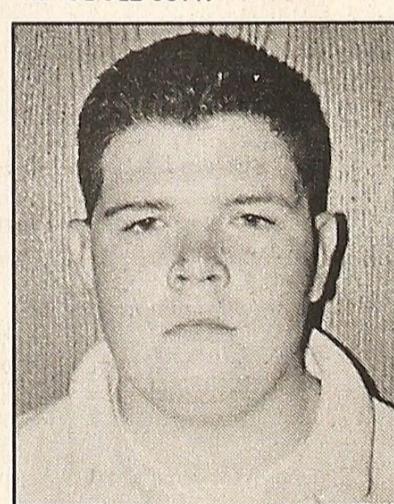

Lazarski said he hopes to increase the amount of scholarship funds next year.

Explorers are persons between the ages of 14 and 21, who aspire to become police officers. They are exposed first hand to the daily rigors of po-

lice work, enabling them to decide if a career in police work is right for them, Lazarski said.

The participants are dressed in a uniform, afforded police academy like classes, go to the pistol range once a year and eventually are allowed to ride along with an on-duty officer.

Anyone interested in a career in law enforcement and joining the Romulus Explorers Post are urged to call Lazarski at 734-942-6877.

Jason Orme

Rivers to seek repeal of War Powers Act...

By JIM RAREY
MCN Special Writer

dent Clinton has completely ignored the provisions of the War Powers Act.

Congresswoman Lynn Rivers (D-Ypsilanti) committed this week to introduce a bill to repeal the national War Powers Act.

The War Powers Act, passed years ago by Congress, allows the President to start military actions "in consultation with Congress," but requires the operations to cease unless approved by the full Congress within a specified time period.

In the Gulf War, President Bush at first maintained that he did not need Congressional approval, but later bowed to public pressure and went to Congress which granted authority by a slim margin.

In the Kosovo action, Presi-

Rivers has been a consistent critic of the Executive Branch initiating military actions without the prior approval of Congress.

At a "coffee" meeting with about 30 constituents in Plymouth this past Monday, Rivers repeated her often expressed views that the War Powers Act is unconstitutional.

She was then urged to force the issue by introducing a bill to repeal the War Powers Act and "see where it goes."

Rivers immediately replied "all right I will."

Her statement was greeted with a spontaneous ovation from the group.

Rivers set no timetable for the introduction of such a bill.

CITY OF ROMULUS, MICHIGAN

NOTICE TO ELECTORS

NOTICE IS HEREBY GIVEN THAT a Special Election will be held in the City of Romulus and the Romulus Community School District, County of Wayne, State of Michigan on September 27, 1999 from 7 o'clock a.m. in the forenoon until 8 o'clock p.m. in the evening, Prevailing Eastern Time for the purpose of submitting the following proposals to a vote of the qualified electors of the City of Romulus:

PROPOSAL A

"Shall Section 11.1 of Chapter XI entitled "Taxation" of the Romulus City Charter be amended to increase the ten (10) mill annual ad valorem tax levy limit by up to one (1) mill for a period of twenty (20) years, commencing July, 2000 for the purpose of constructing, furnishing, equipping and operating a new recreational facility in the City of Romulus?"

[Yes] [No]

PROPOSAL D

"Shall the City enter into a Franchise Ordinance with Detroit Edison Company for a period of thirty (30) years to provide a nonexclusive right to transact a local electric business to retail customers within the City of Romulus and to construct, maintain and operate such poles, towers, mains, wires, pipes, conduit and other apparatus as are requisite for the transmission, transforming and distribution of electricity for public and private use?"

[Yes] [No]

and the following proposals to a vote of the qualified electors of the Romulus Community School District:

PROPOSAL B

Shall Romulus Community Schools, Wayne County, Michigan borrow the sum of not to exceed Thirty-Four Million One Hundred Sixty-Five Thousand Dollars (\$34,165,000) and issue its general obligation unlimited tax bonds therefor, for the purpose of:

- erecting, furnishing and equipping additions to elementary schools and the high school;
- remodeling, refurnishing and re-equipping school buildings, including acquiring and installing educational technology system improvements;
- erecting, furnishing and equipping a new elementary school; and
- acquiring land for site purposes and developing and improving

playgrounds, athletic and outdoor physical education fields and facilities and sites?

{Pursuant to State law, expenditure of bond proceeds must be audited, and the proceeds cannot be used for repair or maintenance costs, teacher, administrator or employee salaries, or other operating expenses.}

[Yes] [No]

PROPOSAL C

OPERATING MILLAGE RENEWAL PROPOSAL

This proposal will allow the school district to maintain the number of mills required to be levied on all property to enable the school district to receive its revenue per pupil foundation guarantee and renews operating millage that will expire with the 2001 tax levy.

Shall the total limitation on the amount of taxes for operating purposes which may be assessed against all non-homestead and non-qualified agricultural property as defined by law in Romulus Community Schools, Wayne County, Michigan be increased by 18 mills (\$18.00 on each \$1,000.00 of taxable valuation) and against homestead and qualified agricultural property by 16.6363 mills (\$16.6363 on each \$1,000.00 of taxable valuation), both millages to be for a period of 10 years, 2002 to 2011, inclusive; the estimate of the revenue the school district will collect from combined non-homestead and homestead local property taxes authorized herein if the millage is approved and levied in the 2002 calendar year is approximately \$20,442,220 this is a renewal of previously authorized millage which will expire with the 2001 tax levy?

[Yes] [No]

Each person voting on the above proposition must be:

- (a) A citizen of the United States of American over eighteen (18) years of age;
- (b) A registered elector of the Romulus Community School District and/or the City of Romulus.

The places of voting for the special election to be held on September 27, 1999 will be as follows:

Westland woman kidnapped at knife point, robbed of cash

By IVAN HELFMAN
MCN Staff Writer

Police sought a man for allegedly kidnapping and attacking a teenage girl.

The girl, who showed up at Westland's police station with a black eye, a bruised arm, and a bruised shoulder, accused her former boyfriend of preventing her from leaving his home.

The girl said that her ordeal began at 11:45 p.m., Sept. 4, when her former boyfriend accused her of being unfaithful, became upset, and allegedly attacked her at a home on the 2000 block of Elbridge, where

NOTICE CITY OF ROMULUS NOTICE OF PUBLIC ACCURACY TEST

Pursuant to and by authority conferred upon me by the Secretary of State by Section 794C of Act no. 116 of the Public Act of 1954, as amended, notice is hereby given that a Public Accuracy Test shall be conducted by the Election Commission of the City of Romulus at 3:00 p.m. Wednesday, September 22, 1999 in the City Clerk's Office, 11111 South Wayne Road, for the purpose of certifying the programs to be used in the counting devices which will be utilized to process Absentee Ballots in the September 27, 1999 Special Election. Said Meeting is open to the public and any concerned citizen may attend.

THIS IS AN OPEN MEETING!

VAN BUREN CHARTER TOWNSHIP NOTICE OF PUBLIC COMMENT SESSIONS

HAGGERTY-ECORSE ROAD CORRIDOR PLAN

The Planning Commission and the Department of Development are very pleased to announce that they are in the process of finishing up another recommendation to update the Master Plan. The Haggerty-Ecorse Roads Corridor Plan is currently in the final stages of completion. The Master Plan is a document that provides recommendations for Future Land Use. These recommendations incorporate three main components:

- The Single Family Residential Component
- The Haggerty-Ecorse Roads Corridor Plan
- The Premiere Community Amenities Plan

But adoption of this document would not be complete without the help of our residents!

To learn more about the Haggerty-Ecorse Road Corridor Plan, the Department of Development will be hosting Public Comment Sessions. These sessions are an opportunity to speak with the Planning Staff in an informal setting. Anyone interested in expressing ideas, concerns, and opinions is encouraged to attend. The following sessions are scheduled in September:

Wednesday, September 22, 1999 from 7:00 p.m. to 8:00 p.m.
Monday, September 27, 1999 from 12:00 p.m. to 7:30 p.m.
Tuesday, September 28, 1999 from 9:00 a.m. to 4:00 p.m.

All of the sessions will be held at the Township Hall in the entranceway, with the exception of the first meeting which will be held during a Regular Planning Commission Meeting. If you have any questions, please feel free to contact the Department of Development at (734) 699-8913. Hope to see you there!

PROPOSED WOODLANDS MAP

The Planning Commission along with the Environmental Commission have been diligently working to produce a Woodlands Map for the Charter Township of Van Buren. To provide comments and learn about the proposed woodlands map, you are invited to attend the Planning Commission Meeting which will be held on Wednesday, September 22, 1999 from 7:00 p.m. to 8:00 p.m. in the Board of Trustees Room, Van Buren Township Hall, 46425 Tyler Road, Van Buren Township, Michigan.

Publish: September 16, 1999

the couple was alone. She said that he pushed her. She told him that she wanted to leave. He punched her in the head, face and stomach, she said; adding that she tried to leave several times, but he refused to let her go.

During her unwilling stay, he pulled her hair, punched her, and slapped her several times, she said.

After about six hours, he apologized and asked her if she wanted to kiss and makeup.

She declined.

He said that he would kill himself if she did not forgive him, she said.

He slid a knife blade across his chest, drawing blood, and asked her to lick the red drops, she said.

After she refused, he blamed his behavior on being drunk.

When he left the house on foot at noon Sept. 6, she fled the house. Her parents weren't available, so she contacted her

older brother, an adult, who brought her to the police station to file a complaint.

Police released her to her brother, who asked the police not to call city paramedics.

A report was made to be turned over to the detective bureau for further investigation.

Seniors on the move

September 16, 1999

Page A-5

Joanne Savini is senior of month...

By AL POST
MCN Staff Writer

While Joanne Savini was born in Detroit, years ago her mother felt she was underweight and needed to move to the "country" (Nankin Township) so that the fresh air would improve her appetite.

Joanne attended Wayne Schools and later took a year of business school.

She met her husband-to-be, Ralph Savini, when he moved in next door. But he later entered the armed services during World War II.

When he came back home, Joanne was "all grown up" and a romance began and they married when she was only 20 years of age.

They moved to Chicago so that Ralph could attend TV school, while the industry was still in its infancy.

While in Illinois, Joanne's mother died and Joanne felt her father needed some assistance, so they moved back to Michigan.

Her husband then joined the Wayne Fire Department at the age of 29. He remained there until the creation of the Nankin Fire Department.

When Westland became a city, Ralph became its first fire chief.

Their family enlarged as three children were born in coming years, Mary, Nancy and Steve.

Joanne later began working as a secretary in the curriculum department of the Wayne-Westland School District. After two years she switched to Hoover Elementary School and remained there for 25 years.

Joanne retired in 1992 and now volunteers much of her time at the Westland Friendship Center and St. Mary's School.

At the friendship center, Joanne checks in computer class students, gives tours of the center, files reports and registers new members.

While working as a volunteer at St. Mary's, she serves as a secretary staff assistant.

James and Nalda Doletzky

Doletzky's to mark 50th anniversary

By AL POST
MCN Staff Writer

James H. and Nalda M. Doletzky of Wayne will celebrate their Golden Wedding Anniversary on Sept. 26 at a Thanksgiving service at St. John's Evangelical Lutheran Church of Westland.

A reception will follow at the Hellenic Cultural Center of Westland.

They were married at St. John's Church, then in Wayne, on Sept. 24, 1949.

Nalda Doletzky is retired from Dayton-Hudson Co. Her husband is retired from both the Wayne

County Road Commission and Wade Trim and Associates.

Both are life members of the Michigan Historical Society and the Wayne Historical Society. They are active at St. John's Church and the Huron Valley Lutheran High School.

They are the parents of three married children: David (Diane) Doletzky of Westland, Barbara (Michael) Husby of Wayne and Gwynn (Dale) Manzel of Northville.

They also have seven grandsons and one granddaughter and one great-granddaughter.

Opinion

MICHIGAN COMMUNITY NEWSPAPERS

Eagle controlled by city hall, that's crap, if I've ever seen it

Last week I was surprised to open my mail and find a six-page packet of campaign literature with the title, "Does the City Administration CONTROL the Wayne Eagle?" Authored by citizen activist Charles Johnson, who has received his share of accolades from this newspaper for his work on Sassafras Trails, I consider that question and its companion accusations to be outrageous.

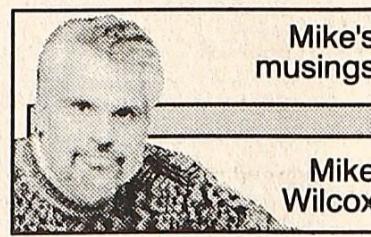

First, if you ever bothered to talk to me, you would know as the leader of this newspaper, there is no way you could classify me as an unqualified supporter of the current city administration. A few weeks ago I took them to task over the Arbor Drugs rezoning, and I continually gripe about their propensity to take work away from my newspaper operation and printing plant and send it to out-of-town vendors.

Although I have met each and every council person, I am not friends, nor do I regularly talk to any of them. I can't tell you the last time John Zech or a city administrator has been in our office. I can tell you Jim Netter, a council candidate that you support is in our office frequently. I think he can refute many of the misrepresentations you make, Mr. Johnson.

Your claim that we will endorse four candidates, and those candidates will be the four incumbents. As you can see in our last Wayne Eagle we agreed that the incumbents deserve to go on to the general election, but so should others like Davidson, Schackelford, Pride and Netter. Two of those candidates, Nancy Pride and Jim Netter are endorsed by you.

Mr. Johnson, again you misrepresent the truth when you indicate the Wayne Eagle when it was a part of Associated Newspapers and under different ownership received a loan from the city several years ago, and didn't make any payments. I plead ignorance about the loan. I wasn't

around. I purchased the assets of the Wayne Eagle and formed a new corporation, Michigan

Mike's musings

Mike Wilcox

Community Newspapers five years ago.

To this day, many confuse us with the former owners, Associated Newspapers, but we are a different breed. We have no loans from governmental units and we maintain a healthy watch dog attitude when it comes to the goings on at City Hall. We aren't afraid to criticize when we think city council has screwed up. But, we are also the first to extend praise when warranted. That in my opinion, does not make us a puppet of the current regime.

I cannot speak for our Wayne Eagle editor, Tom Mooradian, as to why he edited your Letter to the Editor and did not interview your candidate, Robert Boertje. I will however, say it is common practice to edit letters and yours was very long and the edited portion didn't pertain to your original subject, which seemed to be an endorsement of Boertje, which we did run in its entirety. I guess if you wanted an unedited version, you could have bought an ad, like many people do.

Mr. Johnson, you call yourself a citizen interested in open government and integrity. May I suggest you practice what you preach? Let's not spread false and misleading information around. Let's not make claims like the Wayne Eagle is controlled by the city administration, without substantiation. These claims and actions aren't doing a thing to make the City of Wayne a better place to live. And after all, isn't that the goal for all of us that live and work in this fine city?

Thanks a Million

WEEKLY SYNDICATED COLUMN BY PERCY ROSS

Millionaire Percy Ross is known for his philanthropic work. He offers help and encouragement for those in need. He has earned a fortune and a wealth of knowledge during his lifetime and wants to share both. His motto: "He who gives while he lives... also knows where it goes."

Sacrifices Made To Ensure Future For Column

Dear Readers: My employer and good friend, Percy Ross, is out of town this week. Part philanthropic, part personal. He and his wife are celebrating 60 years of marriage. But no matter where he goes, he's quick to recognize need, lend a sympathetic ear and pass a few bucks into the palm of your hand if he thinks it will help.

I've known him and his wife, Laurian, for 17 years. Their personal lives are very private. In all the time that he has written this column, he has seldom given his readers any insight about his lifestyle. Most readers assume he is a full-time philanthropist, and rightfully so, because he is.

He's nearly 83 years old and for the life of me I can't figure out why on a beautiful summer day, midweek, he doesn't take off and go golfing. I know I would in a New York minute.

To him it's more important to stay at the office, answer his mail and call his readers regarding their situations. He is definitely a people person and loves having contact with them. I think he gets energized by it, so why would he want to give that up to play golf?

I'll give you an inside tip. Up until 2 years ago the Thanks a Million offices were a gorgeous suite, with expensive art and grand furniture. The overhead was borderline decadent. Now we're in an office/warehouse. Gone is the beautiful art and massive oak desks. Gone is Mr. Ross' chauffeur driven limousine. It was a difficult decision for him to move because a millionaire philanthropist should look the part. But the decision was ultimately made because his desire for the column to become self-sustaining after he is gone, out-weighed his desire for present day luxury. In his own way, he's making sacrifices so that he can ensure a future for the column.

The best part of the move is that our dress code was relaxed and the staff is now allowed to call one another by first names. Until then it was "Mr., Ms.

Doctor kicks insurance habit; patients save

Can you afford health insurance?

I suppose most people can, especially if you work in Wayne County, where the auto economy is booming by post-Eisenhower standards, where the county offers health insurance plans to local small businesses, and where Michigan programs may take care of poor kids.

I really doubt that many of our readers fall through the cracks.

But I expect that most people, doctors and nurses excepted, think that health care costs too much.

When congress and Hillary Clinton debated national health care reform, the debaters never reached a consensus on the causes of steep costs nor the remedies.

Everything from greedy doctors to gouging drug companies to parasitic insurance companies were blamed.

I had always attributed rising medical costs to better sanitation and medicine, which has increased Americans' life spans. With people living years longer, insurance companies must pay for extra years of care. Elderly people require costlier care.

If our medical care deteriorated like in Russia, where life spans are decreasing, medical costs would plunge.

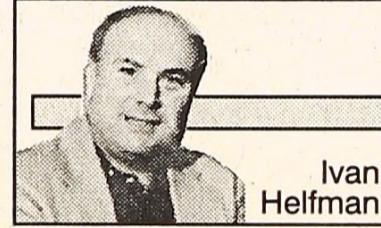

That said, evidence comes from New Hampshire that doctors can reduce health care costs by cutting out the insurance companies.

According to an article,

Ivan Helfman

"Doctor: Cash only slashes prices," by Carol Carter in Tuesday's Manchester Union Leader.

"Providing affordable health care for patients willing to pay cash for services has cut prices by more than half at one local osteopathic office."

The reduction occurred after July 1, when Dr. William Peternel, who operates the White Mountain Center for Holistic Health, stopped accepting any health insurance, including Medicare and Medicaid.

Dr. Peternel had felt that insurance companies' fees were excessive, that too often patients had to pay out of pocket, and that some insurance companies were slow payers.

"We felt we could provide services less expensively if we removed the third party," said Katy Peternel, the doctor's wife, told Carter.

Once the center cut out Medicare and the insurers, overhead costs shrunk and treatment fees dwindled to less than half.

"Now people come in the door and hand me a check. They appreciate knowing how much their appointment will cost and know they won't receive any surprise bills three months down the road when their

insurance carrier decides not to cover the services," said Peternel.

The approach will work well as long patients also buy high-deductible, catastrophic health insurance plans to cover traffic accident injuries and major illnesses. Such coverage would be available if either the state or federal government approves medical savings accounts, where patients pay for routine medical coverage and buy catastrophic insurance to handle the "Big C."

I hope that the state government takes the lead from Wayne County and enacts medical savings accounts, enabling physicians to lower their fees.

My generation -- the Eisenhower boomers -- was the last one to be treated by doctors making house calls. When I had croup as a child, my mother set up a bell jar vaporizer that hissed and wheezed, and she called the doctor, who arrived, carrying a little leather satchel in one hand and a lit Havana cigar in the other.

After the doctor jabbed me with a hypodermic needle that was as long as his stogie, he would join my parents at the living-room table and gossip over a cup of coffee. In those days, doctors were like family.

Now we have expensive health care administered by strangers in hospitals as daunting as the House of Frankenstein.

Perhaps if return to paying doctors cash, we could kill the monster.

P-C staff made large schools workable

To the Editor:
It is interesting to note that all of the parents who spoke in favor of the new high school being built within walking distance of Salem and Canton (east site) at the school board meeting last Tuesday night were people who have, or have had, children at P-CEP. Conversely, all of the parents who wished for the new high school to be built at least a bus ride away from Salem and Canton (west site) are people who have never had children at P-CEP. The only exception was Sue Davis, the president of the school board.

This reminds us of a common truth: people fear what they don't know. It also reminds us that adults are afraid of its teenagers, especially when they are massed together.

Why, then, does this massing of teenagers no longer frighten the parents of students who have actually attended P-CEP?

We human beings instinctively search for meaning in our surroundings. If we can't find it, we make it. That's what staff and students have been doing at P-CEP since its opening almost 30 years ago. We have naturally found ways to break the size of the Park down into manageable and humane parts by creating smaller communities within P-CEP. These smaller communities are best known by their curricular and co-curricular titles: Odyssey, ESL, Plymouth Park Players, the Marching Band, Madrigals, Indian-American Association, the Rock Cafeteria, Science Olympiad, French Club, Executive Forum, Yearbook, WSDP, The Rock Shop, Special Ed, Humanities, Chieftesses, Quiz Bowl, Student Service Center, Bible Club, NHS, Spectra, Crow Canyon, Journey, about 39 different athletic teams, and many other smaller communities within the school too numerous to mention here. The wonderful thing about these communities is that they provide a place for everyone at the Park- staff and students- who is looking for one. And no one, of course, is relegated to being in just one community. This sense of community within a large institution is essentially what the parents who spoke in favor of the east site at last Tuesday's board meeting know from experience.

"The sickness of the oyster is its pearl."

For almost thirty years now the grain of sand that has sickened some Plymouth and Canton residents is the size of P-CEP. But it is time for these residents to look more deeply, beyond the statistics of its size. If residents do, they will find that long ago the irritating sand of size was transformed into a pearl of great worth by the motivated staff and students at P-CEP who have "stepped out of the box" by creating smaller, caring communities, while maintaining opportunities for Plymouth-Canton teenagers that residents of other Michigan school districts do not even have the vision to dream of.

P-CEP staff members know

more than anyone that P-CEP is not a perfect place and we certainly have had our share of failures. P-CEP is not the best place for every child-but what school is? If the new high school is built at the west site, \$80,000/year in costs are projected just to bus students among the three schools to preserve equity for each student. Wouldn't it be better to budget this money for finding creative ways to meet the needs of students who are not happy at P-CEP, while still offering them the opportunities afforded by its size?

Since the school bond issue was passed over two years ago, staffing parents and students have taken the opportunity to present the school board with deep and extensive information concerning the curricular and co-curricular programs at P-CEP, that they did not have before it promoted the bond proposal. This information has led many P-CEP parents, staff and students, the P-CEP administration, the Superintendent of Instruction, the architect, the interim superintendent and three board members to state publicly at board meetings their preference for the east site. Four other board members voted for the west side largely because of the promise they felt the board made to voters when the bond proposal was advertised.

Promises are not to be made or taken lightly, and the credibility of the board is critical. But of supreme importance to the board should be doing what's best for kids. The school board members now have information that they didn't have before they drafted the bond proposal, and vastly more information than any resident of Plymouth and Canton could ever have. Does the board really believe that residents would hold the board to the promise it made if they knew that keeping that promise would mean spending at least \$80,000 a year to do what's not best for kids?

Mary Beth Carroll

Boertje says that voters can bar a candidate from office

This letter is in response to Mr. Marman's letter of August 26, 1999 which was published in this paper. My name is Robert Boertje and I did answer yes to the questions asked whether lack of religious affiliation should bar someone from seeking public office. I listened to the question and was instructed to answer the question without an explanation. I don't know where in the First Amendment it states that it is illegal and unconstitutional to bar someone from seeking public office, however the First Amendment does allow me the right to answer the question with a yes answer. I believe that the only way an individual can bar another from seeking public office is by voting for another candidate that is seeking to be elected. After all, most people don't even know the candidates on a personal level. Thus a right to vote is more than just a right. Some people hope and others

From Our Readers

Page A-7

pray that the people they elect will be the leaders they had expected them to be. People of integrity, honesty, and of high moral character.

Obviously, I did not state myself clearly to Mr. Marman when approached by him after the forum. I reacted to the fact that the President of our country lied, not only to his family, and "his" God but to all of the people of this country. That "lie" cost this country over \$40 million dollars in searching for the truth and defending his "denials". I find that utterly disgusting and an embarrassment to our nation.

There was no outrage in this city when a religious leader was assigned to the "Task Force" in 1998. Isn't Mr. Marman implying that religion and politics should not be present together? This individual was assigned to represent the community and spoke of his religious beliefs when commenting on issues related to the "Task Force" issue. Where was Mr. Marman than if religion should not be present in politics?

I have made a positive difference in this community these past years. I truly believe and have the support of others that I am of high moral character. I am saddened by people in our nation who are obviously embarrassed to admit that religion plays a part in their own lives.

As to Mr. Marman, should you read this, you taught me the beauty of photography not political science. If you honestly don't feel I possess the integrity, honesty, and high moral character to be a leader in this city, than use your "right" to bar me from public office.

Sincerely,
Robert "Bob" Boertje

Wayne should require more attractive restaurants and businesses

The enclosed letter was sent to a convenience store as a smaller of a much larger complaint regarding the businesses in our community. As a resident of the City of Wayne for many years, I am saddened by the lack of respect many businesses show to the community and the residents. There is no reason that a business should be dirty on the outside or the inside. The lack of aesthetics of new businesses being built, as well as existing businesses, saddens and angers me. I am further angered when the appearance of businesses start out well only to quickly deteriorate. Is there not a city council member cognizant of these same things?

The city of Wayne should take a cue from Plymouth and Canton and pass laws regarding the structure and appearance of its buildings. The establishments south of Michigan Avenue are horrid. The city should also get a clue and let some higher quality restaurants come in. You cannot eat a decent meal in Wayne but you sure can get gas or a coney dog. Where are our Cooker's or Alexander's? Maybe they would want to come

here if the place looked better. Why do we have to go to Westland for donuts?

Wayne is more than the strip that runs along Michigan Avenue. Spend some time south and north of Michigan Avenue. Include the entire city in your renovation plans not just the parts that the council members see. Bring in businesses that will keep the money within our community. If not at least change our motto to - It's Great To Live In Wayne If You Live Somewhere Else!!!

To the owner and management of the convenience store:

I have been a patron of this establishment and a resident of the City of Wayne for many years. It is my preference to patronize the businesses in my community, as opposed to businesses in other communities, when possible. My family, friends, and I find the location and accessibility of the store appealing. However, we will not enter this store if we are going out for the evening due to the fact that you smell of smoke when you leave the store. My boyfriend and I personally will not purchase fountain pop or bread from this store anymore as these too, always taste like smoke. You cannot expect to smoke in an enclosed space and not have the paper products and other merchandise not absorb the smell. I can only imagine what the lunch meat tastes like.

This is not meant as an attack. I would like to continue to patronize this establishment. But, I find myself frequently getting merchandise from the gas station next door as it is so much cleaner, less crowded, and the help is more friendly. Most importantly, it is not overtaken by the smell of smoke.

I was hopeful that you would fix up the outside and inside when you purchased the new sign. Patrons are concerned with the cleanliness of the places they are purchasing food. Show a little respect for yourselves, this community, and for the patrons by clean things up-including the air.

Sincerely,
A concerned patron

Public pays for elections, should vote

It is not difficult to realize that it is election time once again. Tons of signs proliferate the landscape as if the one with the most signs wins. The mailbox is filled daily with promotional brochures or "gifts." The promotional telephone calls begin at 9 AM and end at 9 PM (usually). Some of the candidates will spend more money on advertising and other expenses than the position pays annually.

Part of your tax dollars help to cover the cost to conduct these elections. All things considered, don't you think you should do your part in this election process? It is your money and it is in your best interest to vote to assure the best candidates for you get elected.

Please take the few minutes needed to make your voice heard.

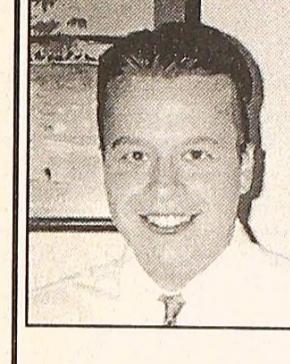

Thank you,
Tony Breher

and the father of three children, all of whom are now proud Plymouth-Canton alumni, I do feel comfortable and justified in expressing myself.

However, perhaps more significantly, you will please note that I am frequently called upon in Lansing to explain certain actions taken by local officials. This is so because those local decisions are taken into account when matters come before the state legislature. And, this is especially true when fiscal policy is being discussed.

You will recall that many questions and numerous concerns have been raised over the level of state funding provided to the Plymouth-Canton public schools. I have taken those to heart when advocating for the district. Perhaps my advocacy played a part in the very significant increase we experienced in school aid supplemental funding we received for both fiscal years 1998-1999 and

See LETTERS, page B-3

Question: I've heard that sealants are good for children's teeth. What are sealants?

Answer: When a child's permanent molars start erupting into the mouth, anywhere from age 5-7, the dentist will, in many cases, recommend that those teeth be sealed. A sealant is an acrylic (plastic) material which is applied to the grooves on the biting surface of the cavities. A sealant applied to fill in these grooves will significantly reduce the chances that your child will develop cavities on these teeth.

Having sealants applied to your child's teeth doesn't mean that they can stop brushing and flossing. Sealants only protect against cavities on the biting surfaces, not between the teeth or at the gum line.

Sealants are quick and easy to apply. They do not require any anesthesia (Novocain). Almost all children can benefit from this proven preventive measure, and it gives you, the parent, the added peace of mind that you are doing all you can to preserve the dental health of your child.

At Newburgh Heights Dental Group, we are committed to your child's health and well-being. Ask about sealants at your child's next visit.

Matthew Schaub, DDS

'Quality and Service' are Accurate Floor Covering

The Goff family seems to know the secret to success. After all, they have been in the flooring business for 10 years now and continue to provide the same level of quality service and products that they did back in 1989. Art Goff, and his son Craig, remain adamant in the claim that "satisfying customers needs" is the most important thing in business.

After a fire destroyed all of their store in 1996, Accurate Floor opened up again on October 1st. This time though, they unveiled their newly designed store and at the same time, became America's newest Mohawk Floorscapes participating retailer. According to Craig Goff, "By adding the Mohawk Floorscapes name to ours, we're building on our reputation for quality and service by offering customers the latest concepts in flooring fashion, style, color and performance." Accurate Floor sells and installs vinyl flooring, pre-finished hardwood floors and carpeting for both residential and commercial use. It also does custom work, including borders, inlays and logos.

A new addition to their company is the Idea Center. "Now customers need to bring only their fashion sense to our self guided Idea Center. Then Floorscapes invites customers to investigate and experience all on their own, the latest carpet styles, colors and textures...all performance related according to their lifestyle," Craig says.

This family business is proud of the service they provide and are reassured of their quality performance through their return customers and the referrals they make to their friends and family. So while Art and Craig handle the inside and outside sales and Craig's wife Tammy runs the office, Accurate Floor Covering remains a pinnacle of triumph success.

Offering luxury flooring at affordable prices Accurate Floor Covering is open for business Monday 10-8 pm, Tuesday through Friday 10-6 pm and Saturday 10-5 pm. They are located at 44555 Joy Road in Canton Township or can be reached by phone at (734) 454-4140.

MICHIGAN COMMUNITY NEWSPAPERS

September 12, 1999

School districts differ over corporate advertising

corporate trough to supplement the district's lean revenues.

The new Plymouth-Canton regulation will not allow corporations total freedom. No matter how much money they contribute, their advertisements may be censored by principals, the superintendent, and the school board if the ads contain "hate literature" or creates a hostile atmosphere for minority groups; is likely to disrupt school activities; is libelous or violates privacy rights; or is obscene or pornographic.

In addition, guidelines have been established to screen out unfair advertising. Ads must not be deceptive; must not be high pressure; must not "convey the impression that ownership of a product or service will gain peer approval or enhance one's social status; and may not promote any form of antisocial behavior.

Wayne-Westland, on the other hand, is not interested in selling advertising space to corporations.

"It would taint our educational environment and allow our children to be used," said Teresa Robbins, a Wayne-Westland board member.

"But though I'm against it, I can see the flip side: there's big money in it," Robbins said. "We will have to consider how to compete with schools that millions of dollars from corporate advertising."

"[Corporate advertising] is not something that we have solicited, except for maybe school newspaper ads," said Charlotte Sherman, Wayne-Westland's assistant superintendent. "To my knowledge, we stayed away from it."

While Sherman did not explain why Wayne-Westland shies away from corporate advertising, many critics believe, like Robbins, that some multinational corporations have ulterior motives for slipping into the schoolhouse.

According to a website, www.McSpotlight.com, a high ranking McDonald's marketer stated in court testimony: "It is our [general] objective to dominate the communications arena... because we are competing for a share of the customer's mind."

The board recently adopted a policy to regulate "Corporate sponsorships [and] commercial advertising within the school setting."

The board adopted the regulations after former school board President Mark Horvath urged the board to feed at the

fast food corporations seek low wage workers.

Letters

Continued from page A-7

1999-2000. However, the recent school board decision may well undermine my efforts.

When I read that the Superintendent is quoted as saying: "I don't think this district can add the additional costs and offer the comprehensive curriculum that we offer...I don't know how we're going to do this. It was the wrong decision to make, "I become very concerned. Then when I read that the President of the local Education Association is quoted as saying: "Teachers are still reeling from the decision." I am even more concerned. And, when I consider the quote attributed to Trustee Guile: "The comparative costs between the two sites was staggering." I am really concerned.

During the next round of budget talks in Lansing, how do I maintain that fiscal responsibility is being adequately considered in my school district? "Bruce, why are you asking for more money when the District's own trustees, union president and Superintendent are critical of spending decisions being made by the Board?" I will be asked.

Yes, there are good reasons being articulated by both sides in this East-West site debate. I respect the fact that Susan Davis, Darwin Watts and Judy Mardigan have sincere beliefs in what is needed for our children; just like Roland Thomas, Steve Guile and Liz Givens have. But I would ask all concerned to consider what I am saying. And, I would suggest that it is not too late to re-consider.

If the Board will only re-consider, at least then statements like:

1) "...the administrators presentation on August 17th was disappointing" -President Davis and,

2) "...I had problems getting specific answers to questions" - Trustee Mardigan and,

3) "...we need more input from the central administration" - Trustee Slavens and,

4) "...the research the Board received was very late and untimely. And, "I question the validity of the financial data." - Trustee Watts and,

5.) "(The majority) was not ready to make a good decision" - Supt. Walcott

can't be offered by opponents to support the concept that the majority of the Board acted without due diligence and I, as a State Representative, have no business asking for more money for our District.

With rumors, accusations, and threats flying around the community, it is not too late re-consider. I, personally, would ask the Board to do so. We all want what is best for the children and we need to work as a team if we are to achieve our goals.

Thank you for your consideration.

Very truly yours,
Bruce Patterson

Writer campaigns too late for primary election

Tuesday, September 14th is a golden opportunity for Westland voters to give Mayor Thomas a resounding wake-up call. By defeating his hand picked puppets for city council, (Griffin, Cox, James), we send him a very clear message that he has 2 years to clean up his act, or he too will be gone. The mayors arrogance and pomposity has clouded his ability to govern this city. Virtually all of his actions for the city are connected to his personal gain.

Let's get back to sanity and honest in government. Elect Anderson, Godbout and Kehrer.

Chuck Papineau
Westland

P.S. Sharon Scott take note!!!

McEachern should have been compassionate to the late Mr. Sinitf

We were in attendance at the City Council meeting on September 7. We are outraged over the incident that took place during the meeting! Mr. Mike Sinitf, a citizen and business owner in our community spoke quite eloquently to the Council regarding the way the city was handling an issue involving the sale of his businesses. He was obviously upset over what had happened and within 2 minutes of leaving the podium and returning to his seat, he suffered an apparent physical emergency.

The person who had taken the podium and was beginning to speak on another subject stopped speaking when it became obvious that Mr. Sinitf was having a physical crisis. To our great distress, Mayor Pro-Tem, Donna McEachern instructed the young man to continue speaking, ignoring the emergency in front of us. Someone in the audience spoke up and asked the speaker to stop until the emergency was handled. Mrs. McEachern, in a very rude and condescending tone, said that the speaker should continue and someone else would take care of IT (as she referred to Mr. Sinitf's condition). She went on to state that she was running the meeting

and she would decide what to do. The young man, very obviously concerned and uncomfortable with the dictate from Mrs. McEachern, said he could wait but AGAIN the Mayor Pro-Tem told him to continue. He continued to speak and Mrs. McEachern said that people better qualified than anyone there were handling the situation.

We have been supporters of Mrs. McEachern, however, after seeing her behavior during the meeting, we have lost all respect for her, both as our council person and as a compassionate human

being. She proved to us in that short time exactly who she is, and we cannot support anyone who showed such a total and complete lack of respect for humanity during a medical emergency. She has certainly lost not only our respect, but our votes as well. We do not want someone sitting on City Council, much less representing us as Mayor, who shows no respect for the citizens of this city. We are truly ashamed of her behavior and the way that behavior reflects on our city.

We believe that the situation would have been handled if she

were to have dismissed everyone from the room for 10-15 minutes so the emergency could have been handled properly. Mr. Sinitf should not have been moved from the room, as was the case. He should have remained where he was until medical help arrived to deal with his condition. We should have been asked to leave the room.

If anyone has any respect left for Mrs. McEachern we would be very surprised.

In closing, we would like to express our deepest sympathies to the family of Mr. Sinitf who, unfortunately, passed away at City Hall. Sincerely, Sandy & Larry Johnston Wayne

Jeanne Garafalo, Ben Stiller, and William H. Macy head a cast of unknown heroes in the recent release *Mystery Men*.

Mystery men funny, but disappointing

By SYBILLE MARR
MCN Movie Writer

I have always been a sucker for strange and unusual movies. Anything out of the ordinary that will keep my attention and give me a great reason to go back to the theaters. In the recent release *Mystery Men* I left with a not so yearning to go back quickly.

Mystery men stars a great cast, of known and unknown stars that play heroes and foes in a fantasy world. A world where there is only one major super hero, Captain Amazing, played my Oscar nominated actor Greg Kinnear.

He fights all the crime right out of town. He has nobody to chase away. Now he is in a major dilemma, no criminals. No Criminals, no fame. No fame, no fortune. All his sponsors, Pepsi to name one, are threatening to drop him as a poster boy for their product.

He comes up with a brilliant plan to save his career. He will pose as his alter ego, the District Attorney, and back a known bad guy, Casanova Frankenstein, on a parole hearing. Then he will be able to fight crime once again and he will save his career from termination.

The bad thing is his plan fails and Casanova Frankenstein, played by Academy Award winner Geoffrey Rush, captures him. The evil Casanova tells the all mighty Captain about a plan he has in order to take over the city. Now who may you ask will save the day? How about a group of not so super heroes.

There is the Bowler, played by Janeane Garofalo, who's father was murdered by Casanova's hench men. Mr. Furious, played by last summer's talked about actor, Ben Stiller, who explodes into rages when provoked. The Shoveler, played by William H. Macy, who uses his shovel as his weapon to fight against the forces of evil. The others are a farting guy whose farts will make you pass out, an invisible boy who wants to be a super hero more than life itself, a culinary arts master, and a master Jedi type guy who knows all about being a hero and tries to teach his pupils the ways.

They decide to rescue the Amazing one and they recruit an inventor who makes non-violent

weapons to help, since they are not into killing the bad guys, just putting them in jail.

This movie had some real amusing parts, but I have to admit I was kind of disappointed in it. I am a big fan of all the actors (including former Pee Wee Herman Paul Reubens) and I have to admit that was one of the pluses in the movie was just seeing them all together on the screen.

The plot was almost good, considering this was originally a comic book series, but it lacked one thing more punch lines. There were far too many reaches to grab at the characters inner selves. They forgot to just have fun with the characters and what they do. Everything they had these heroes do is totally predictable.

Don't get me wrong, this was a funny movie. I would just have preferred to see at my local Blockbuster rather than the theaters. I am just glad I paid for the popcorn rather than the tickets.

MINUTE MOVIE REVIEWS

NOW SHOWING IN THEATERS:

Stigmata stars Patricia Arquette, Gabriel Byrne, and Jonathan Pryce. A supernatural thriller about a young woman who doesn't believe in God and begins to have strange religious and other worldly visions and a priest is requested by the Vatican to investigate her reports. Rated R.

Love Stinks stars French Stewart, Bridgette Wilson, Tyra Banks, and Bill Bellamy. A romantic comedy about a television writer who attends his best friend's wedding only to fall for a beautiful woman and at first it seems perfect and everything he always wanted. Only things begin to turn sour. Rated R.

Stir of Echoes stars Kevin Bacon, Kathryn Erbe, Illeana Douglas, Kevin Dunn, Conor O'Farrell, and Liza Weil. This compelling psychological thriller of a man who finds his blue collar Chicago existence altered after he is hypnotized at a neighborhood party. Rated R.

The Astronaut's Wife stars Charlize Theron, Johnny Depp, Joely Fisher, and Dabney Coleman. This adventure comedy is based on the popular cartoon character, a security guard blown a part and then rebuilt into a man with many talents and accessories. Rated R.

The 13th Warrior stars Antonio Banderas, Diane Venora, and Omar Sharif. A thriller about an important emissary who is abducted by a band of warriors and forced to join their quest to battle mysterious creatures legendary for consuming every living thing in their path. Rated PG-13.

Dudley Do-Right stars Brendan Fraser, Sarah Jessica Parker, Alfred Molina, and Eric Idle. This family comedy is based on the classic cartoon character about a

dedicated young Mountie who must save the local citizens, reunite with his lady love and restore peace in the Valley with out screwing it up. Rated PG.

The Muse stars Sharon Stone, Albert Brooks, Jeff Bridges, and Andie MacDowell. A comedy about a screenwriter willing to gamble his career, his relationship with his wife, and his sanity on the Muse's ability to give him inspiration for his comeback script. Rated PG-13.

Drop Dead Gorgeous stars Kristen Dunst, Denise Richards, Kirstie Alley, and Ellen Barkin. A Comedy about a small town's great obsession with its teen beauty pageant. Rated PG-13.

The Haunting stars Liam Neeson, Catherine Zeta Jones, Lili Taylor, and Owen Wilson. A super natural tale about a professor who has drawn three subjects into a mysterious psychological experiment in the Hill House, a mansion plagued by ominous tales of death. Rated PG-13.

Inspector Gadget stars Matthew Broderick, Rupert Everett, Joely Fisher, and Dabney Coleman. This adventure comedy is based on the popular cartoon character, a security guard blown a part and then rebuilt into a man with many talents and accessories. Rated R.

American Pie stars Jason Biggs, Alyson Hannigan, and Jennifer Coolidge. At the end of their senior school a group of friends make a pact to lose their virginity on Prom night. Rated R.

Austin Powers: The Spy Who Shagged Me stars Mike Meyers, Heather Graham and Robert Wagner. Dr. Evil invents a time machine that he intends to use to travel back in time to the 60's where he can steal Austin Powers' mojo.

Notting Hill stars Julia Roberts and Hugh Grant. Business booms

for a single business owner in England after the most popular actress in the world walks into the bookstore and offers him a kiss.

Star Wars Episode I: The Phantom Menace stars Liam Neeson, Ewan MacGregor, and Natalie Portman. Young Anakin Skywalker begins his fall to the Dark Side in this first of three prequels films to the popular *Star Wars* Trilogy.

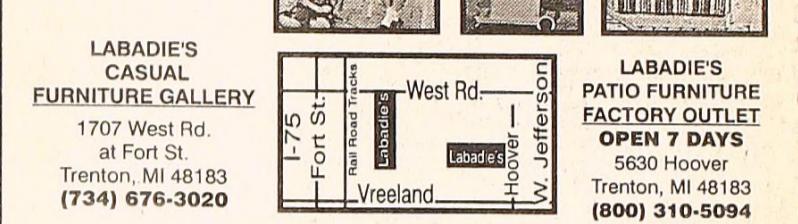

The Mummy stars Brendan Fraser, Rachel Weisz, John Han-

nah, and Arnold Vosloo. A sci-fi epic about an expedition of treasure seeking explorers in the Sahara desert in 1925 who stumbles upon an ancient tomb and unwittingly sets loose a 3000 year old mummy. Rated PG-13.

Life stars Eddie Murphy and Martin Lawrence. A prison comedy about two friends serving life sentences and their attempts to break out over the course of 60 years. Rated R.

Happy 92nd birthday!

Avid baseball fan Lawrence Dillard moved up to the plate and in the spotlight recently when friends and loved ones gathered at the Twin Towers to help him celebrate his 92nd birthday. Dillard (above), who loves baseball, was born on Sept. 1, 1907 in Haynesville, Ala. A member of the Smith Chapel A.M.E. Church in the city of Inkster, Dillard welcomed the gathering with smiles and, among those who helped him celebrate were his children, grandchildren and two great grandchildren. Daughter, Lottie Jackson, and husband, Edward also flew in from Las Vegas for the special occasion. The cake? A beautifully decorated baseball field with the names of baseball legends names and images as the frosting and icing. Lawrence's reply to his dear fans and crowd: "Wow! This is really something, isn't it!"

Friends praise longtime educator

By MAUDE REID
MCN Special Writer

Friends and educators turned out for a lively retirement party honoring Mary Washington, who has retired from the Inkster Public Schools.

The party was staged on Sept. 11 at the Floyd B. Simmons Multipurpose Center, 29150 Carlyle Ave.

The affair was sponsored by Mary's husband, Sonny Washington, and close friends Mary Gilkey and Mary Humphrey.

Serving as mistress of ceremonies was Tanya Anthony of Zeta Amicae chapter; Deacon Charles Hamilton also brought greetings, while the Rev. Gerry Hearn offered the invocation and solos were rendered by Kimberly Anthony and Billie Richberg, Amicae

Mary Washington spoke of her future plans and thanked the audience for coming and helping her mark a milestone in her life.

member.

The room was filled with well-wishers, and the honoree's family members were introduced by her brother.

Over the years Mary Washington taught at the former Carver School, the Baylor-Woodson Elementary Complex and retired in June of this year to pursue happiness and other interests.

Tributes poured in and were also expressed by Mary

Humphrey, Amicae President; Patsy Herbert, former principal; Thomas Calloway, Billie Richberg, Deborah Wilson, Selenia Robinson of Zeta Phi Beta Sorority and Floyd B. Simmons, executive director of Inkster Housing.

The Rev. John Hearn, pastor of the People's Community Church offered the Benediction.

Mary Washington spoke of her future plans and thanked the audience for coming and helping her mark a milestone in her life.

Retirement party committee members included Mary Humphrey, Ruth Elliot, Tanya Anthony, Deborah Wilson, Meian Dixon, Varboore Spencer and Billie Richberg.

Other members of the committee included Mary Gilkey, Sonny Washington, Sharlisa Colston and William Simpson.

The Women's Ministry of Inkster Springhill Missionary Baptist Church will celebrate Women's Day with a series of programs.

The programs will begin at 10 a.m. on Saturday, Sept. 25 with a Mother-Daughter Brunch and Fashion Show at the church facility, located at 3655 Springhill.

The general theme for the workshop is "A New Beginning: Women Empowered by Christ To Heal the Universe." (I John 3:23).

And, at 11 a.m. on Sunday, Sept. 26, the keynote speaker will be A. J. Jemison, General Manager of Fairlane Town Center and a member of the St. John C.M.E. Church of Detroit.

Dinner will be promptly served to all after the morning services.

The activities will end with

Dinner will be promptly served to all after the morning services.

a musical concert at 5 p.m. at the church.

The public is invited and Michele Nelms serves as program chair.

The Rev. Oscar R. Carter is pastor at Springhill.

In other local news, the Galactic Entertainment Group sponsored a Prayer Breakfast at Annapolis Park recently to kick off Beverly Jordan's campaign to win a city council seat.

Sponsors of the event included Gloria Smith, chairperson; Ernestine Fowler-Moon, and Addie Faulk, who serve on the committee.

The capable mistress of ceremonies was Gwen Traylor. The gathering was welcomed by Minister Terrance McClain of Annapolis Park Church of Christ and invocation was given by Darryl Eason.

Special prayers were offered by Gloria Smith, Ernestine Fowler-Moon and the Rev. Olin Jordan of Fellowship Church of God.

Larry Anderson, Leonard Mingo and Brother Terrance McClain also offered prayers.

Songs were rendered by Joel Rush, Larry Anderson, Darryl McGregor, Minister McClain who also pronounced the Benediction.

Before the closing of the breakfast ceremony, candidate Jordan thanked all those in attendance.

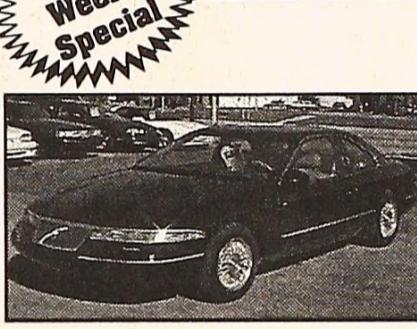

She briefly spoke of her plans for the youth of the city, and also for all the citizens of the city of Inkster. She stressed that her platform was based on the revitalization of Inkster.

Family Room provides Haven from Hurricane

By KAREN MEIER
MCN Special Writer

Hi friends! Can you believe it - the summer's really over? All ready! It went by so fast, this last summer of the century. The last one of the millennium. I sure hope you had lots of fun. We had a blast. And Labor Day weekend? Hope you enjoyed yourself for that too. It was hot in our neck of the woods; it felt just like summer. Hot and humid and cicadas buzzing and the children all playing and laughing and drinking Kool-Aid. It was perfect.

So, anyway, it's good to be back here in the "Family Room" again. After taking the whole summer off from writing the "Family Room," I'm feeling a little wobbly. I mean I took the whole summer off from writing -- not just the "Family Room," but most everything. Except for lists -- grocery lists, to-do lists -- you know that sort of thing.

But you know, writing is a little bit like bike riding; you never really forgot how. Maybe

after a long time of not doing it you're a little wobbly and it feels sort of weird, but it doesn't take long and it's okay again.

So have I got summer stories for you. We had lots of adventures and triumphs and chaos and even a bit of good old-fashioned summer calm watching the clouds turn into farm animals and sea creatures. Speaking of sea creatures, we went to the sea for our summer vacation this year. It was in the middle of July when we went to the Atlantic Ocean. And guess what? We went to North Carolina, the Outer Banks, just like three years ago.

Remember three years ago? I told you about that, going to the Outer Banks, Cape Hatteras on Hatteras Island on the Atlantic Ocean. And remember now Hurricane Bertha visited the Carolina coast and chased us and everyone else away? We were all ordered to leave the island and head to the north, the mainland, even though we were only two days into our seven day stay. Re-

Remember three years ago? I told you about that, going to the Outer Banks, Cape Hatteras on Hatteras Island on the Atlantic Ocean.

member that?

Well, after all that unplanned and crazy adventure of summer '96, we decided it could only happen once in a lifetime, so we headed out again, three years later and kept our fingers crossed. AND It Worked!!! We had the best time!

And the best weather!!!

Our adventures on Cape Hatteras were much tamer than three years ago. I'm not even sure they could be classified as "adventures." I think a whole lot more adrenaline has to be involved when something is an "adventure." But don't get the wrong idea, I mean it wasn't adventure-deficient

Karen Meier

like watching grass grow or defrosting the freezer or matching socks.

It was fun! Fishing for Spanish Mackerel on the ocean, watching beautiful sunrises over the ocean and beautiful sunsets over Pamlico Sound, and then there was that one long, thin beach snake on our front porch, and the famous Cape Hatteras Lighthouse (the tallest in the US) just a stone's throw away which had just finished its 3,000 foot journey to safer, more stable ground with all its hydraulic lifts and dials and *Today Show* crew on hand while we were there, and the daily jumping in huge waves, collecting the most awesome

shells, learning about jellyfish out of necessity and one star spangled night celebrating summer by the sea with sparklers as the ocean waves rolled in.

We had a great time. It was certainly not the high adventure of Hurricane Bertha we experienced three years ago, but that's okay. Y'know, this past week I couldn't help but cringe and be sad when I saw how Hurricane Dennis hit the Carolina coast and then stalled right over the Outer Banks and cut off Hatteras and Ocracoke Islands from every-

thing what with their roads washing out and the horrible winds and the unrelenting rains.

The last report I heard the storms had moved off. Well, good. Stay away you nasty hurricanes. I think all of us could do less with your "high adventure" type lifestyle. I think we all could use some puffy cloud watching shell collecting, jellyfish counting, sunset watching, and, yes, I can't believe I'm saying this, even a bit of sock matching.

Summer calm - we all need that. I hope you had some.

'99 Crop Walk slated Oct. 3 in Belleville-Romulus area

By AL POST
MCN Staff Writer

The 1999 Belleville-Romulus Crop Walk slated for Oct. 3 will be under the direction of new co-coordinators Hanna Anthony and Ruth Kessel.

A goal of \$30,000 has been set for the walk.

Anthony, who has worked with Father John Hagan for the past two years, is a member of Trinity Episcopal Church of Belleville.

Kessel, who will serve her first year as co-coordinator, is a member of St. Anthony's Church of Belleville.

Walkers are asked to check with their individual church offices for registration forms, so that friends and family members will be able to pledge for the anti-hunger campaign prior to the Oct. 3 walk.

The final walk registration will take place outside the Community United Methodist Church of Romulus (across from Romulus Police Headquarters) at 1:15 p.m. Oct. 3.

It will conclude at the Trinity Episcopal Church in Belleville.

Last year (for the second time) the crowd of 387 walkers was led by Stephanie Smith of Belleville. The representatives from nine different churches raised \$29,000.

One fourth of the money col-

lected always remains in the Belleville-Romulus community to aid families with their hunger problems.

Checks later will be presented to the Belleville Emergency Food Closet, St. Vincent de Paul Society of Belleville, The Food Pantry at the Belleville Church of God and The Helping Hand Thrift Store of Romulus.

The remainder of the funds will be used both nationally and world-wide for similar hunger problems.

"It's heartwarming to see so many people in our communities come together for such a worthy cause," said Kessel.

Last year there were 145 Crop Walks held in Michigan, with the local Crop Walk being the 15th largest in terms of money raised.

Anthony praised current and past participants by saying "it takes commitment and hard work on the part of the nine area churches and their memberships to make this walk a success. Their efforts are greatly appreciated."

Once again members of the Van Buren and Romulus Police Departments will be in attendance to keep the walk safe.

In addition, Anthony said "walk marshalls" will be posted on every corner and "pick-up" drivers will be cruising the walk area in case any walkers become

fatigued or blistered.

A special "golden mile" also will be marked off for those, who cannot walk the entire 6.2 miles.

At the end of the walk, participants will be treated to applause and refreshments at the Trinity Episcopal Church.

Another group of volunteers - Boy Scout Troop 231 - will assist at the refreshment area and will do the clean-up afterwards.

Barb Fairman, veteran refreshment coordinator, said "they're a special group of kids, who are sincere about their desire to help others. Some of them even take part in the walk."

The participating churches also include: the Belleville Church of God, the Belleville Presbyterian Church, Faith United Methodist Church of Denton, the Belleville First United Methodist Church, Mount Hermon Missionary Baptist Church of Sumpter Township and Sumpter Community Church of God.

Wayne youth will 'sleep over' outside

By AL POST
MCN Staff Writer

Young Christians, who are members of the **Wayne Wesleyan Church**, will conduct a 30-hour famine demonstration by sleeping in cardboard boxes outside the church on Sept. 17-18.

Youth Pastor Scott McNett said the members of the youth program - known as the Jeremiah Ministry - will be representing famine victims in Honduras and will be collecting donations for those in need there.

Norwegian organist Karstein Askeland will present a concert at 7:30 p.m. Sept. 28 at the **Cherry Hill Presbyterian Church** featuring classic music written by Bach, as well as contemporary music by Norwegian native Ketil Hvoslef.

Also in attendance will be members of the American Guild

Prince of Peace church to mark 50th anniversary

By AL POST
MCN Staff Writer

The Prince of Peace Evangelical Lutheran Church of Westland will make its 50th anniversary on Sept. 26, with Bishop Robert Rimbio serving as the guest speaker at 10:30 a.m.

The Prince of Peace church began as a mission congregation of the American Lutheran Church and held its first service at the Wayne High School auditorium with 57 persons in attendance.

Later services were switched to the basement of the Hearthstone Inn at Michigan Avenue and Sophia.

Still later the services were conducted at the American Legion Hall on Wayne Road.

Pastor Lester Heins was installed on Sept. 26, 1949 and a meeting was held to adopt a con-

sitution and church name.

A total of 123 charter members were listed on the church rolls at that time and the first formal church building was dedicated on Nov. 25, 1951.

Nine years later upon studying the church congregation's future needs, the church purchased a 10-acre site on Palmer Road.

On Sept. 26, 1971, which also

was the church's 22nd anniversary, ground was broken for the current church facility and it was dedicated almost a year later on Sept. 10, 1972.

Other pastors have included Carl W. Beyer, beginning in 1953; Robert Brown, 1960; James D. Beckham, 1967; Larry Rorem, 1978; and current Pastor David Bonde in 1990.

Children's Sabbath comes to Belleville

A theme of helping children to learn and succeed will be stressed next month, as the Rev. Sally Boelter kicks off a national Children's Sabbath program at the Trinity Episcopal Church of Belleville.

The program will be conducted across the U.S. on Oct. 15, 16 and 17 under the sponsorship of Children's Defense Fund. Also supporting the effort nationally will be the Catholic Charities U.S.A., the National Council of Churches of Christ USA, the Union of American Hebrew Congregations and 200 other such re-

ligious organizations.

This year's program will concentrate on preparing children to flourish and succeed through early learning experiences at home and school, Boelter said.

She said "every day we feel a sense of crisis about our kids - their health and safety, their role models, peer violence, drug use, sex and peer pressure."

Boelter added "We want to take a positive approach, showing what adults can do to strengthen our children, and how much children have to offer adults."

With little dazzle, Rockets soar to 3rd victory

Moshimer, Rocks still seek their first win

By TOM MOORADIAN
MCN Staff Writer

When is the last time that Plymouth-Salem and coach Tom Moshimer have lost three in football?

That question sent a small cadre of local high school football historians to the record books, and none has yet returned with a qualified answer.

Probably due to the fact that in the past four decades, during Moshimer's watch, at least, it hasn't happened, that is, until this year.

After Friday night's 20-14 setback at the hands of Western Lakes, Lakes Division opponent, Farmington, the Rocks find themselves in a struggle to climb out of an 0-3 hole, a hole that they have never been in before the '99 campaign.

And it could even get worse.

Plymouth-Salem will travel to Livonia Stevenson Friday night to face the Spartans who have a spotless 3-0 record.

Stevenson and Westland John Glenn, also 3-0 on the season, share the Lakes Division lead.

"I don't know when, if ever, we have gotten off to a worst start," noted Moshimer, who is the dean of the area football coaches. "I believe we are too good a team to be let down like this."

"But, then, when you look at what we have played these past weeks, I guess it's understandable."

Salem started the season against Port Huron Northern, then took on Walled Lake Western, a team ranked among the top five in Michigan before losing to Farmington on the home turf Friday night.

"I honestly thought we could have beaten Farmington," Moshimer offered later.

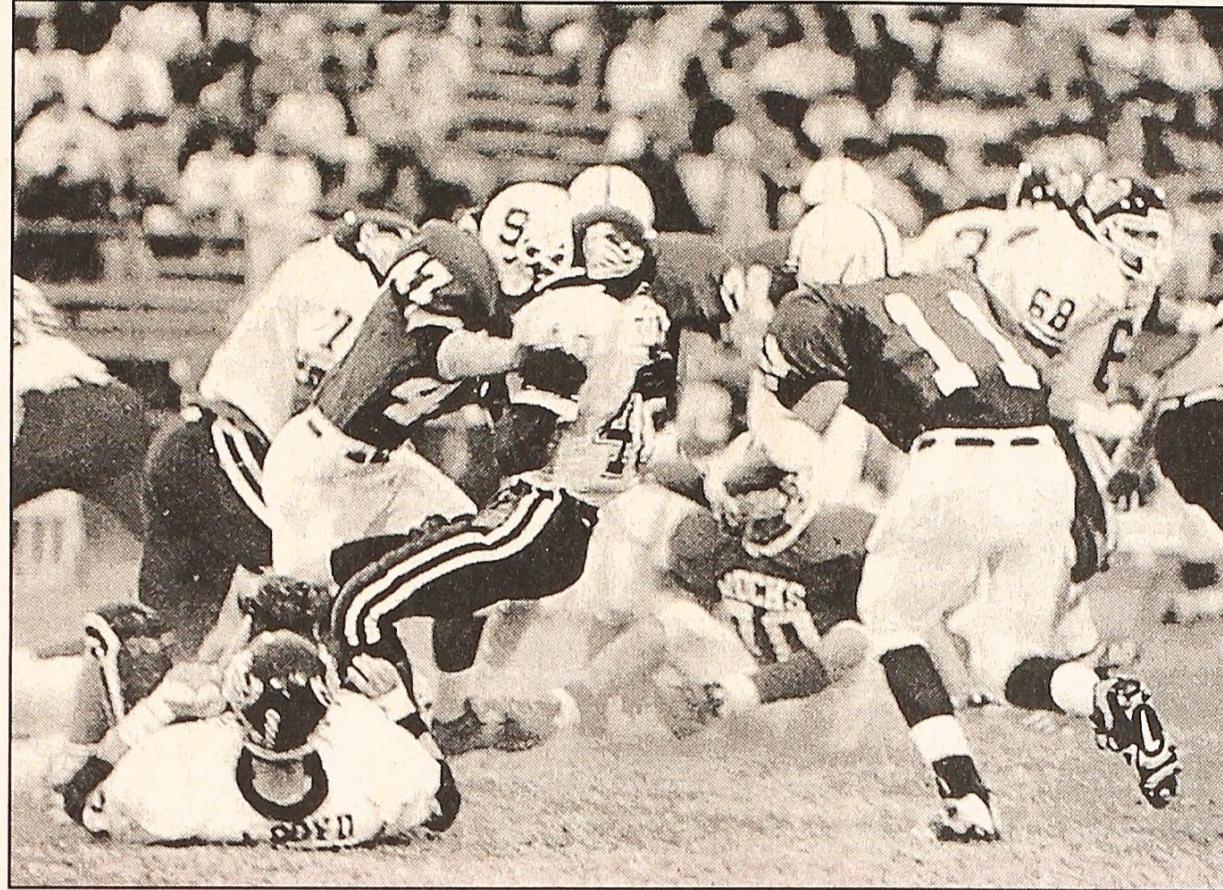

But Farmington successfully protected a 17-7 halftime lead, though the Rocks made an attempt at a comeback when they surprised their visitors with an onside kick, scooped up by Andy Kocoloski.

Kocoloski advanced the ball to the Farmington eight-yard line and within reach of tying the score.

That hope turned to despair, however, when the officials ruled that Kocoloski couldn't advance the ball, and Salem returned to the 45 yard line where play resumed.

On the very first play from scrimmage in that crucial series, quarterback Matt Fair tossed an interception, which erased the

Plymouth-Salem senior linebacker Jason Lukasik (47) brushes aside a couple of Farmington linemen to get at the ballcarrier in Salem's unsuccessful bid to snap its losing streak. Salem lost its third straight and will travel to Livonia Stevenson where the Spartans hope to extend their three-game winning streak Friday night. Photo by Aaron Ortiz

After decades of frustration, are Vikings bound for glory?

By TOM MOORADIAN
MCN Staff Writer

Does coach Mark Townsend and the Inkster Vikings have a date with destiny?

With their incredible 26-0 shutout of Willow Run Friday night, and their third consecutive win on the gridiron this season, Inkster football fans believe so.

To put the three victories into perspective, it is the first time in this decade that Inkster has strung together three consecutive wins.

"We're proud of the kids and the fans who have supported the program," said Townsend, who is quick to remind listeners that the season is still very young.

"Now that we have won three, those other teams will be gunning for us, so we can't afford a letdown."

Next for the Vikings is Dearborn Heights Crestwood, a team that snapped its two-game losing streak with a big 34-0 victory over crosstown rival, Annapolis.

Townsend pointed out that Crestwood is a team that "will play from whistle to whistle, and will not quit."

"They are an excellent running team with a quarterback that can operate effectively from the option. We better be ready."

Inkster will entertain the Chargers who are due in town at 4 p.m. on Friday.

And the Vikings, especially their defense, was ready for Willow Run which was coming off of

"Now that we have won three, those other teams will be gunning for us, so we can't afford a letdown."

an impressive win over Robichaud the week before.

Wasting little time, Inkster erupted for two touchdowns in the opening quarter, then coasted to an unexpected easy 26-0 victory over the Flyers in the Mega Conference, Gold Division game.

The Vikings got on the board midway in the first period when quarterback Michael Hunter flipped a short pass to Jamal Poole who took the pass and raced 30-yards with it into the Flyers' end zone.

The Inkster score capped an 80-yard sustained drive with 5:46 left in the initial quarter.

Lucius Hawkins' first of two extra point attempts were blocked.

In the closing seconds of the opening period, Inkster struck again. This time the Vikings got on the scoreboard thanks to Michael Gray's superlative 65-yard off tackle run.

Both teams then turned to their defenses the rest of the half, and when the offenses revved up again, it was Inkster that took the initiative.

The Vikings scored an insur-

ance TD on Hawkins' 15-yard up-the-middle run. The score was set up by Alphonso Clark, who picked off a Willow Run pass.

Inkster padded its cushion in the fourth quarter when Hawkins and Hunter combined on a 48-yard pass-run TD play.

Gray then scored the two-point conversion.

Gray led the Viking rushers with 154 yards on 11 tries and one touchdown. Poole counted three catches for 101 yards and also scored while Hawkins wound up with 101 yards on 11 carries and two catches.

Hunter connected on seven of 156 passes for an additional 85 yards and two touchdowns.

Townsend commended Eric Robinson, his defensive coordinator, for an exceptional job of preparing the team for a spirited Willow Run team.

"The defense this week was exceptional," Townsend reiterated.

Among those who led the assault included William Morris, an inside linebacker who counted 16 tackles, of which 10 were solos and he had one sack; Anthony Wimberly, also a linebacker, who had a total of 11 tackles and seven assists.

Clark, at safety, chipped in with three solos and a pair of interceptions and Gray, from his cornerback slot, also grabbed two interceptions and had three solos.

Poole and Hawkins also stood out on defense.

Jones keeps John Glenn on track against North

By TOM MOORADIAN
MCN Staff Writer

It was atypical Thursday evening, instead of a Friday night game, but with Eric Jones keeping the Rockets on target, the senior running back made sure nothing out of the ordinary occurred.

Westland John Glenn crushed North Farmington, 31-14, for its third consecutive football, but first Western Lakes, Lakes Division, victory of the season.

Coach Chuck Gordon and the Rockets played on Thursday last week in order for North's student population, which has a large enrollment of Jewish students, could celebrate Rosh Hashanah, a high Jewish holiday, which began on the eve of Friday.

It took Glenn and quarterback Randy Sinnott five plays to get on the scoreboard in their first series of plays as the Rockets breezed 60-yards with Jones moving the ball to the three after breaking away for a 31-yarder, where fullback Jake Tharp scored on the fifth play of the series.

Jeremy Catarino, who had a near record 45-yard field goal in the third quarter, soccer-kicked the first of four point-afters to lift the Rockets to a 7-0 lead.

Any thoughts harbored by North for an upset on the eve of the holiday was quickly put to rest by the Rockets which exploded for three second period touchdowns that put the visitors up 28-0 at halftime.

Jones scored his first of two TDs early in the second quarter,

again on a three-yarder. Then, after Glenn recovered a North Farmington fumble, Sinnott went up the middle from 11-yards out for the second TD of the quarter, the third of the game.

With 2:12 left in the half, Glenn struck again. This time fullback Ryan Rattray scored from the four and that, for all purposes, signalled a mass exit of Rocket regulars to the bench in favor of the back-up squad.

But not before Catarino boomed his 45 yarder, which went on the scoreboard at 3:51 in the third quarter. Incidentally, the record, according to officials in the Glenn athletic department, is 46 yards.

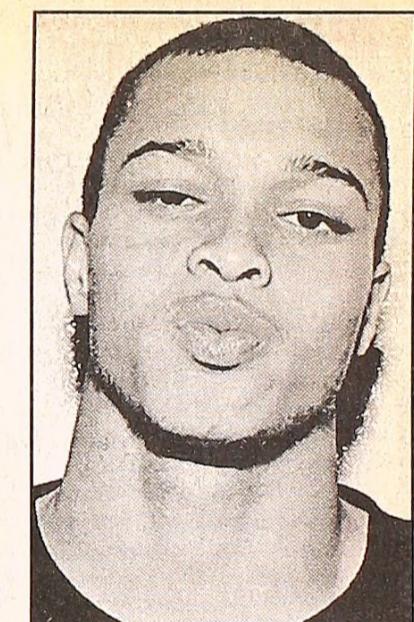

Jones continued his stellar performance with another 100-plus evening. Against North, the senior tailback racked up 120-yards on 17 carries. His two TDs against North brought his season total to six.

Nick Paddock also rushed for 57 yards on six tries, but Sinnott, though he was in command of the ground game, found it difficult in the air where he failed to complete pass a pass in seven attempts.

Chad Sansom, a defensive back, and Paddock, also playing in the secondary, each had one interception.

By the way, for the record, it was the first time these two schools played under the lights at North.

Glenn travels to Walled Lake Central Friday night in search of its fourth victory.

Lorenzo Guess

Guess who scored his first MSU touchdown?

By TOM MOORADIAN
MCN Staff Writer

Lorenzo Guess, former Wayne Memorial basketball and football star, on Saturday scored his first touchdown as a member of the Michigan State University team in a game against Eastern Michigan.

A free safety, Guess grabbed a deflected pass and returned the ball untouched by the EMU defense 39 yards into the end zone.

The ex-Wayne hoop star helped the Spartans post a 51-7 victory over their non-conference opponent.

Asked by the media afterward how it felt getting his first collegiate touchdown, Guess didn't hesitate to say it felt great, and he pulled something out of his basketball career to explain the emotion.

Guess said that soaring his first TD was like...His scoring on a

dunk. Now the simile may mean little, if anything, to most who have not competed in basketball, but for those who can fly to and over the basketball rim, shove the ball into the net after the takeoff on the hardwood, it must surely be something.

Anyway, congratulations are in order.

Rampaging Romulus awaits fearless Robichaud

Woodson's Eagles look for 4th win

By TOM MOORADIAN
MCN Staff Writer

With their third victory stashed safely away, coach Mark Woodson and the Romulus Eagles await an enigmatic Dearborn Heights Robichaud, a Mega Conference crossover football opponent.

Woodson, a former Robichaud football star, says he expects Robichaud "to come in here and make it tough on us."

"And you can be sure that our secondary will be tested," Woodson continued. "Medlock is a former QB and they (quarterbacks) like to put the ball in the air."

Woodson was referring to first-year Robichaud coach, Mark Medlock, who took over the program at the Dearborn Heights high school two weeks before the season's opener.

Romulus will place a perfect 3-

Romulus' defense, led by its linebackers Charles Thompson and Alan Brohl, has been awesome in the Eagles' first three games. Above, Thompson brings down running back Kwame Hampton in the season opener. Photo by Aaron Ortiz.

Controversial call dooms Bulldogs, 19-8

By TOM MOORADIAN
MCN Staff Writer

The life of a coach is not an easy one, and sometimes, some officials and officiating can compound the problem.

Just ask first-year Robichaud head football coach Mark Medlock, who apparently ran into that problem Friday when he watched helplessly as a decisive touchdown was disallowed in a 19-8 loss Friday to River Rouge.

"We made a lot of mental errors and I am not looking for a scapegoat for our loss, but after looking at the film of our game with Rouge over and over, I just can't understand how they (officials) ruled on this one," Medlock said after the Bulldogs' second loss in three starts.

Officials decided that Robichaud quarterback Dave Jarrett

was beyond the line of scrimmage when he tossed a TD pass, which was later disallowed.

"Our film doesn't support that."

The controversial question involved Jarrett, who fired a 15-yard pass to Marcus Johnson in the end zone for the apparent TD.

But official flagged the play, saying that Jarrett had ventured beyond the line of scrimmage before unleashing the ball, an infraction, so the TD was nullified.

Medlock said he believes that the call "turned the momentum around."

Robichaud managed to go ahead 8-7 after Rouge scored in their first series of plays of the first period. Midway in the second quarter, Jarrett teamed up with Chris Larkins on a four-yard strike and a Jarrett handoff to

See **MEDLOCK**, page C-3

See **ROMULUS**, page C-3

Leading the pack are Garrett McCraight, (above, at right) and Romulus' James Hollis, ranked among the best in their divisions in the Motorcross Racing Association rankings.

Young riders are riding high

They're not 10 yet, but three local youngsters are already recognized as among the best riders on the Motorcross Racing Association's circuit.

Garrett McCraight, who is six-years-old, and races in the 4 to 6 P.W. 50 Division, and James Hollis, also a six-year-old, who finished among the leaders in the Best in the Midwest" competitions, along with Matt Franklin, a nine-year-old, has exceptional riding talents, says Bob McCraight,

Garrett's father.

"These young riders recently competed in the 'Stars of Tomorrow' tournament," says the senior McCraight. "and finished among the leaders. We're very proud of these kids and thought they deserved recognition for their achievements."

Garrett is presently ranked seventh out of 62 other riders in his division and is looking forward to future challenges on his bike.

"I like to ride," he says

with confidence and a smile. "And I like to win."

Hollis, a pupil at Romulus' Barth Elementary School, races in the "5 to 11 P.W. 80 Division" and already boasts three victories. He finished third at the Best of the Midwest regional tournament in Delta, Ohio.

Franklin, at 9, the oldest of the young drivers, also races in the "5-11 P.W. 80 Division" and thus far has five victories to his credit and is ranked second in a field of 15 riders.

Injury-riddled Wayne takes on winless Dearborn High

By TOM MOORADIAN
MCN Staff Writer

Involved in a physical game with Monroe, which they lost, Wayne Memorial and coach Floyd Carter will regroup their troops to take on a winless Dearborn Friday night.

Carter says that several key players are hurting after the Zebras' 27-11 loss to Mega Conference, Red Division leader, Monroe.

Monroe dropped their first game of the season, 34-6, to Saginaw, and bounced back to beat Lincoln Park, 26-0, in its Mega Conference opener.

Both Wayne and Dearborn will head into the Friday night's game looking for their first win, and Carter is the first to admit that "this one isn't going to be easy."

"Dearborn may not be the team it was a year ago when they won a share of the title," said the veteran Wayne coach, "but we don't have the numbers to fill the ranks of our injured, and it's going to be a rough year."

"This is going to be another tough game for us."

Wayne may be without the services of senior running back Kwame Hampton, who suffered an ankle injury in the

Monroe game. They also have defensive back Jason Gibson, and Jermaine Garner, a tailback on the doubtful starting list.

"They beat us up pretty good," said Carter referring to Monroe.

Monroe managed to put together a 10-play drive that ended at 7:57 of the first quarter with Kent Brinson scoring from the one. Mitch Patel chipped in his first of four extra points. The Trojans eluded disaster when punter Don Setzler scooped up a fumbled snap on a fourth and eight situation and hustled the ball nine yards for a first down. That set them in motion for their initial TD.

Wayne answered in the same period with Willie Perryman's 37-yard field goal that culminated a 54-yard, five play drive sparked by Hampton's superb 43-yard around end

run.

Midway in the second quarter, with 6:14 on the clock, Monroe got some breathing room as Chad Mosher scored on a two-yard run and Patel again successfully booted the extra point. The Trojans' second TD capped an incredible 91-yard sustained drive that used up nine plays. A third down pass from Andrew Lieto to receiver Jamey Buckner that covered 42 yards triggered the drive.

Monroe came right back before the half and scored with no time on the clock on Lieto's 16-yard touchdown run, set up by Tim Hasley's fumble recovery at the 46.

The title-bound Trojans came back in the opening minute of the third quarter and scored at 10:39 as running back Antonine Ford raced 75 yards on the first play from

Farmington's Dave Addison runs up against Plymouth-Salem linebacker Jacob Scherbay (94) at the line of scrimmage during their Western Lakes Conference, Lakes Division meeting Friday night and is stopped in his tracks. But Farmington managed to hang on to a big victory, handing the Rocks their third loss in as many starts. Salem will attempt to snap out of its three-game losing streak Friday at Livonia Stevenson. Photo by Aaron Ortiz

Moshimer

Continued from page C-1

threat. Salem did score in the second quarter when Fair engineered a 62-yard drive that ended with senior running back Archie Kinney's two-yard touchdown run. Salem's only other score came off of a Fair six-yard pass to Gabe Coble. Fair converted on both point-afters.

The Rocks started the game in the hole when they gave up the ball deep in their territory on a turnover created by a bad snap from center. Farmington capitalized on the miscue and scored. They never relinquished the lead to their hosts.

Fair went to the air 24 times and found receivers 12 times for a total of 181 yards. Farmington's defense, however, kept the Rocks' ground game in check - Jason Lukasik rushed for 23 yards and Coble picked up 35 while Fair finished with 37 yards.

But Lukasik, a senior linebacker, got the job done on defense.

Moshimer praised the play of Farmington's Grant Webber, who the Salem coach says is "one of the better overall players in the conference this year."

Hartland Glenn cools WSGA women golfers

By TOM MOORADIAN
MCN Staff Writer

The cold front that passed this way and struck Hartland Glenn Golf Course didn't help the local golfers in the Women's Suburban Golf Association league.

Wayne's Pat Henke toured the 18-hole course with a 91, three-strokes behind Second Flight

Over in the First Flight, atop of

the pack was Karen Huebner, who carded an 81 to lead the flight. Sandy Rivers's 88 was second best for the flight.

Dolly Vettese checked into the clubhouse with a 67, the best in the Low Net, First Flight. Two strokes behind Vettese was Jane Wright.

offense and defense," said Woodson who added that he was specially pleased with the game because "we only had two penalties, as compared to nine in the Wayne game and seven against Taylor Kennedy."

Thompson finished with 112 yards on nine attempts and four touchdowns, while Carter amassed 49 yards on six tries and had one TD.

Moomaw connected on four of his eight passes for 123 of the total 364 Romulus yards.

Romulus

Continued from page C-1

leading the way. Thompson scored four consecutive touchdowns to put the game out of reach.

Early in the second quarter, quarterback David Moomaw put together a 58-yard sustained drive that culminated with fullback Thompson's one-yard TD plunge.

Romulus failed to convert, but had a 9-0 lead.

Thompson came right back and scored the next three touchdowns.

Anderson fumbled immediately after the ensuing kickoff and the Eagles took over deep in Southgate territory. A four-yard up-the-middle run by Thompson turned it into a 15-0 ballgame, and Foster's PAT made it 16-0 with the successful PAT.

Thompson also got the Eagles on the scoreboard with 1:53 remaining in the half, again on a four-yard run. Foster's kick was good.

Wayne

Continued from page C-1

scrimmage into the Wayne end zone.

Patel made it a 27-3 game. Wayne mustered a fourth-quarter drive and scored with 45 seconds left thanks to Allen Fry's one-yard lunge. Jermaine Garner chipped in the two-point conversion.

The key to Wayne's only TD of the game was a 17-yard pass completion from Matt Patterson to Garner to the one-yard

Running back Mark Carter accounted for the Eagles' final TD. He tallied from six-yards out with 3:30 left.

line after two successive TD plays were nullified because of penalties.

Wayne will host the 7 p.m. game with Dearborn, one of the defending tri-champs of the Mega Conference, Red Division.

Medlock

Continued from page C-1

fullback Darius Robinson who dashed up the middle into the Rouge end zone accounted for the two-point conversion that gave the visitors the lead.

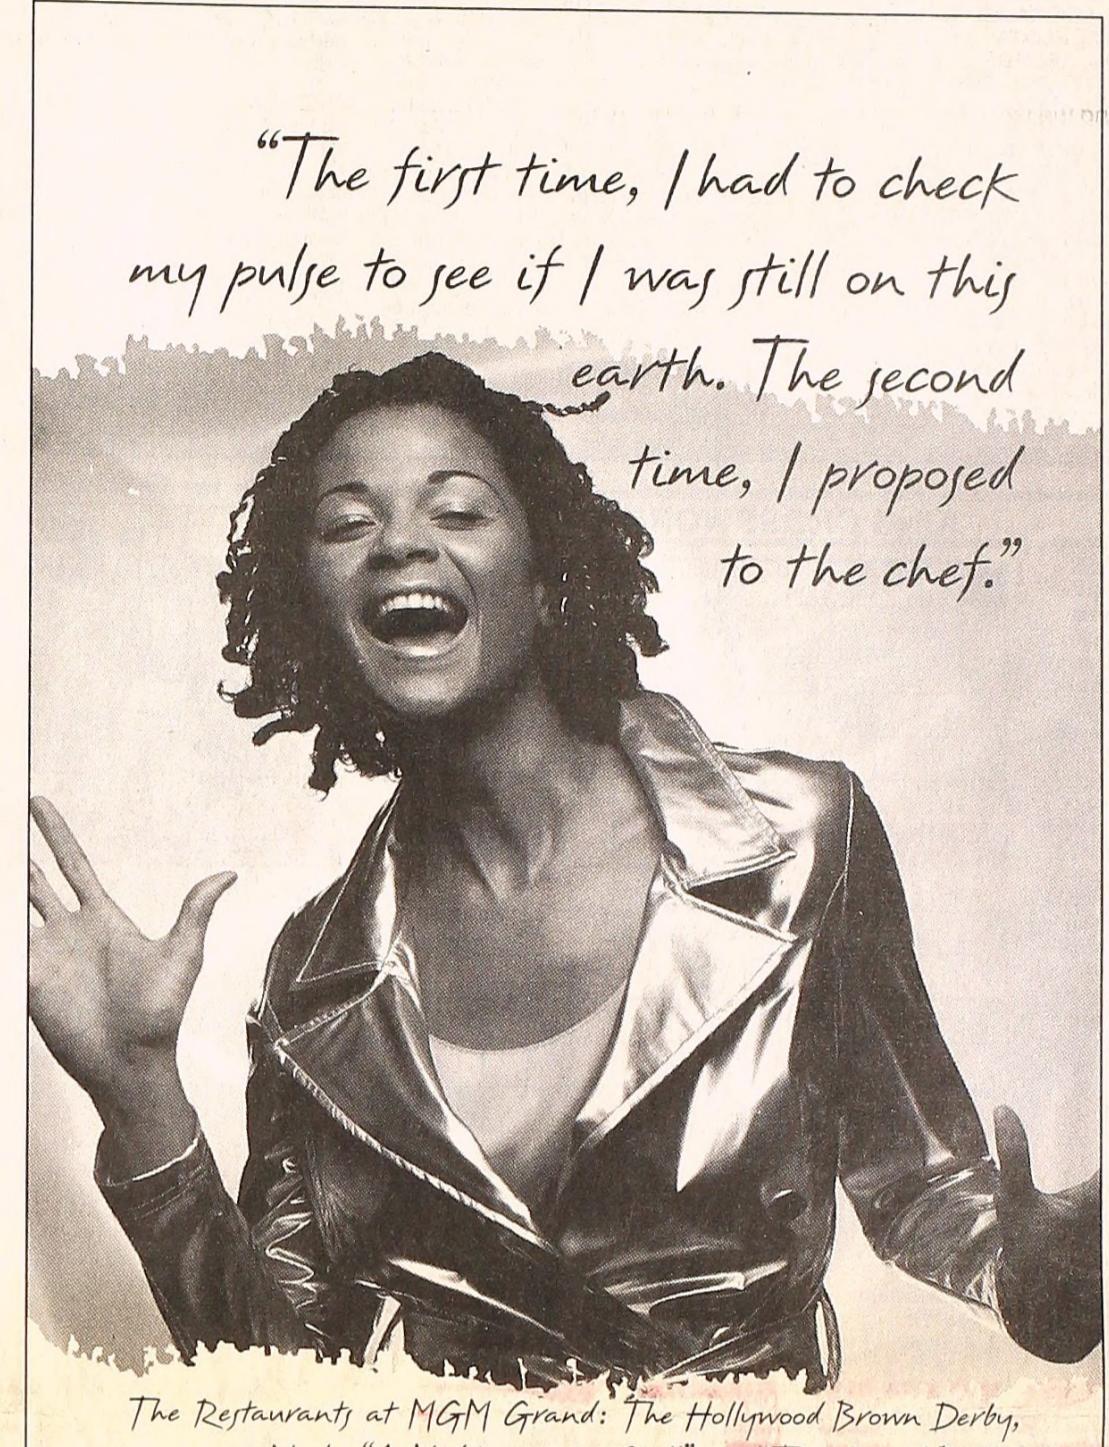

Rouge came back with two second half-scores that gave the Panthers the lead for good.

Robichaud went to the air 17 times and Jarrett found receivers on seven occasions for a total of 96 yards. Larkins and Johnson

were Jarrett's premier receivers. Medlock also commended the "Front 4" on defense, namely, sophomore middle linebacker Johnson, and inside LB Chad Mitchell. He also liked the way strong safety Darius Robinson

and free safety Wendell Winn patrolled the secondary.

Of the pending Friday night game against undefeated Romulus, Medlock would only say, "they are awesome. But, tell them, we will show up."

"The first time, I had to check my pulse to see if I was still on this earth. The second time, I proposed to the chef."

BRADY, PAUL
Age 60 of Taylor, passed away September 4, 1999. He is survived by his wife Bonnie. Services were held at David C. Brown Funeral Home September 8, 1999.

CARTER, RUTH
Age 92 of Belleville, passed away September 10, 1999. She is survived by her son Warren, 9 grandchildren, 12 great grandchildren and 2 great great grandchildren. Services were held at David C. Brown Funeral Home September 14th.

DU DONIS, EDWARD
Age 81 of Romulus, passed away September 3, 1999. He is survived by his wife Gladys, 3 sons and 2 daughters. Services were held at Uht Funeral Home September 7th.

EETS, KRISTOPHER
Age 5 of Belleville, passed away Friday September 3, 1999. Kristopher and his family went to Disney World in Florida courtesy of the Make-A-Wish Foundation when his health began to decline. He courageously battled leukemia. He was the dear son of Dean and Stephanie Deets, and brother of Jacob Lee Calbreath-Deets. Kristopher attended Webster Elementary in Livonia which he enjoyed very much. His Funeral Services were held September 7th at David C. Brown Funeral Home.

FRANKLIN, HARVEY
Age 72 of Inkster, passed away August 11, 1999. He is survived by his wife Hel-

en, and daughter Carla. Services were held at Jordon Temple in Columbus, OH August 19.

GNAS, IRENE
Age 74 of Howell, passed away September 5, 1999. She is survived by sons William, Daniel, and Frank. Services were held Sept. 8th at Crane Funeral Home in Romulus.

HADYNIK, ESTER
Age 67 of Romulus, passed away September 10, 1999. She is survived by husband John, sons John, and Scott, also daughters Linda, and Lorie. Services were held September 14th at Crane Funeral Home.

JACQUES, LINDA
Age 51 of Van Buren Township, passed away September 11, 1999. She is survived by daughters Angelina, and Laura, and also her father Lewis. Services were held at St. Anthony Catholic Church Sept. 14th.

JOHNSON, JAMES
Age 69 of Westland, passed away September 11, 1999. He is survived by his wife Enid, sons Steven, Gary, Phillip, and Mark, also daughters Carol, and Debra. Services were held at Uht Funeral Home September 14th.

NELSON, GEROGE
Age 76 of Plymouth, passed away September 7, 1999. He is survived by his sons, William, and James, and also daughter Mary Ann. Services were held at Vermeulen Funeral Home.

NELSON, JULIA
Age 74 of Inkster, passed away August 8, 1999. She leaves a son Frederick, 3 grandchildren, 5 great grandchildren, and many friends. Services were held at Penn Funeral Home August 13, 1999.

PICCOLO, JOHN
Age 83 of Westland, passed away September 6, 1999. He is survived by his wife Carla, four daughters, and two sons. Services were held at Uht Funeral Home, Sept. 8, 1999.

RACE, CHARLOTTE
Age 85 of Westland, passed away September 6, 1999. She is survived by her two sons James, and Robert. Services were held at Vermeulen Funeral Home, Sept. 8, 1999.

ROBERTS, FLORA
Age 85 of Glendale, AZ, passed away September 2, 1999. She is survived by her five children, 10 grandchildren and 6 great grandchildren. Services were held at St. Charles Church of Newport Sept. 7th.

ROBSON, GEORGE
Age 89 of Belleville, passed away September 10, 1999. He is survived by his wife Elsie May of 64 years, son George, and one daughter Sandra. Funeral services were held at David C. Brown Funeral Home September 13, at 11:00am.

SINIFT, MICHAEL
Age 47 of Wayne, passed away September 7, 1999. He is survived by his sons Clyde and David, and also his daughters Selma and Holly. He has many siblings who also predeceased in death. Services were held Sept. 10 at Uht Funeral Home.

SOHNEIDEWIND,
Age 56 of Westland, passed away September 9, 1999. He is survived by his wife Sandra, his father Fred, mother Jessie, and brother Eric. Services were held Sept. 13th at Vermeulen Funeral Home.

SQUIRES, RALF
Age 80 of Northville, passed away September 1, 1999. He is survived by his step-brother Joe and many other relatives. Services were held at St. Anthony Catholic Church Sept. 3rd.

STARKS, DENNIS
Age 36 of Inkster, passed away August 16, 1999. He is survived by his son, Dennis II, his mother Jennie, 4 brothers and 4 sisters. Services were held at Amity Baptist Church, August 21st.

SUTTON, PETER
Age 58 of Romulus, passed away Sept. 8, 1999. He is survived by his sons Robert, Michael, and Walter, and also his daughter Rene. Services were held Sept. 11, at Uht Funeral Home.

UZARSKI, SYLVIA
Age 80 of Westland, passed away September 10, 1999. She is survived by her two sons William, and Joseph, and two daughters Sylvia, and Antionette. Services were held at Vermeulen Funeral Home Sept. 13th.

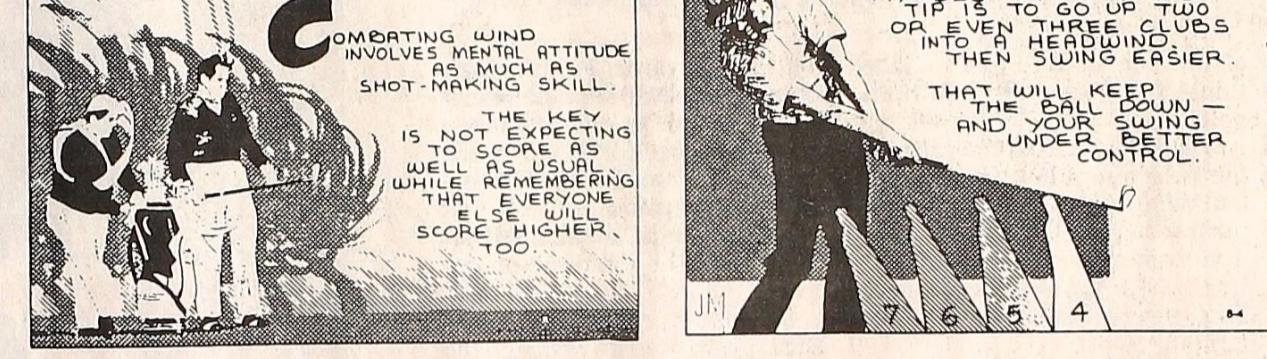

WALTERS, TALMADGE
Age 97 of Inkster, passed away August 13, 1999. He is survived by 3 children, and 3 grandchildren. Services were held August 18th at Smith Chapel Arne Church in Wichita, Kansas.

WERTANEN, STEVEN
Age 29 of Plymouth, passed away September 1, 1999. He is the only child of Jesse and Lenore Wertenan. Services were held at Vermeulen Funeral Home September 4th.

Henry Ford Museum receives \$5 million to improve grounds

Demonstrating his commitment to the arts, Gov. John Engler authorized \$56 million in supplemental funding for arts and cultural institutions in the Metro Detroit area. The bill provides critical infrastructure funding for established cultural institutions, enabling them to continue to entertain and educate both Michigan citizens and Michigan tourists.

The following institutions and programs are receiving support in House Bill 4075 include:

Detroit Institute of Art: \$35 million for renovation and construction. An additional \$5 million will be available in the fiscal year 2000. DIA must come up with a 2-for-1 match for every state dollar.

Detroit Symphony Orchestra: \$10 million in funding for renovation and improvements, including the enlivening of the historic Orchestra Hall as Phase III of the Orchestra Place Project.

Henry Ford Museum: \$5 million in funding for capital improvements at Henry Ford Museum and Greenfield Village.

Detroit Science Center: \$5 million in arts and cultural grants funding for renovation and expansion efforts.

Museum of African American History: \$1 million for renovations necessary to comply with the Americans with Dis-

abilities Act and parking lot expansions.

Not all arts and cultural funding in this bill have been assigned to specific projects. The Department of Management and Budget has been given the responsibility to allocate \$10 million worth of one-time, nonrecurring arts and cultural grants.

"We have some of the most prized collections in the country right here in Michigan, and this funding will help ensure that these treasures are maintained for the enjoyment of art followers throughout the state and region. Art and cultural institutions pay out long-term dividends that go beyond monetary profits," commented Gov. Engler.

Scams against businesses have become much more sophisticated, thanks to the Internet. The computer technology that makes it easier for us to do business also makes it easier for con artists to "do business."

Beware Internet scams

Scams against businesses have become much more sophisticated, thanks to the Internet. The computer technology that makes it easier for us to do business also makes it easier for con artists to "do business."

The Better Business Bureau suggests the best way to avoid being scammed is to educate your staff on how to spot Internet scams and how to avoid them. Here are some red flags to help your business identify potential cyberscams.

Beware of "techno-scam artist" promising to create and post your company's site, for a very low fee but never following through.

Be cautious about downloading unsolicited e-mail. Some attachment files contain a virus that can wreck your hard drive.

Be careful of e-mail messages threatening your company with legal action unless you pay for an overdue account.

In many cases such e-mails request you call an (Caribbean) for further information. If you do, you'll get a recording, and the pay-per-call phone number can cost your company hundreds of dollars.

Be skeptical of offers to list your company's name on CD-ROM, Internet, or fax directories. Before listing your company in these types of directories, verify their claimed circulation/distribution and make sure they exist. Ask for a sample CD-ROM or Fax Directory and call references at other companies using these services.

Website attackers can target your server and change information on your Web page, steal credit card information, enter orders and redirect shipments. There are also browser attackers who send incriminating electronic mail and make it seem as if it is coming from you. Advice? Use a secure server and take proper precautions to protect access to your Web site contents.

To combat these and other types of Internet scams, the BBB suggests you do the following:

*Always collect and check references carefully.

*Take steps to protect your office computers. Always run an anti-virus program to help prevent computer viruses.

*Instruct your staff to carefully evaluate e-mails from businesses they do not recognize, before determining whether to respond.

Building Lasting Relationships Since 1900

Stately Continental is powerful and roomy

By KAREN STRONSKI
MCN Staff Writer

A contemporary rendition of American luxury, the 1999 Lincoln Continental increases its power and enhances its safety reputation with the addition of standard side air bags for the driver and front passenger.

After its moderate facelift in 1998, the Continental gets minor exterior and interior enhancements to distinguish it from last year's model. The two most notable changes are 10-spoke brushed aluminum wheels standard. The Luxury Appearance package, which I had on my test vehicle, is available on the five passenger models with bucket seats, adds wood trim on the steering wheel and shift knob. Also, standard is fog lamps, leather seating surfaces and a sporty looking chrome grille.

Lincoln is down to a single Continental model. A powerful 4.6 liter V8 is standard. The cellular/GPS RESCU information and navigation system continues to be an option. I consider this feature to be well worth the extra price.

The interior of this vehicle offered everything that one would need for comfort and safety. There is plenty of leg and head room in both the front and rear seats. Just about every electronic bell and whistle is just where you

1999 Lincoln Continental

would put it. You never have to take your eyes off the road or your hands off the wheel. Almost everything you need for comfort or speed is on the steering wheel.

This beauty comes equipped with a great sounding stereo system and a compact disc player which is situated in the center console by the cell phone. With just a touch of a button, you can find out your gas mileage per gallon, how far you can go before empty, and you can switch the firmness of your ride. Rode noise in the vehicle was at a minimum. It also has a very smooth ride. It feels as if you are floating above

the road.

The 4-liter DOHC 32 valve V8 engine provides strong acceleration that seems to be happy pulling around a two-ton Continental. This advanced power plant will propel the car from 0 to 60 in just a tick over eight seconds. Not a problem getting in or out of traffic. The looks of this one are very stately and satisfying as well.

When trying to figure out the gas mileage, it was easy all I had to do was push a button, and it gave me miles per gallon on the highway and in the city. This particular model got 20 miles per gallon.

in the city, and otherwise 25, which I found to be good considering the weight of the car. The price of the 1999 Lincoln Continental is \$38,800 base, and \$43,400 as tested.

Basically, this vehicle comes with just about everything one would need standard. The extras are minimal. What you see, is what you get! It is both powerful and roomy. The only drawback

that I could find was that the styling may not appeal to the traditional buyers of the Continental. Other than that, it was a great ride. It may be a little pricey however, it is worth it!

ANNOUNCING BRIARWOOD FORD'S SEMI-ANNUAL \$39.00 SALE

SALINE, MI -- Briarwood Ford, one of Michigan's largest Ford Dealers will host a special indoor used vehicle sales event this Saturday, September 18, 1999 at their Main location five minutes South of the Briarwood Mall at 7070 E. Michigan Avenue (corner of State and Michigan) in Saline. Over 150 used vehicles will be offered at deeply discounted prices -- hundreds below book value -- and as low as \$39 Dollars. This event only happens twice a year, so if you're even thinking about purchasing a used vehicle, don't miss this opportunity.

Owner, Eddie Hall says "this sale is absolutely necessary due to the fact that during recent years new vehicle leasing has exploded. This has resulted in an over abundance of nice, low mileage lease returns and trade-ins acquired nationwide. This is an enormous sales event. "Record sales has left us with a great selection of beautiful used vehicles." Hall further states "we must reduce our inventory to a more tolerable amount. We want to offer these vehicles to our local community so they can experience for themselves our tremendous price reductions." In other words, now is the right time to buy a used vehicle at the absolute lowest prices, including a car for only \$39 Dollars.

Here is how the sale will work! All vehicles will be unlocked at 9:00 a.m. so that the general public can inspect them. Every used vehicle in Briarwood's huge inventory will be clearly marked with drastically reduced prices for this special event. One vehicle will be offered for the unbelievable price of just \$39 dollars. In anticipation of a large demand for the \$39 Dollar vehicle, and to insure fairness to all of our customers, a drawing will be held at 4:00 p.m. to determine the recipient of the \$39 Dollar vehicle. Briarwood Ford will offer these drastically reduced prices until 4:00 p.m. At that time, the sale will be completed and the store will return to normal business procedures.

Over the past 12 years, Briarwood Ford has taken pride in supporting the local community. This is an opportunity for Briarwood to give back to the community. Hall further states "this is a prime opportunity for everyone seeking a quality used car, truck, van or sport utility to obtain the best deals in the State of Michigan". All in all, it is a win-win situation for the customer, community, and dealer. Any and all questions are welcomed. Please call (734) 665-9414, **Briarwood Ford**, 7070 E. Michigan Ave., 5 minutes South of the Briarwood Mall, corner of State and Michigan, Saline, MI 48176. Please join us for this special event. Remember, it only happens twice a year--and only at **Briarwood Ford**!

NOTICE OF THE RESOLUTION OF THE SOUTH HURON VALLEY UTILITY AUTHORITY ADOPTING RULES AND REGULATIONS

NOTICE IS HEREBY PROVIDED PURSUANT TO ACT NO. 233, P.A. 1955, AS AMENDED:

RESOLUTION

A Regular Meeting of the South Huron Valley Utility Authority (the "Authority") was held in the Brownstown Municipal Building, Brownstown, Michigan, on the 17th day of March 1999 at 3:30 PM o'clock in the afternoon.

The meeting was called to order by Chairperson Boller.
Present: Brownstown (Boller), Huron (Glaab), Woodhaven (Mazo), Gibraltar (Denison), South Rockwood (Sterling).
Absent: Flat Rock, Van Buren.

The following Resolution was offered by Member Denison (Gibraltar) and supported by Member Mazo (Woodhaven):

WHEREAS, it is necessary that the South Huron Valley Utility Authority adopt Rules and Regulations for the purpose of establishing permit requirements for connections or alterations to the South Huron Valley Wastewater facilities; to govern the design, alteration and use of stormwater and wastewater facilities connecting directly or indirectly to South Huron Valley Utility Authority facilities; to regulate the discharge of wastewater into public sewers which are part of or tributary to the South Huron Valley Utility Authority facilities; to provide for fees and charges; to authorize inspections; to establish appeal procedures; to provide for administration and enforcement of the rules and regulations; to prohibit certain detrimental conduct; and to establish penalties for violations, and

WHEREAS, the South Huron Valley Utility Authority is authorized to adopt said Resolutions in accordance with Act 233 of P.A. 1955, as amended.

NOW THEREFORE BE IT RESOLVED THAT:

The South Huron Valley Utility Authority does hereby adopt the Rules and Regulations for the operation and control of the Wastewater Treatment facility dated March 9, 1999 which are attached hereto.

BE IT FURTHER RESOLVED that said Rules and Regulations are deemed to be incorporated hereby by reference as though fully set forth herein.

BE IT FURTHER RESOLVED that all previously adopted Rules and Regulations are hereby repealed and rescinded to the extent necessary to give these Rules and Regulations full force and effect.

BE IT FURTHER RESOLVED that this resolution and a copy of the Rules and Regulations be forwarded to the member communities for concurrence.

BE IT FURTHER RESOLVED that upon receipt of concurrence by the member communities, that these Rules and Regulations be published in accordance with the provisions of Act 233 P.A. 1955 as amended, and such other provisions of the law as are applicable thereto.

BE IT FURTHER RESOLVED that these Rules and Regulations shall become effective thirty (30) days after publication.

The foregoing Resolution was declared adopted.

/s/ David Flaten
DAVID FLATEN, Secretary

CERTIFICATION

The undersigned duly qualified and acting Secretary of the South Huron Valley Utility Authority, Wayne County, Michigan hereby certifies that the foregoing is a true and complete copy of a Resolution adopted by the Authority, at a Regular Meeting held on March 17, 1999, the original of which resolution is a part of the board's minutes and further certifies that notice of the meeting was given to the public under the Open Meetings Act, 1976 P.A. 267, as amended.

IN WITNESS WHEREOF, I have hereunto set my hand and seal this 17th day of March, 1999.

/s/ David Flaten
DAVID FLATEN, Secretary

SOUTH HURON VALLEY UTILITY AUTHORITY

RULES AND REGULATIONS

To establish permit requirements for connections or alterations to the South Huron Valley Wastewater facilities; to govern the design, alteration and use of stormwater and wastewater facilities connecting directly or indirectly to SOUTH HURON VALLEY UTILITY AUTHORITY facilities; to regulate the discharge of wastewater into public sewers which are part of or tributary to the SOUTH HURON VALLEY UTILITY AUTHORITY facilities; to provide for fees and charges; to authorize inspections; to establish appeal procedures; to provide for administration and enforcement of the rules and regulations; to prohibit certain detrimental conduct; and to establish penalties for violations.

IT IS HEREBY RESOLVED BY THE SOUTH HURON VALLEY AUTHORITY:

PREAMBLE

IT IS THE PURPOSE OF THE RULES AND REGULATIONS PROMULGATED HEREIN TO PROTECT THE PUBLIC HEALTH AND SAFETY AND TO ENABLE THE SOUTH HURON VALLEY UTILITY AUTHORITY, ITS CONSTITUENTS, COMMUNITIES AND THE MUNICIPALITIES CONTRACTING WITH SAID SOUTH HURON VALLEY UTILITY AUTHORITY FOR STORMWATER AND WASTEWATER DISPOSAL SERVICES TO COMPLY WITH THE REQUIREMENTS OF APPLICABLE STATE AND FEDERAL LAWS, INCLUDING THE FEDERAL WASTE POLLUTION CONTROL ACT OF 1972 (PUBLIC LAW 92-500), AS AMENDED, STATE OF MICHIGAN ACT 451 OF 1994, AS AMENDED, ACT 288 OF 1967 (PLAT ACT), AS AMENDED, ACT 40 OF 1956 (DRAIN CODE), AS AMENDED, THE APPLICABLE RULES AND REGULATIONS PERTAINING TO SAID ACTS, AND THE REQUIREMENTS OF APPLICABLE NATIONAL POLLUTANT DISCHARGE ELIMINATION PERMITS ISSUED PURSUANT TO SAID ACTS. FURTHER, THESE RULES AND REGULATIONS ARE ENACTED PURSUANT TO THE AUTHORITY OF STATE OF MICHIGAN PUBLIC ACT 233 OF 1955, AS AMENDED, AND SERVICE CONTRACTS ENTERED INTO BETWEEN THE SOUTH HURON VALLEY UTILITY AUTHORITY AND THE USERS OF STORMWATER AND WASTEWATER FACILITIES OWNED AND OPERATED BY THE SOUTH HURON VALLEY UTILITY AUTHORITY.

THESE RULES AND REGULATIONS SHALL GOVERN THE DESIGN, CONSTRUCTION, AND USE OF STORMWATER AND WASTEWATER FACILITIES WHICH ARE A PART OF OR ARE TRIBUTORY TO THE SOUTH HURON VALLEY UTILITY AUTHORITY OWNED FACILITIES, ENUMERATING THE REQUIREMENTS FOR TAPPING INTO SOUTH HURON VALLEY UTILITY AUTHORITY STORMWATER AND WASTEWATER FACILITIES, ALTERING EXISTING SOUTH HURON VALLEY UTILITY AUTHORITY STORMWATER AND WASTEWATER FACILITIES, PUMPING STATIONS AND INDUSTRIAL CONNECTIONS TO SEWERS; THE LIMITATIONS OF STORMWATER AND WASTEWATER DISCHARGES INTO SOUTH HURON VALLEY UTILITY AUTHORITY PUBLIC SEWERS; THE AUTHORITY OF THE INSPECTORS OF THE SOUTH HURON VALLEY UTILITY AUTHORITY, STATE OF MICHIGAN; AND TO PROVIDE A UNIFORM POLICY FOR RATES FOR STORMWATER AND WASTEWATER DISPOSAL SERVICE, AND A METHOD FOR THE ADMINISTRATION, APPLICATION AND ENFORCEMENT.

ARTICLE I

DEFINITIONS

Section 1 - Definitions

1. **ACT**

"ACT" means the Clean Water Act (33 U.S.C. 1251 et seq), as amended.

2. **APPROVAL AUTHORITY**

"APPROVAL AUTHORITY" means director of the Department of Environmental Quality (MDEQ), formerly Michigan Department of Natural Resources (MDNR), or his/her delegated representative.

3. **AS-BUILT PLANS**

"AS-BUILT PLANS" means engineering drawings prepared after installation of stormwater and wastewater facilities which show a statement by a registered engineer or surveyor certifying the drawings to be "as-built plans" and shall include, but not be limited to, length of sewer, invert elevation, location with respect to property lines, locations and depths of wyes, and sewer material and joints used.

4. **AUTHORIZED REPRESENTATIVE OF INDUSTRIAL USER - PER 40 CFR 403.12(L)**

"AUTHORIZED REPRESENTATIVES OF INDUSTRIAL USER means:

(A) President, Secretary, Treasurer or Vice-President if the industrial user is a corporation.

(B) A general partner or proprietor if the industrial user is a partnership or proprietorship, respectively; or

(C) A duly authorized representative of the individual designated above if such representative is responsible for the overall operation of the facilities from which the indirect discharge originates provided:

(I) The authorization is in writing, and

(II) The written authorization is submitted to the South Huron Valley Utility Authority.

5. **AUTHORITY**

"AUTHORITY" shall mean the South Huron Valley Utility Authority.

6. **BOD (biochemical oxygen demand)**

"BOD (biochemical oxygen demand)" means:

(A) The quantity of oxygen utilized in the biochemical oxidation of organic matter under standard laboratory procedure in five (5) days, at twenty (20) degrees Centigrade (expressed in milligrams per liter/mg/l) as measured by procedures specified in 40 CFR 136, as amended.

7. **BUILDING DRAIN**

"BUILDING DRAIN" means in plumbing, the part of the lowest horizontal piping of a drainage system that receives the discharge from soil, waste, and other drainage pipes inside the walls of the building and conveys it to the building sewer (house sewer). The latter begins five feet outside the inner face of the building wall.

8. **BULKHEAD**

"BULKHEAD" means a partition or concrete structure installed at an open end of a pipe or sewer to block the flow of water.

9. **BYPASS**

"BYPASS" as it pertains to a discharge from an industrial user's treatment facility means the intentional diversion of wastestreams from any portion of an industrial user's treatment facility.

10. **CATEGORICAL INDUSTRY**

"CATEGORICAL INDUSTRY" means a Non-Domestic User discharging wastewater from any of the categories specifically established pursuant to CWA and regulated under 40 CFR Chapter I, Subchapter N pursuant to 40 CFR 403.6.

11. **CATEGORICAL PRETREATMENT STANDARDS**

"CATEGORICAL PRETREATMENT STANDARDS" means National Categorical Pretreatment Standards specifying quantities or concentrations of pollutants or pollutant properties that may be discharged or introduced into a POTW by a specific industrial discharger.

CHEMICAL OXYGEN DEMAND (COD)

"CHEMICAL OXYGEN DEMAND (COD)" means a measure of the oxygen-consuming capacity of inorganic and organic matter present in water or wastewater. It is expressed in milligrams per liter (MG/L) as the amount of oxygen consumed from a chemical oxidant in a specific test.

CHLORINE DEMAND

"CHLORINE DEMAND" is defined as the amount of chlorine that must be added per unit volume of water or wastewater to produce the desired results under certain conditions. Usually the desired result is disinfection.

COMBINED WASTESTREAM

"COMBINED WASTESTREAM" means the wastestream at industrial facilities where regulated process effluent is mixed with other wastewaters (either regulated or unregulated) prior to treatment.

COMMERCIAL USER

"COMMERCIAL USER" means any user whose property is primarily used to conduct activities for monetary gain as may be defined in the local zoning ordinance.

COMPATIBLE POLLUTANT

"COMPATIBLE POLLUTANT" shall mean a pollutant which can be effectively removed by the POTW Treatment System to within acceptable levels for the POTW residuals and receiving stream. Specifically excluded are "Heavy" metals, PCB's, and any pollutants that will likely contribute or cause operational or sludge disposal problems or unacceptable discharges to the receiving waters. For purposes of these regulations, the compatible pollutants are BOD, FOG, Phosphorous and TSS.

COMPOSITE SAMPLE

"COMPOSITE SAMPLE" means a sample formed either by continuous sampling or by mixing discrete samples obtained at intervals over a time period. The sample may be either a time or flow proportional composite and shall reasonably reflect the characteristics of the wastestream at the time of each sample collection. For a continuous discharge, a minimum of four (4) individual grab samples shall be collected and combined to constitute a 24 hour composite sample. Composite sampling protocols delineated in the permit take precedence.

CONFIDENTIALITY

"CONFIDENTIALITY" means protection of privileged information as defined by Article V, Section 208 of these Rules and Regulations.

CONTROL AUTHORITY

THE "CONTROL AUTHORITY" means the South Huron Valley Utility Authority.

COOLING WATER

(A) **NON-CONTACT COOLING WATER** means the discharge from any use such as air conditioning, cooling or refrigeration, or to which the only pollutant added is heat.

(B) **CONTACT COOLING WATER** - water used for

33.	EXCESS FLOW	including state regulations contained in the state sludge management plan prepared pursuant to Subtitle D of the SWDA; The Clean Air Act; The Toxic Substance Control Act; and the Marine Protection, Research, and Sanctuaries Act	70.	fined as the logarithm (Base 10) of the reciprocal of the hydrogen ion concentration expressed in moles per liter of solution.
34.	FOG (Fats, Oil and Grease)	"EXCESS FLOW" means that quantity of wastewater represented by the difference between the wastewater flows and the total adjusted sewer water consumption. Wastewater flow adjustments for billing purposes will be made in accordance with procedures set by the Authority.	55.	LOCAL
35.	FEES	"FOG or Fats, Oil and Grease" means fats, oils, grease, and other nonvolatile material of animal, vegetable, or mineral origin that is extractable in accordance with procedures set forth in 40 CFR 136, as amended.	56.	"LOCAL" means a city, township, charter township, or village which is connected to or utilizing the publicly owned treatment and transportation system.
36.	FLOW	"FEES" means such charges as are made pursuant to contract by the Authority for services rendered.	57.	LOCAL DISCHARGE LIMITS
37.	FOOTING DRAIN	"FLOW" means the volume of liquid that flows through a passage of any given section in a unit of time.	58.	"LOCAL DISCHARGE LIMITS" means the effluent limits found on Schedule "A" of these Rules and Regulations.
38.	GENERAL SPECIFICATIONS	"FOOTING DRAIN" means a pipe or conduit which is placed around the perimeter of a building foundation and which intentionally admits ground water.	59.	MASTER PUMPING STATION
39.	GOVERNMENTAL USER	"GENERAL SPECIFICATIONS" means the current edition of "General Specifications for Roads, Bridges and Miscellaneous Construction of the Board of Wayne County Road Commissioners", or its successor agency.	60.	"MASTER PUMPING STATION" means a pumping facility which discharges directly to a South Huron Valley Utility Authority sewer or indirectly, through a municipal sewer, to a South Huron Valley Utility Authority sewer. Where a group of pumping facilities are connected in series, only the terminal pumping facility is considered to be the master pumping station.
40.	GRAB SAMPLE	"GOVERNMENTAL USER" means any user whose property is primarily used by any department, commission, in dependent agency, or instrumentality of the United States, of a state, county, incorporated or unincorporated municipality, township authority, district or other governmental unit.	61.	MDEQ
41.	GROUND WATER	"GRAB SAMPLE" means individual sample taken from a wastestream on a one-time basis, collected over a period not exceeding fifteen (15) minutes which reasonably represent the characteristics of the stream at the time of sampling.	62.	"MDEQ" means the Michigan Department of Environmental Quality, formerly known as the Michigan Department of Natural Resources.
42.	HAULED IN WASTE	"GROUND WATER" means subsurface water occupying the saturation zone, from which wells and springs are fed. In a strict sense the term applies only to water below the water table. Also called phreatic water, plerotic water.	63.	NPDES PERMIT
43.	HAZARDOUS WASTE	"HAULED IN WASTE" means wastewater discharged into the POTW other than through sewer connections at the site of generation. Such waste may only be introduced to the POTW upon approval and at points designated by the POTW. Such waste is subject to all federal, state and local ordinance requirements.	64.	"NPDES PERMIT" means the National Pollutant Discharge Elimination System Permit issued to the Authority pursuant to Section 402 of the Act (33 U.S.C. 1342), as amended, for discharge of wastewater into the surface waters of the State.
44.	HOLD TANK WASTE	"HAZARDOUS WASTE" means a solid waste or combination of solid wastes, which because of its quantity, concentration or physical, chemical or infectious character may:	65.	NATIONAL CATEGORICAL PRETREATMENT STANDARD
45.	INCOMPATIBLE POLLUTANT	(A) cause, or significantly contribute to, an increase in mortality or an increase in serious irreversible, or incapacitating reversible, illness, or	66.	"NATIONAL CATEGORICAL PRETREATMENT STANDARD" means any federal regulation containing pollutant discharge limits promulgated by the EPA which applies to a specific category of industrial users.
46.	INDIRECT DISCHARGE	(B) pose a substantial present or potential hazard to human health or the environment when improperly treated, stored, transported, or disposed of or otherwise managed.	67.	NATIONAL PROHIBITIVE DISCHARGE STANDARD OR PROHIBITIVE DISCHARGE STANDARD
47.	INDUSTRIAL USER	(C) as defined in RCRA, or its regulations (promulgated at 40 CFR 261) and NREPA	68.	"NATIONAL PROHIBITIVE DISCHARGE STANDARD OR PROHIBITIVE DISCHARGE STANDARD" means any regulation developed under the authority of 307(b) of the Act and 40 CFR, Section 403.5, as amended.
48.	INDUSTRIAL WASTE	"HOLD TANK WASTE" means any waste from holding tanks such as vessels, chemical toilets, campers, trailers, septic tanks, and vacuum-pack tank trucks.	69.	NEW SOURCE
49.	INFILTRATION	"INCOMPATIBLE POLLUTANT" means any pollutant which is not a compatible pollutant.	70.	"NEW SOURCE" means any building, structure, facility, or installation from which there is or may be a discharge of pollutants, the construction of which commenced after the publication of proposed pretreatment standards under Section 307(c) of the Act which will be applicable to such source if such standards are thereafter promulgated in accordance with that section, provided that:
50.	INFILTRANT	"INDIRECT DISCHARGE" means the discharge or the introduction of non-domestic pollutants from a source regulated under Section 307(b) or (c) of the Act, into a POTW.	71.	(1) (I) The building, structure, facility or installation is constructed at a site at which no other source is located;
51.	INHIBITION	"INDUSTRIAL USER" shall mean a source of discharge to the POTW which originates from, but is not limited to, facilities engaged in industry, manufacturing, arts, trade or commerce, including the development, recovery or processing of natural products, whether public or private, commercial or charitable. Single and multiple family residential dwellings with discharges consistent with domestic waste characteristics are specifically excluded.	72.	(II) The building structure, facility or installation totally replaces the process or production equipment that causes the discharge of pollutants at an existing source; or
52.	INORGANIC MATTER	"INDUSTRIAL WASTE" means solid, liquid or gaseous waste resulting from any industrial, manufacturing, trade, or business process or from the development, recovery or processing of natural resources.	73.	(III) The production or wastewater generating processes of the building, structure, facility or installation are substantially independent of an existing source at the same site. In determining whether these are substantially independent, factors such as the extent to which the new facility is integrated with the existing plant, and the extent to which the new facility is engaged in the same general type of activity as the existing source should be considered.
53.	INSTITUTIONAL USER	"INFILTRATION" means any water or groundwater entering a sewer system and service connections from the ground through such means as, but not limited to, defective pipes, pipe joints, connections and manhole walls.	74.	(2) Construction on a site at which an existing source is located results in a modification rather than a new source if the construction does not create a new building, structure, facility or installation meeting the criteria of paragraphs (1) (II), or (1) (III) above but otherwise alters, replaces, or adds to existing process or production equipment.
54.	INTERFERENCE	"INFLUENT" means that which flows in. Wastewater or other liquid which is raw, untreated or partially treated and flows into a reservoir, basin, treatment process, or treatment plant.	75.	(3) Construction of a new source as defined under this paragraph has commenced if the owner or operator has:
55.	INFLUENT	"INHIBITION" means the disruption or interference of sewage treatment plant processes or operations.	76.	(I) Begun, or caused to begin as part of a continuous on site construction program;
56.	INORGANIC MATTER	"INORGANIC MATTER" means chemical substances of mineral origin, or more correctly, of basically carbon structure.	77.	(A) Any placement, assembly, or installation of facilities or equipment; or
57.	INSTITUTIONAL USER	"INSTITUTIONAL USER" means any nonprofit or quasi-public use or institution such as a church, library, public or private school, hospital, or municipally owned or operated building, structure or land used for public purpose as maybe defined in the Local Zoning Ordinance.	78.	(B) Significant site preparation work including clearing, excavation, or removal of existing buildings, structure, or facilities which is necessary for the placement, assembly, or installation of new source facilities or equipment; or
58.	INTERFERENCE	"INDIRECT DISCHARGE" means a discharge, which alone or in conjunction with discharges by other sources, inhibits or disrupts the POTW, its treatment process, or operations, or its sludge processes, use or disposal; and which is a cause of a violation of any requirement of the POTW's NPDES permit (including an increase in the magnitude or duration of a violation) or of the prevention of sewage sludge use or disposal by the POTW in accordance with the following statutory provisions and regulations or permits issued thereunder (or more stringent state or local regulations): Section 405 of the Clean Water Act; The Solid Waste Disposal Act (SWDA), (including Title II, more commonly referred to as the Resource Conservation and Recovery Act; and	79.	(C) Entered into a binding contractual obligation for the purchase of facilities or equipment which are intended to be used in its operation within a reasonable time. Options to purchase or contracts which can be terminated or modified without substantial loss, and contracts for feasibility, engineering, and design studies do not constitute a contractual obligation under this paragraph.
59.	PASSTHROUGH	"INSECT" means any member of the class Insecta.	80.	"INSECT" means any member of the class Insecta.
60.	PERSON	"ORGANIC MATTER" means chemical substances of animal or vegetable origin, or more correctly, of basically carbon structure, comprising compounds consisting of hydrocarbons and their derivatives.	81.	"INSECT" means any member of the class Insecta.
61.	pH	"PASSTHROUGH" means the discharge of pollutants through the POTW into navigable waters in quantities or concentrations, which alone or in conjunction with the discharges from other sources, is a cause of a violation of any requirement of the POTW's NPDES permit (including an increase in the magnitude or duration of a violation).	82.	"INSECT" means any member of the class Insecta.
62.	PERSON	"PERSON" means any individual, partnership, co-partnership, firm, company, association, society, trust, estate, corporation, public corporation or governmental entity, or any other legal entity, or their representatives, agents, or assigns. This definition includes all federal, state and local governmental entities.	83.	"INSECT" means any member of the class Insecta.
63.	ORGANIC MATTER	"pH" means a measure of the acidity or alkalinity of an aqueous solution. It is de-	84.	"INSECT" means any member of the class Insecta.
64.	SEWER	fined as the logarithm (Base 10) of the reciprocal of the hydrogen ion concentration expressed in moles per liter of solution.	85.	"RECEIVING WATERS" means both surface and underground waters including all ponds, lakes, rivers, streams, public ditches or public drainage systems, other than those designated to collect, convey or dispose of sanitary sewage.
65.	SEPARATE	"SEPARATE" means a prefix denoting a wastewater transmission facility which is intended to transport sanitary wastewater only.	86.	"RESIDENTIAL USER (DOMESTIC USER)" means any user whose sanitary sewage emanates from a property primarily used as a domicile, including multiple dwellings and whose sewage characteristics are within the definitions of domestic waste.
66.	SEWER	"SECONDARY PROPERTY DAMAGE" means substantial physical damage to property or damage to the treatment facilities which causes them to become inoperable, or substantial and permanent loss of natural resources which can reasonably be expected to occur in the absence of a bypass. Severe property damage does not mean economic loss caused by delays in production.	87.	"SECONDARY WASTEWATER TREATMENT" means the treatment of wastewater by biological methods after primary treatment.
67.	SEWER	"SEWER" means a pipe or conduit that carries wastewater or drainage water.	88.	"SEPARATE" means a prefix denoting a wastewater transmission facility which is intended to transport sanitary wastewater only.
68.	SEWER	(A) Building Sewer - In plumbing, the extension from the building drain to the public sewer or other place of disposal. Also called house connection.	89.	"SEVERE PROPERTY DAMAGE" means substantial physical damage to property or damage to the treatment facilities which causes them to become inoperable, or substantial and permanent loss of natural resources which can reasonably be expected to occur in the absence of a bypass. Severe property damage does not mean economic loss caused by delays in production.
69.	SEWER	(B) Combined Sewer - A sewer intended to receive both wastewater and storm or surface water.		
70.	SEWER	(C) Common Sewer - A sewer in which all owners of abutting properties have equal rights.		
71.	SEWER	(D) County Sewer - A public sewer controlled by the County of Wayne.		
72.	SEWER	(E) Intercepting Sewer - A sewer that receives dry weather flow from a number of transverse sewers or outlets and frequently additional pre-detained quantities of storm water (if from a combined system), and conveys such waters to a point for treatment or disposal.		

(F) **Lateral Sewer** - A sewer which is designed to receive a building sewer.

(G) **Municipal Sewer** - A public sewer exclusive of a South Huron Valley Utility Authority sewer.

(H) **Public Sewer** - A common sewer operated or owned by a governmental agency or public utility which is connected, discharging, or tributary to a county-owned or operated POTW.

(I) **Sanitary Sewer** - A sewer that carries liquid and water-carried wastes from residences, commercial buildings, industrial plants, and institutions, together with minor quantities of ground, storm, and surface waters that are not admitted intentionally.

(J) **Separate Sewer** - "Separate" means a prefix denoting a wastewater transmission facility which is intended to transport sanitary wastewater only.

(K) **South Huron Valley Utility Authority Sewer** - A public sewer owned and controlled by the South Huron Valley Utility Authority.

(L) **Storm Sewer** - A sewer that carries storm water and surface water, street wash and other wash waters, or drainage, but excludes domestic waste water and industrial wastewater. Also called storm drain.

(M) **Trunk Sewer** - A sewer which connects the lateral to the intercepting sewer and to which building sewers may be connected.

90. SEWERAGE

See Wastewater

91. SHALL

"SHALL" means mandatory.

92. SIGNIFICANT INDUSTRIAL USER (SIU)

(1) Except as provided in paragraph (2) the term Significant Industrial User means:

(I) All industrial users subject to categorical pretreatment standards under 40 CFR 403.6 and 40 CFR Chapter I, Subchapter N; and

(II) Any other industrial user that:

(A) Discharges an average of 25,000 gallons per day or more of process waste water to the POTW (excluding sanitary, noncontact cooling and boiler blowdown wastewater).

(B) Contributes a process wastestream which makes up 5 percent or more of the average dry weather hydraulic or organic capacity of the POTW treatment plant; or is

(C) Designated as such by the SHVUA on the basis that the industrial user has a reasonable potential for adversely affecting the POTW's operation or for violating any pretreatment standard or requirement (in accordance with 40 CFR 403.6 (F) (6)).

(2) Upon a finding that an industrial user meeting criteria in paragraph (1)(II) has no reasonable potential for adversely affecting the POTW's operation or for violating any pretreatment standard, requirement or local limit the SHVUA may at any time, on its own initiative or in response to a petition received from an industrial user, and in accordance with 40 CFR 403.6 (F) (6), determine that such industrial user is not a significant industrial user.

93. SIGNIFICANT NON-COMPLIANCE (SNC)

An industrial user is in Significant Non-Compliance if the violation meets one (1) or more of the following criteria:

(A) Chronic violations of wastewater discharge limits, defined here as those in which 60% or more of all of the measurements taken during a 6 month period exceed (by any magnitude) the daily maximum limit or the average limit for the same pollutant parameter;

(B) Technical review criteria (TRC) violations, defined here as those in which 33% or more of all of the measurements for each pollutant parameter taken during a 6 month period equal or exceed the product of the daily maximum limit or the average limit multiplied by the applicable TRC (TRC=1.4 for BOD, TXX, fats, oil, and grease and 1.2 for all other pollutants except pH);

(C) Any other violation of a pretreatment effluent limit (daily maximum or longer-term average) that the SHVUA determines has caused, alone or in combination with other discharges, interference or pass through (including endangering the health of POTW personnel or the general public);

(D) Any discharge of a pollutant that has caused imminent endangerment to human health, welfare or to the environment or has resulted in the POTW's exercise of its emergency authority under Article V of these Rules and Regulations (40 CFR 403.8 (f)(1)(vi)(B)) to halt or prevent such discharge;

(E) Failure to meet, within 90 days after the schedule date, a compliance schedule milestone contained in a wastewater discharge permit compliance schedule or conciliation agreement for starting construction, completing construction, or attaining final compliance;

(F) Failure to provide within 30 days after the due date required reports such as a baseline monitoring reports, 90-day compliance reports, periodic self-monitoring reports and reports on compliance with compliance schedules;

(G) Failure to accurately report non-compliance;

(H) Any other violation or group of violations which the SHVUA determines will adversely affect the operation or implementation of the SHVUA's industrial pretreatment program.

94. SLUDGE

"SLUDGE" means any solid, semisolid, or liquid waste generated from a municipal, commercial or industrial wastewater treatment plant, water supply plant, or air pollution control facility.

95. SLUG (SLUG DISCHARGE)

"SLUG OR SLUG LOAD" means the release of any pollutant of a non-routine nature, including but not limited to an accidental spill or a non-customary batch discharge at a flow rate or concentration which will cause a violation of the specific discharge prohibitions in 40 CFR 403.5 (B) to 403.12 (F).

96. STANDARD INDUSTRIAL CLASSIFICATION (SIC)

"STANDARD INDUSTRIAL CLASSIFICATION (SIC)" means a classification pursuant to the standard industrial classification manual issued by the Executive Office of the President, Office of Management and Budget, 1972.

97. STORM WATER

"STORM WATER" means the excess water running off from the surface of a drainage area during and immediately after a period of precipitation including, but not limited to, rain, sleet, snow or snow melt. [It is that portion of precipitation and resulting flow that is in excess of that which can be absorbed through the infiltration capacity of the surface of the basin]

98. STORMWATER TRANSMISSION FACILITIES

"STORMWATER TRANSMISSION FACILITIES" means all facilities for collecting, transporting, regulating, pumping and storing of stormwater.

99. SURCHARGE

"SURCHARGE" means an extra charge imposed upon a user of the sewer system to

compensate the South Huron Valley Utility Authority for its costs of treating, sampling and testing due to the discharge of a compatible pollutant into the POTW by the industrial user.

100. SURFACE WATER

"SURFACE WATER" means:

(1) All water on the surface, as distinguished from subterranean water, or

(2) Water appearing on the surface in a diffused state, with no permanent source of supply or regular course for any considerable time, as distinguished from water appearing in watercourses, lakes or ponds.

101. SUSPENDED SOLIDS

"SUSPENDED SOLIDS" means the filterable residue, in MG/L, as determined by filtering a sample through a glass fiber filter disk and drying the filter to constant weight at 103-105° C. [EPA 1602]. Glass fiber filter discs, without organic binder, such as Millipore AP-40, Reeve Angel 934 AH, Gelman Type A/E or equivalent shall be used.

102. TSS (Total Suspended Solids)

"TSS or Total Suspended Solids" means the filterable residue in milligrams per liter (MG/l), as determined by 40 CFR 136, as amended.

103. TOTAL ADJUSTED SEWERED WATER CONSUMPTION

"TOTAL ADJUSTED SEWERED WATER CONSUMPTION" means the water consumption of a district as determined by master water meters so located as to register the total water consumption in the district; provided, that, if such master meters are not available, the amount of water consumed shall be determined by converting the consumption indicated by the individual water meters in use in the district to the equivalent of master meter indicated consumption by applying the factor hereinafter set forth.

If any premises within the district shall be furnished with wastewater disposal services but shall be supplied with water not included in the quantity of water as indicated by the master meters, then there shall be added to the amount of water indicated by master meter the amount of water consumed upon all such premises as shown by individual water meters in use thereon, then as estimated in a manner prescribed or approved by the SHVUA.

104. TOXIC POLLUTANT

"TOXIC POLLUTANT" means any pollutant or combination of pollutants listed in 40 CFR 401.15 as toxic under the provisions of the Clean Water Act or listed in the Critical Materials Register promulgated by the Michigan Department of Environmental Quality.

105. UPSET

"UPSET" as it pertains to industrial user treatment facilities means an exceptional incident in which there is unintentional and temporary non-compliance with categorical pretreatment standards or local limitations because of factors beyond the reasonable control of the industrial user. An upset does not include non-compliance to the extent caused by operational error, improperly designed treatment facilities, inadequate treatment facilities, lack of preventive maintenance, or careless or improper operation.

106. U.S. EPA

"U.S. EPA" means the United States Environmental Protection Agency.

107. USER

"USER" means any person who contributes, causes or permits the contribution of wastewater into the sewage works.

108. USER CHARGE

"USER CHARGE" means a charge levied on users of a treatment works for the cost of operations and maintenance of sewerage works.

109. WASTEWATER

"WASTEWATER" means a combination of the liquid and water-carried wastes from residences, commercial buildings, industrial plants, and institutions, whether treated or untreated, which are contributed to or permitted to enter the POTW. Wastewater may also contain inflow and infiltration and cooling water. See the following definitions modifying wastewater:

(A) Combined wastewater - A mixture of storm water and other wastewater such as domestic or industrial waste water.

(B) Domestic wastewater - Wastewater derived principally from residential dwellings, business buildings and institutions. It refers to the waste flow that originates mainly from the kitchen, bathroom and laundry.

(C) Industrial wastewater - Wastewater from industrial and certain commercial operations.

110. WASTEWATER SURVEY

"WASTEWATER SURVEY" means an investigation of the quality and characteristics of each wastestream, as in an industrial plant or municipality.

111. WEIR

"WEIR" means a device that has a crest and some side containment of known geometric shape, such as A, V, trapezoid, or rectangle, and is used to measure or restrict the flow of a liquid. The liquid surface is exposed to the atmosphere. Flow is related to the upstream height of the liquid above the crest, the position of the crest with respect to downstream liquid surface, and to geometry of the weir opening.

112. OTHER TERMS NOT DEFINED HEREIN

Words, phrases and terms not otherwise defined shall be interpreted according to their common and ordinary meaning. Words and phrases used in the present tense include the future tense; words and phrases in the masculine gender include the feminine and neuter genders; and the singular number includes the plural, and the plural number includes the singular.

113. STATE OR FEDERAL REGULATIONS OR STANDARDS INCORPORATED BY REFERENCE

A state or federal law, regulation or standard which is incorporated by reference into these Rules and Regulations means that version which is in effect on the date of enactment of these Rules and Regulations.

ARTICLE II

PERMIT REQUIREMENTS

SECTION 1.

Prohibited Acts

In addition to Section 2 of Article V of these Rules and Regulations:

(A) A person is subject to fine or imprisonment, or both, who without a currently valid permit from the SHVUA of the prescribed class, makes or causes to be made:

(1) A connection or alteration to a SHVUA POTW or sewer, or

(2) An installation of a master pumping station or an industrial waste water connection to public wastewater facilities which flow into a SHVUA POTW or sewer.

(B) A person is subject to fine or imprisonment, or both, if that person holds a currently valid permit from the SHVUA of the prescribed class, but makes or causes to be made:

(1) A wastewater discharge which is in excess of the maximum permitted volume, or

(2) A wastewater discharge which contains any pollutants which are in addition to those reported in the application for the currently valid permit or in concentration in excess of the limitation in the user's valid permit.

(C) A person is subject to fine or imprisonment, or both, who after receipt of notice of suspension or revocation of a permit, continues or causes to be continued the discharge, installation, or construction originally permitted thereunder.

(D) A person is subject to fine or imprisonment, or both, if within ten days after notice of order by the SHVUA, that person fails to bulkhead or to have bulkheaded a wastewater connection for which that person holds no currently valid permit.

(E) Any fines referred to in the provision of this Section shall be imposed in accordance with Section 6.05 and/or 6.10.2 of Article V of these rules and regulations.

Section 2 Classes of Permits

The SHVUA may grant permits for the following 6 classes of activity:

Class A for building sewer connections to a SHVUA sewer;

Class B for municipal sewer connections to a SHVUA sewer;

Class C for alterations to SHVUA wastewater facilities;

Class D for discharge of wastewater to a public sewer;

Class E for installation of master pumping stations;

Class F for private connections to a SHVUA sewer or drain.

Section 3 General Conditions

All classes of permits are subject to the following conditions:

(A) A person shall not alter, modify, make changes to, or tamper with a SHVUA stormwater or wastewater facility in any way without the prior written permission to do so from the SHVUA.

(B) An applicant shall first provide the SHVUA with all supporting data requested on the application form and instructions as issued by the SHVUA, and shall further make full payment of the specified filing fee.

(C) The applicant or applicant's contractor shall expressly assume liability for all costs and expenses for the work related to a permit, and shall further indemnify the SHVUA, the local municipality and their agents for any loss or damage which may be directly or indirectly caused by performing the permitted work.

(D) The SHVUA shall not issue a permit until:

(1) Each municipality within which the facility is to be located has had reasonable opportunity to review and comment upon the application and draft permit;

(2) Each municipality to be served by the proposed facility has approved the application; and

(3) If required, a construction permit for the proposed facility has been issued by the Michigan Department of Environmental Quality;

(4) Class D permits are not subject to conditions stated in Section 3 (d) (2) and (3).

(E) All construction work authorized under a permit shall be performed in accordance with standards and specifications issued by the SHVUA. The Authority may grant a minor variance in location and detail from those standards and specifications, but only in writing, which writing shall not be effective unless entered upon both the SHVUA's and the applicant's copy of the permit.

(F) If a permit authorizes any physical contact with a SHVUA stormwater or wastewater facility, the permit-holder shall notify the SHVUA 48 hours prior to making the excavation which enables that contact. That excavation and all closely related construction shall be performed only within the immediate presence of a SHVUA inspector. The full actual cost of the inspector shall be reimbursed to the Authority by the applicant, pursuant to an established fee schedule.

(G) For a compelling and public good cause stated in writing and subject to the conditions of various existing contracts between the SHVUA and affected municipalities, the SHVUA may at any time revoke the authority granted in a permit. An applicant shall expressly waive any claim for damages which may arise if a permit is revoked and a connection is bulkheaded for any compelling and public good cause or interest.

(H) Subject to the procedures specified in Article V, the SHVUA may at any time suspend or revoke a permit if the holder is found by the SHVUA to be in violation of a term or condition of the permit. The SHVUA may also limit or restrict the number of new connections if sufficient capacity is not available in downstream facilities, such as, pumping stations, interceptor sewers, local sewers, or the treatment plant.

Section 4 Specific Conditions

Specific classes of permits are subject to the following specific conditions:

(A) Class A Permits - Building sewer connections to a SHVUA sewer (Sanitary connections only):

- (1) Connections to SHVUA lateral and trunk sewers shall be made with a standard wye and riser.
- (2) Permission may be granted for individual building sewers to be connected to a SHVUA intercepting sewer, subject to the following conditions:
 - (a) no municipal sewer nor other individual connection manhole is available within 300 feet of the property to be served.
 - (b) the building served will contribute less than 2000 gallons of domestic wastewater per day.
 - (c) the sewer system tributary to the connection shall serve only property owned and managed by the owner applicant. If any property, not owned and managed by the owner applicant, shall be connected to that tributary sewer system, the permit shall be automatically voided. Permission may be granted, however, to connect one building on either side of a building for which the initial connection has been permitted, to a manhole installed with the initially permitted connection.
 - (d) that portion of the building sewer connection lying within the public right-of-way shall become the property of the local municipality.
 - (e) If municipal sewers become available to the subject property, the permit shall be voided and the owner shall be required to connect to the municipal sewer system.

(B) Class B Permits - Municipal sewer connections to a SHVUA sewer (Sanitary connections only):

A Class B Permit shall not be issued until the plans for the sewer system tributary to the connection have been approved by the SHVUA and by all other appropriate agencies.

(C) Class C Permits - Alterations to SHVUA stormwater or wastewater facilities:

- (1) Conditions shall be added to the permit which are reasonably calculated to maintain services during the alteration of facilities.
- (2) The applicant shall post a cash bond in an amount to be determined by the Authority for all expenses incurred by the Authority in connection with the work necessitated by such alterations.
- (3) The applicant shall dedicate any required easement to the Authority.

(D) Class D Permits - Industrial connections to a public sewer:

- (1) All users identified as Significant Industrial Users, as defined in Article I, are required to obtain a Class D Permit.
- (2) A Class D Permit shall be valid for no more than five years, but may be reissued.
- (3) A Class D Permit shall be valid only for the discharge of those pollutants reported in the permit application. A permit must be modified before the discharge of any pollutant not reported in the application for a currently valid Class D Permit.
- (4) A Class D Permit shall be modified if the average daily discharge volume in a calendar month exceeds 150% of the average daily discharge volume reported in the permit application.
- (5) A Class D Permit holder must pay a surveillance fee.

(E) Class E Permits - Master pumping stations:

- (1) A Class E Permit shall be required for all master pumping stations connected to the public sewer system.
- (2) A Class E Permit shall be valid only for that pumping capacity stated in the permit. A person shall not increase capacity without a new permit.
- (3) Pumping stations shall conform to the requirements set forth in Article III, Section 5.

(F) Class F Permits - Private connection to a SHVUA sewer or drain:

- (1) The applicant shall construct the facility in accordance with plans approved by the Authority.
- (2) Land to be drained must be within the drainage district or be so included by agreement.
- (3) The applicant must expressly agree to limit the rate of stormwater discharge as required by the Authority.

ARTICLE III

DESIGN AND CONSTRUCTION REQUIREMENTS FOR WASTEWATER TRANSMISSION FACILITIES

All wastewater transmission facilities connecting directly or indirectly to SHVUA wastewater facilities shall be designed and constructed in accordance with the following minimum requirements. The Authority may deny a connection permit for a transmission facility which is not in substantial compliance with these design and construction standards and conditions, or for which a satisfactory schedule can not be agreed upon to bring it into compliance.

Section 1. General

(A) All public sewer systems connecting directly or indirectly to a SHVUA sewer shall be approved by each municipality to be served by the proposed facility and by the Authority. SHVUA approval shall not be given until each municipality in which the proposed facility is to be physically located has had a reasonable opportunity to review and comment on the plans and specifications for the facility.

(B) If a sewer project is not under construction or contract awarded within two years of approval by the Authority, the approval shall be void, unless an extension of time has been approved by the Authority.

(C) Construction shall not commence until all applicable local, state and federal permits have been obtained.

(D) New public sewer systems shall not be placed in service until test results have been reviewed by the Authority. Within two working days of receipt of those results the Authority will accept or reject the system. If the Authority has not acted within that time, the project may be placed in service. The Authority's approval is also subject to the receipt of acceptable as-built plans within 90 days of acceptance of the system.

(E) Any sewer which services two or more separate buildings or dwellings shall be a public sewer, unless the buildings are part of a singly-owned industrial complex or a public complex where future division of ownership is not anticipated.

(F) New construction shall be limited to separate waste water transmission facilities, which outlet into a separate system. (See Section 2)

(G) Pumping systems will not be approved where, in the opinion of the Authority, it is feasible to construct gravity sewer systems.

(H) For items not specifically covered herein, the design, in general, shall conform to the "Recommended Standards for Sewage Works" of the Great Lakes-Upper Mississippi River Board of State Sanitary Engineers, more commonly referred to as the "10-State Standards".

Section 2. Design Flows

(A) Wastewater transmission systems shall be designed on the basis of an average flow of 100 gallons per capita per day, unless another flow is specifically approved by the Authority.

(B) Sewers shall be designed to carry, when running full, the flows specifically approved by the Authority.

(C) Calculations showing the basis of design shall be submitted to the Authority, except for service areas which are to be served by 8" sewers.

Section 3. Sewers

(A) General

- (1) Any generally accepted material for sewers will be given consideration, but the material selected should be adapted to local conditions, such as character of industrial wastes, possibility of septicity, soil characteristics, exceptionally heavy external loadings, bedding, abrasion and similar problems.
- (2) Sewer joints and materials shall be designed to minimize infiltration and to prevent the entrance of roots.
- (3) All sewer systems shall be designed so as to limit infiltration to 200 gals. per inch of pipe diameter per mile of sewer per day. All points of future connection to the system shall be sealed to meet leakage restrictions and testing requirements.
- (4) Sewers shall be sufficiently deep so as to prevent freezing. The minimum depth to the top of pipe shall be 42 inches.
- (5) Sewers shall be properly vented.
- (6) A bulkhead shall be installed at each outlet to an existing system, and shall not be removed until the new sewer system has been accepted by the Authority.
- (7) Sewers shall be laid at least 10 feet horizontally, from any existing or proposed water main. A minimum vertical clearance of 18 inches shall be maintained between the top of sewer and the bottom of the water main under which it crosses. Vertical clearance of less than 18 inches or crossing of a sewer over a water main will require that special measures be taken to prevent contamination of the water supply, such as encasement of the sewer.
- (8) No connections from footing drains, sump pumps, roofleaders, etc. shall be made to the system.
- (9) Tree plantings, for restoration purposes, shall not be permitted within 15 feet of center line of new or repaired sewers.

(B) Public Sewers

- (1) Sewers shall be a minimum of 8" in diameter.
- (2) Sewers shall be designed for mean velocities, when flowing full, at design flows of not less than 2.0 feet per second, based upon Kutter's formula using an "n" value of 0.013. Use of other "n" values may be permitted if deemed justifiable on the basis of research or field data presented.
- (3) Sewers shall be designed with a uniform line and grade between manholes.
- (4) When a smaller sewer joins a larger one, the invert of the larger sewer shall be lowered at least enough to maintain the 0.8 depth point of both sewers at the same elevation.
- (5) Where velocities greater than 15 feet per second may be attained, special provision shall be made to protect against scouring and thrust displacement.

(C) Building Sewers

- (1) A separate building sewer shall be provided for each building or dwelling.
- (2) The building drain connection to the building sewer shall be sealed by an approved method and encased in concrete to provide a water tight seal.
- (3) Building sewers shall be designed and installed so as to limit infiltration to 200 gallons per inch of sewer diameter per mile of sewer per twenty four hours, and local public authorities shall conduct testing programs which will assure substantial conformance with this infiltration requirement.
- (4) Building drain inlets shall be sealed by an approved method during construction and seals shall not be removed until plumbing is carried to the first floor, basement walls are backfilled, the footing drain system is operating, and such other precautions have been taken as are necessary to insure that no storm or ground water will enter the sanitary sewer.
- (5) No wyes, cleanouts or similar appurtenances shall be connected to a building sewer or a building drain outside the walls of the building except where specifically required by local building codes. Where so required, such appurtenances shall be sealed by an approved method so as to insure that no storm or ground water will accidentally or intentionally be admitted through the appurtenances.
- (6) No trap shall be installed in the building drain between the main vent and the building sewer.
- (7) Minimum grade of building sewers shall be 1 foot per 100 feet (100%).
- (8) Building sewers shall not be connected to manholes except from the upstream side of a terminal manhole.

Section 4. Manholes

(A) Manholes shall be installed at the end of each line; at all changes in grade, size, or alignment; and at all intersections. Spacing between manholes shall not exceed 400 feet, on runs of sewer 48 inches in diameter or less. On runs of sewer greater than 48 inches in diameter, spacing of manholes shall be approximately 100 times the diameter of the sewer.

(B) Manholes constructed in a road right-of-way shall be located away from open ditch drainage systems so that no portion of any manhole protrudes into the drainage ditch. If necessary, the open ditch system shall be relocated or enclosed adjacent to the manhole to provide complete cover around the manhole.

(C) Manhole construction shall be precast concrete with modified grooved tongue joints and gasket unless otherwise approved by the Authority.

(D) Manhole steps shall be constructed of cast iron unless otherwise approved by the Authority.

(E) A standard drop connection shall be provided for a sewer whose invert is at an elevation of 18 inches or more above the spring line of the existing sewer. Where the difference in elevation between the invert of incoming

(F) sewer and the manhole invert is less than 18 inches, the manhole should be filleted to prevent solids deposition.

(G) The minimum inside diameter of manholes shall be 48 inches, and drop connections or other permanent devices (except manhole steps) which would reduce any clear inside dimension to less than 48 inches, shall not be installed in a manhole.

(H) There shall not be less than 10" of undisturbed concrete between adjacent openings in the manhole nor shall more than 50 per cent of the circumference along any horizontal plain be removed without special reinforcing or strengthening of the walls as approved by the Authority.

(I) Perforated manhole covers shall not be used; where venting is required, vent pipes shall be installed.

(J) Lock-down pressure-tight frames and covers shall be used in the following locations:

- (1) Lock-down pressure-tight covers shall be required in flood plain areas located below 100-year flood elevation.
- (2) Manholes in easements which are not parallel and adjacent to public rights-of-way shall be constructed with lock-down pressure-tight covers to limit storm water drainage into the sanitary sewer system and prevent dumping of other deleterious matter into the manholes.
- (3) The flow channel through manholes shall be made to conform in shape and slope to that of the sewers.
- (4) Control manholes required under these Rules and Regulations, shall be constructed in accordance with the standards of the Authority.

Section 5. Pumping Stations

(A) Municipal

(B) General

- (a) The maximum discharge rate shall not exceed the flows indicated in the sanitary sewer design approved by the Authority.
- (b) Provisions of an emergency power supply for pumping stations shall be made, and may be accomplished by connection of the station to at least 2 independent public utility sources, or by provision of portable or in place internal combustion engine equipment which will generate electrical or mechanical energy, or by the provision of portable pumping equipment.
- (c) Pumping stations shall be equipped with a high water alarm.
- (d) Where, in the opinion of the Authority the operation of a pumping station becomes critical to the operation of the SHVUA wastewater facilities, the Authority shall assume jurisdiction for operation and maintenance of the pumping station.

(C) Master Pumping Stations

- (a) Master pumping stations with capacities in excess of 50 GPM shall be equipped with an approved recording totalizing flowmeter and a wet well recorder. Copies of flow records shall be forwarded to the Authority at the end of each month of operation. Copies of the wet well level recorder shall be forwarded to the Authority as requested.
- (b) No change which will increase the authorized pumping capacity of the master pumping station may be made without the written consent of the Authority.
- (c) Master Pumping Stations exceeding 250 GPM capacity or 10% of the hydraulic capacity of the treatment facility shall be designed for variable speed operation.
- (d) Design Period

(D) "Variable Speed" pumping stations shall have a maximum design period of 20 years provided that the pumping system's lowest effective pumping rate, which does not harm the pumps, is no greater than the maximum allowable rate of wastewater flow anticipated five years from the time the station is placed in service.

(E) "Constant Speed" pumping stations shall have a maximum design period of five years from the time the station is placed in service. Provisions for increasing capacity in 5-year increments may be incorporated in the original construction.

(F) Pumping stations having capacity in excess of 50 GPM shall comply with all requirements of municipal pumping stations.

(G) The municipality shall keep records of all stations of 50 GPM or less, to be furnished to the Authority on request.

(H) Where in the opinion of the Authority, private pumping stations create a burden on the wastewater facilities, they will require the municipality to install public facilities to correct the situation.

Section 6. Force Mains

(A) At design average flow, a cleansing velocity of at least 2 feet per second shall be maintained.

(B) An automatic air relief valve shall be placed at high points in the force main to prevent air locking.

(C) If disposal facilities are available, blow-off or flushing arrangements are desirable at low points in the force main.

(D) Access points for maintenance shall be placed along the force main at distances not exceeding 500 feet.

(E) A velocity reducing device shall be required at the juncture of the force main with the gravity sewer.

(F) Force mains should enter the gravity sewer system at a point not more than 24 inches above the flow line of the receiving manhole or shall have drop connection approved by the Authority.

Section 7. Inverted Siphons

(A) Inverted siphons shall have not less than two barrels.

(B) The minimum pipe size shall be 6 inches.

(C) The terminal manholes shall have adequate clearances for rodding and shall be equipped with the necessary appurtenances for convenient flushing and maintenance.

(D) The inlet and outlet details shall be arranged so that normal flow is diverted to one barrel, and so that either barrel may be taken out of service

(E) or cleaning.

(F) Sufficient head shall be provided and pipe sizes selected to obtain a velocity of at least 3.0 feet per second for average daily flows at ultimate design.

(F) The smallest pipe shall be designed to obtain a minimum velocity of 3.0 feet per second for the maximum daily flow anticipated 5 years from installation.

Section 8. Testing

The Authority shall be notified one working day in advance of all post-construction testing. The following tests shall be performed by qualified personnel approved by the Authority and a written report furnished to and approved by the Authority prior to placing any public facility in service:

(A) Sewer Systems:

- (1) Visible and audible checks shall be made of the sewers and manholes and all leaks repaired prior to testing.
- (2) All sewer lines, which are not inspected by walking or crawling through the sewer, shall be televised for misalignment, infiltration, for defective pipe or joints and for debris. For a point of clarity, pipe size 30" diameter and smaller shall be televised.
- (3) Leakage tests shall be conducted on all new sewer lines and existing lines which have not been previously approved.
- (4) All sewers shall be subjected to air, infiltration or exfiltration tests, or a combination of same, prior to acceptance by the Authority. All sewers over 24" diameter shall be subjected to infiltration tests before initial start up. All sewers of 24" diameter or smaller, where the ground water level above the top of the sewer is over 7 feet, shall be subjected to infiltration tests. All sewers of 24 inch diameter or less, where the ground water level above the top of the sewer is 7 feet or less, shall be subjected to air tests or exfiltration tests. If an exfiltration test is performed, the maximum exfiltration rate shall be the same as that permitted from infiltration. For the purpose of exfiltration testing, the internal water level shall be equal to the external water level plus seven (7) feet as measured from the top of the pipe, and the elevation must be at least as high as the highest house service.
- (5) Maximum allowable infiltration shall not exceed 200 gallons per inch of diameter per mile of pipe between manholes per 24 hours for any section of the system and shall include the infiltration from all manholes and other appurtenances.
- (6) The procedure for air testing of sewers shall be as follows:

All house leads shall be properly plugged and blocked to withstand the air pressure. The sewer line shall be tested in increments between manholes. The line shall be cleaned and plugged at each manhole. Such plugs shall be designed to hold against the test pressure and shall provide an airtight seal. One of the plugs shall have an orifice through which air can be introduced into the sewer. An air supply shall be connected to the orifice. The air supply line shall be fitted with suitable control valves and a pressure gauge for continually measuring the air pressure in the sewer. The pressure gauge shall have a minimum diameter of 3 1/2 inches and range of 0-10 PSIG. The gauge shall have minimum divisions of 0.10 PSIG and an accuracy of ± 0.04 PSIG.

The sewer shall be pressurized to 4.0 PSIG greater than the greatest back pressure caused by ground water over the top of the sewer pipe. At least 2 minutes shall be allowed for the air pressure to stabilize between 3.5 and 4.0 PSIG. If necessary, air shall be added to the sewer to maintain a pressure of 3.5 PSIG or greater.

After the stabilization period, the air supply control valve shall be closed so that no more air will enter the sewer. The sewer air pressure shall be noted and timing for the test begun. The test shall not begin if the air pressure is less than 3.5 PSIG, or such other pressure as is necessary to compensate for ground water level.

The time required for the air pressure to decrease 1.0 PSIG during the test shall be in accordance with the standards of the Authority.

Manholes on sewers to be subjected to air tests shall be equipped with a 1/2 inch diameter galvanized capped pipe nipple extending through the manhole wall, 3" into the manhole and at an elevation equal to the top of the sewer pipe. Prior to the air test the ground water elevation shall be determined by blowing air through the pipe nipple to clear it and then connecting a clear plastic tube to the pipe nipple. The tube shall be suspended vertically in the manhole and the ground water elevation determined by observing the water level in the tube. The air test pressure shall be adjusted to compensate for the maximum ground water level above the top of the sewer pipe to be tested. After all tests are performed and the sewer is ready for final acceptance, the pipe nipple shall be removed and the hole in the manhole wall shall be plugged with hydraulic cement.

If a sewer fails to pass any of the previously described tests, the contractor shall determine the location of the leaks, repair them and retest the sewer. The tests shall be repeated until satisfactory results are obtained.

(B) Pumping Stations

Tests shall be conducted to verify performance curves of each pumping device installed in the system.

(C) Force Mains

When practicable, tests shall be made on sections between valves, or sections not exceeding 2,000 ft. in length. Deadends, bends and other fittings shall have a firm foundation and be securely blocked against the trench walls before testing or completing the backfill as specified.

Before applying test pressure, all air shall be expelled from the pipe. If necessary to accomplish this, taps shall be made at the points of highest elevation, and such openings subsequently closed, prior to test, with tight threaded brass plugs.

Test pressure shall be maintained at 50 pounds per square inch, by pumping water into the pipe, for a period of at least one hour, and for such longer time as may be required to permit a thorough examination to be made on all exposed joints in the section of main being tested.

Leakage, as measured by the quantity of water pumped into the pipe to maintain the test pressure of 50 pounds per square inch during the test period, shall not exceed a rate of 50 U. S. gallons per inch of diameter of main per mile of pipe in 24 hours.

Section 9. Plans

(A) Five (5) sets of plans shall be submitted for approval of all wastewater transmission facilities connecting directly or indirectly to SHVUA sewers.

(B) The following data shall be incorporated in the plans:

- (1) Each set of plans shall be approved and signed by the officially designated municipal engineer, who shall be a registered civil engineer.
- (2) Each set of plans shall bear the seal of the registered civil engineer who is responsible for the plans.
- (3) A listing of all sewer lengths and diameters for the proposed sewer shall accompany the plans.
- (4) A location map indicating the 1/4 section in which the project is located.
- (5) When more than one sheet is required for the plan, a small scale overall plan shall be shown.
- (6) Two bench marks shall be indicated on each plan sheet.
- (7) On instances where the Authority has no record of the existing sewer to which a proposed sewer is to be connected or where the existing sewer is not shown in accordance with previously approved plans, as built plans of the existing sewer and evidence of acceptable leakage tests shall also be submitted for approval.

- (8) All existing sewer inverters must be field measured and shall be designated on the plan.
- (9) A profile including inverters, gradient, length and drop connections shall be shown for each run of sewer or force main.
- (10) Existing and proposed utilities shall be shown on plan and profile.
- (11) Manholes shall be numbered on plan and profile.
- (12) The locations of existing or proposed stoppers and bulk heads shall be indicated on the plan.
- (13) Proposed or existing curb or sidewalk grades of streets adjacent to the sewer shall be shown on the profile.
- (14) Easement grades shall be shown for existing and proposed houses where the sewer is less than 10 feet deep or a note stating no basements, or the method of serving basements shall be included.
- (15) Allowable types of pipe, joints and stoppers for public and building sewers shall be indicated on the plans.
- (16) Dead end sewers shall be designated as follows: "To facilitate future construction only, no house leads allowed until terminus manhole is constructed."
- (17) An easement shall be designated on the plan for each run of public sewer not in public right-of-way. The minimum easement shall be 12 feet, however the rear easement on subdivision lots may be reduced to 6 feet where there is no contiguous subdivision.
- (18) Details of pipe bedding, building sewers, drop connections, bulkheads, manholes, manhole covers, and other appurtenances shall be submitted with the plans.
- (19) The following notes shall appear on the plans:
 - (a) No connection receiving storm water, surface water, or ground water shall be made to sanitary sewers.
 - (b) Infiltration for any section of sewers between manholes shall not exceed 200 gals/inch dia/mile/hours.
 - (c) All elevations are based on Wayne County Datum, (U.S.C.G.S.).
 - (d) No footing drains shall be connected to the building sewer.
 - (e) Differential of excavation around existing manholes shall not exceed 6 feet.

Section 10. Existing Sewer Systems

(A) Alterations to Existing System:

(1) General

No work shall be performed on existing sewer systems which would change the capacity of the system or would result in non conformity with these Rules and Regulations, except by written permission of the Authority.

(2) Manholes

When it is necessary to excavate adjacent to manholes or similar structures, the excavation shall extend around the entire perimeter, so that the differential of excavation on opposite sides of the structure does not exceed 6 feet, unless written permission is obtained from the Authority.

(3) Siphons

Siphons shall not be constructed in existing sewers, except where it can be demonstrated to the satisfaction of the Authority that such siphons will not have a detrimental effect on the maintenance of the sewer nor the hydraulic gradient of the system.

(B) Approval of Existing Systems as Public Systems:

- (1) Sewer systems not having been previously approved as public sewers may be accepted as public sewers provided they meet all requirements of these Rules and Regulations.
- (2) The Authority shall perform or designate a registered engineer to perform such tests on the sewer as it deems necessary. All costs of performing such tests shall be borne by the owner of the facility.

Section 11. Combined Sewer Systems

(A) Existing combined sewer systems will be permitted to continue in service subject to the following restrictions:

- (1) Connections from the combined system shall be through adjustable regulators which limit flow into the intercepting sewer to 325% of the average daily dry weather flow rate, unless otherwise permitted by the Authority.
- (2) The Authority shall have the jurisdiction for the operation and maintenance of all regulators.
- (3) The municipality shall report water consumption by regulator districts.
- (4) The municipality shall agree to pay charges for operation, maintenance and updating of regulators, as established by the Authority.
- (5) New construction shall not be subject to the design and construction requirements pertaining to separate wastewater transmission facilities.

(B) Sanitary sewer systems may not outlet into existing combined sewers except when the cost of a separate sanitary intercepting sewer is regarded by the Authority to be disproportionate to the cost of the sanitary system and when an approved preliminary plan for a sanitary outfall or sewer separation is on file with the Authority.

ARTICLE IV

DESIGN AND CONSTRUCTION REQUIREMENTS FOR STORMWATER FACILITIES

Pursuant to Article V, Section 2.01, most storm water facilities are prohibited from connecting directly or indirectly to SHVUA system. Any stormwater facilities which are connected shall be designed in accordance with the following minimum requirements. The Authority may deny a connection permit for a stormwater facility which is not in substantial compliance with these design and construction standards and conditions, or for which a satisfactory compliance schedule cannot be agreed upon.

Section 1. General

(A) Construction shall not commence until all applicable local, state, and federal permits have been obtained.

(B) For items not specifically covered herein, the design, in general, shall conform to the prevailing standards of the Authority.

Section 2. Right-of-Way Requirements

(A) The following minimum right-of-way widths are required for established SHVUA drains and natural water courses that will be utilized.

(1) Open drain and water courses whose maximum bank to bank width exceeds 30 feet shall have a right-of-way to the extreme width of the drain, plus 30 feet. The easement shall be centered on the centerline of drain or water course.

- (2) Open drains and water courses whose maximum bank to bank width is less than 30 feet shall have a right-of-way equal to the extreme width of drain, plus 24 feet. The easement shall be centered on centerline of drain or water course.
- (3) Enclosed drains whose internal diameter is 8 feet or less shall have a right-of-way of 20 feet centered on the centerline of the enclosure.
- (4) Enclosed drains whose internal diameter exceeds 8' - 0" shall have the right-of-way of 25 feet centered on the centerline of the enclosure.

(B) The above widths shall govern generally. However, if the Authority determines that additional right-of-way is required for proper construction, or because of special circumstances, such facts shall be made known after a review of the preliminary layout by the Authority. Exceptions to the above right-of-way requirements may be made only at the discretion of the Authority.

Section 3. Drainage Districts

In accordance with the Drain Code, Act 40 of the Public Acts of 1956, as amended, the drainage of proposed subdivisions shall be contained within the Drainage District or Drainage Districts of the established SHVUA drain, or if there is no established drainage district, then within the limits of the natural drainage basin. When needed, minor alterations of the legal limits of established drainage district shall be made pursuant to the procedures set forth in the Drain Code.

Section 4. Design Flows

(A) Run-off Determination

The Rational Method shall be used and is expressed as: $Q = CIA$.

Where Q is the peak flow rate in cubic feet per second (C.F.S.), C is the runoff coefficient, I is the rainfall intensity in inches per hour (in/hr), and A is the drainage area in acres.

Flow rates shall be based on adjusted runoff coefficients, incremented areas, and adjusted rainfall intensities applicable to those segments of the improvements which are being designed. Values for the various terms used in the Rational Method Formula shall be determined as follows:

(1) A composite runoff coefficient based on the percentage of types of surface with respect to the type of development shall be used.

(2) Rainfall, intensity-duration relationships for various frequencies have been developed by the U.S. Department of Commerce - Weather Bureau for the Detroit area. Rainfall relationships extracted from Technical Paper #25, U.S. Department of Commerce - Weather Bureau, December, 1955, shall be used.

(3) The time of concentration of the design storm will vary with slope, surface cover and the length of path of the surface flow. Other variables including anticipated rainfall intensity and infiltration capacity of the soil and surface cover will also affect the time of concentration. An initial inlet time of concentration of 15 minutes shall be used for multiple and commercial/industrial land used while 20 minutes shall be used for single family residential land use. The time of concentration for unimproved lands (in minutes) should be derived from U. S. Department of Agriculture or FAA methods.

(B) Detention

Detention facilities will be required if the limitation of discharge into the SHVUA drain or sewer is deemed necessary by the Authority.

Section 5. Sewers

(A) The minimum size of storm sewer and culvert pipe shall be 12-inch diameter.

(B) The following general pipe materials shall be used for storm sewer and culvert pipe:

(1) Reinforced Concrete Pipe - ASTM C76

(2) Reinforced Concrete Elliptical Pipe - ASTM C507

(3) Non-Reinforced Concrete Pipe - ASTM C14

(4) Other materials which comply with applicable Authority standards may be used upon acceptance by the Authority.

(C) Bituminous type joint sealer shall be used except wherever the design hydraulic gradient is above the top of the pipe or at locations determined by the Authority, internal rubber type gaskets shall be used.

(D) Concrete or riprap headwalls with erosion protection shall be placed at the inlet and outlet ends of all sewer outlets and culverts in accordance with prevailing Authority standards.

(E) A minimum of three vertical feet of clearance from the top of the pipe to the invert of a drain being crossed shall be maintained unless otherwise approved by the Authority.

Section 6. Construction Requirements

(A) Proper construction practices shall be employed to protect water courses from siltation and obstruction to flow.

(B) Construction materials and methods shall comply with the current requirements of the Authority.

ARTICLE V

DISCHARGE OF WASTEWATER INTO PUBLIC SEWERS

This article has as its purpose the protection of the public health and safety by abating and preventing pollution through the regulation and control of the quantity and quality of wastewater admitted to or discharged into a publicly owned treatment works owned or operated by the SHVUA, wherein the Authority is the Control Authority as defined in 40 CFR 403.12(a) and is administering the Federally Mandated Industrial Pretreatment Program. Its further purpose is to allow the SHVUA to comply with all applicable State and Federal laws as required by the Federal Clean Water Act of 1972, as amended, and the General Pretreatment Regulation (40 CFR 403).

This article is enacted in accordance with the authority and requirements of the Federal Water Pollution Control Act of 1972 (Public Law 92-500) as amended, and the NREPA and the CDBPA.

Section 1. General Provisions

1.01 Purpose and Policy

This article sets forth uniform requirements for dischargers into the publicly owned wastewater collection and treatment systems, and enables the SHVUA to protect the public health in conformity with all applicable State and Federal laws relating thereto.

The objectives of this article listed in priority order are:

(A) To prevent the introduction of pollutants into the public owned wastewater system which will interfere with the normal operation of the system or which will interfere with the use or disposal of the wastewater sludge by the POTW.

(B) To prevent the introduction of pollutants into the publicly owned wastewater system which do not receive adequate treatment in the POTW, and which will pass through the system into receiving waters or the atmosphere or otherwise be incompatible with the system;

(C) To improve the opportunity to recycle and reclaim wastewater and

sludge from the system.

This article provides for the regulation of discharges into publicly owned wastewater system through the issuance of permits, execution of binding contracts, and enforcement of these Rules and Regulations.

Section 2 Requirements

2.01 Discharge Prohibitions

Users introducing pollutants into a POTW, whether or not the user is subject to other national pretreatment standards or any national, state or Authority pretreatment program requirement shall be subject to the following General and Specific Prohibitions:

2.01.1 General Prohibitions

No user shall discharge or cause to be discharged, directly or indirectly, any substance or wastewater which will pass through or cause interference with the operation of the POTW.

2.01.2 Specific Prohibitions

A user discharging any of the following is subject to fines in accordance with Section 6.05 and/or 6.10.2 of this Article, imprisonment or both:

(a) Any liquids, solids or gases which by reason of their nature or quantity are, or may be, sufficient either alone or by interaction to cause fire or explosion or be injurious in any other way to the operation of the POTW including, but not limited to, wastewaters with a closed cup flash point of less than 140 degrees Fahrenheit (140° F) or 60 degrees Centigrade (60° C) as determined by test methods specified in 40 CFR 261.21, as amended. Examples of these substances are, but not limited to: gasoline, kerosene, naphtha, benzene, toluene, xylene, ethers, alcohols, ketones, aldehydes, peroxides, chlorates, carbides, hydrides and sulfides.

(b) Any solid or viscous substances which will solidify and cause obstruction to the flow in a sewer or other interference with the operation of the wastewater treatment facilities such as, but not limited to: grease, tar, ashes, bones, cinders, sand, straw, metal, glass, wood, plastics, any material which can be disposed of as trash or any insoluble particles greater than one-half inch (1/2" or 1.27 CM) in any dimension.

(c) Any wastewater having pH lower than 5.0 or greater than 11.5 or having the potential to cause corrosive damage to the sewage system structures and equipment or health hazards to worker safety.

(d) Any pollutant which either singly or by interaction with any other substances, may cause a public nuisance or result in the presence of toxic gases, vapors or fumes within the sewerage system in a quantity that may cause acute worker health and safety problems.

(e) Any slugload of any pollutant, including oxygen demanding pollutants, which is released in a single extraordinary discharge episode of such volume or strength as to cause interference or pass through.

(f) Any wastewater containing radioactive wastes or isotopes of such half-life or concentration which exceed limits established by applicable State or Federal regulations.

(g) Any wastewater or heat which will inhibit biological activity in the treatment plant(s) resulting in interference, but in no case in such quantities that the temperature at the POTW Treatment Plant(s) exceeds 40 degrees Centigrade (104° F) or with a temperature at the introduction into the public sewer system which exceeds 66 degrees Centigrade (66° C) or 151 degrees Fahrenheit (151° F).

(h) Any substance with objectionable color not removed in the treatment process; such as, but not limited to, dye wastes and vegetable tanning solutions.

(i) Petroleum oil, non-biodegradable cutting oil, or products of mineral oil origin in amounts that will cause interference or pass through.

(j) Sludges from pretreatment processes, potable water treatment, municipal or industrial wastes, which are not completely amenable to conventional wastewater treatment.

(k) Any substance which may cause the POTW's effluent or treatment residues, sludges, or scums to be unsuitable for reclamation and reuse or interfere with the reclamation process.

(l) Any trucked or hauled pollutants, except as agreed to and discharged at points designated by the SHVUA.

(m) Any wastewater which contains an insoluble substance having a specific gravity greater than 2.65.

(n) Any substance which will cause the POTW to violate its NPDES Permit, the Receiving Water quality standards, the National Air Quality Standards or any other applicable permit, order, statute, regulation or limitation.

(o) Any discharge from roof downspouts, surface drains or other sources of uncontaminated surface runoff or groundwater to a building sewer or building drain which in turn is connected directly or indirectly to a public sanitary sewer. This provision does not apply to an existing combined sewer area.

(p) Any wastewater which exceeds the local limitations set forth in Appendix A, which is incorporated into and made a part of these Rules and Regulations, except as provided in Section 2.01.3 of this Article below.

2.01.3 BOD Mass Based Limits

For BOD, the Authority reserves the right to impose mass based limits in lieu of the concentration limits set forth in Appendix A, where the Authority determines a mass based limitation is appropriate. A user will be considered to be in compliance with the BOD limit contained in these Rules and Regulations if the user complies with the mass loading limitations and related conditions specified in the user's Class D permit. Affirmative Defenses available to a user are set forth in Section 6.09 of this Article.

2.02 PRETREATMENT REQUIREMENTS

2.02.1 National Categorical Pretreatment Standards

The National Categorical Pretreatment Standards found in 40 CFR Chapter I, Subchapter N, Parts 405-471, are hereby incorporated into these Rules and Regulations and made a part hereof.

Industrial users shall provide necessary wastewater treatment as required to comply with the most stringent of these Rules and Regulations, Federal Pretreatment Standards, as established by 40 CFR Chapter N, Subpart I, State Standards and Permit Conditions, and shall achieve compliance with all National Categorical Pretreatment Standards within the time limitations as specified by the Federal Pretreatment Regulations, and with any other pretreatment standards by applicable deadlines.

Any facilities required to pretreat wastewater shall be provided, operated, and maintained at the industrial user's expense. Detailed plans showing the pretreatment facilities and operating procedures shall be submitted to the Authority for review, and shall be approved by the Authority before construction of the facility. The review and approval of plans and operating procedures does not relieve the industrial user from complying with the provisions of these Rules and Regulations and permit conditions. Any subsequent changes in the pretreatment facilities or method of operation shall be reported to and approved by the Authority prior to the industrial user's initiation of the changes.

2.02.2 New Source Compliance Deadline

New sources shall install and have in operating condition and shall "start-up" all pollution control equipment required to meet applicable pretreatment standards before beginning to discharge. Within the shortest feasible time (not to exceed 90 days), new sources must meet all applicable pretreatment standards.

2.02.3 Conversion of Mass Limitations

When the limits in a categorical pretreatment standard are expressed only in terms of mass of pollutant per unit of production, the Authority may convert the limits to equivalent limitations expressed either as mass of pollutant discharged per day or effluent concentration for purposes of calculating effluent limitations applicable to individual industrial users.

Equivalent limitations calculated in accordance with paragraphs (C)(3) and (C)(4) of 40 CFR 403.6 shall be deemed pretreatment standards for the purposes of Section 307(d) of the Act of Part 403. Industrial users will be required to comply with the equivalent limitations in lieu of the promulgated categorical standards from which the equivalent limitations were derived.

2.03 Dilution Prohibited

Except where expressly authorized to do so by an applicable pretreatment standard or requirement, no industrial user shall ever increase the use of process water, or in any other way attempt to dilute a discharge as a partial or complete substitute for adequate treatment to achieve compliance with a pretreatment standard, local limitation or requirement. The Authority may impose mass limitations on industrial users which are using dilution to meet applicable pretreatment standards, local limitations or requirements, or in other cases where the imposition of mass limi-

tations is appropriate.

2.04 Spill Prevention and Slug Control Plan

(A) Industrial users shall provide protection from accidental discharge of substances which may cause interference at the wastewater treatment plant(s) by developing spill prevention plans. Where necessary, facilities to prevent accidental discharges shall be provided and maintained at the discharger's expense. Spill prevention plans shall be approved by the Authority prior to construction.

Authority review and approval of such plans in no way relieves the discharger of any liability associated with the efficiency or inefficiency of the facilities.

(B) The Authority shall evaluate each significant industrial user at least once every two years, and other industrial users as necessary, to determine whether a slug control plan is needed. If the Authority decides a slug control plan is needed, plans for such a plan shall be submitted to the Authority for approval.

Approval of such plans shall not relieve the industrial user from complying with applicable laws and regulations pertaining to the use, storage or transportation of hazardous substances. Slug control plans shall contain at least, the following:

(1) Description of discharge practices, including non-routine batch discharges.

(2) List of chemicals stored.

(3) Procedures to immediately notify the Authority of slug discharges, including any discharges prohibited in Section 2.01, with procedures for follow-up written notification within five days.

(4) Provisions for preventing adverse impact from accidental spills, inspection and maintenance of storage areas, handling and transfer of chemicals, loading and unloading operations, control of plant site runoff, worker training, containment structures, procedures for containing toxic organic pollutants and emergency response measures and equipment.

(C) Signs shall be permanently posted in conspicuous places on the discharger's premises, advising employees whom to call in the event of a slug or accidental discharge at a flow rate and/or pollutant concentration which will cause interference with the POTW or a pass through. Employers shall instruct all employees who may cause or discover such a discharge with respect to emergency notification procedures.

2.05 Notification

2.05.1 Notification of Changed Discharge

All users shall promptly notify the Authority in advance of any substantial change in the volume or character of pollutants in its discharge including all of the following, if applicable:

(a) Groundwaters that are purged for remedial action programs.

(b) Groundwaters containing pollutants that infiltrate into the sewers.

(c) The listed or characteristic hazardous wastes for which the user has submitted initial notification pursuant to Section 2.05.4 of this Article.

2.05.2 Notification of Slug or Spill Discharge

(A) (1) In the case of any discharge in violation of these Rules and Regulations or permit conditions, and in the case of any discharge that could cause problems to the POTW, including any slug loadings, as defined in these Rules and Regulations, the industrial user shall, within one hour of becoming aware of such discharge, notify the Authority of the discharge by telephone at the telephone number listed in the User's Wastewater Discharge Permit. The notification shall include:

(a) The date, time, location and duration of the discharge.

(b) The type of waste, including concentration and volume; and

(c) Any corrective actions taken by the user.

(2) Within five days following such a discharge the user shall submit a written report describing the cause of the discharge and the measures that will be taken by the user to prevent similar future discharges.

2.05.3 Self-Monitoring Violations

When sampling performed by an industrial user indicates a violation, the user shall notify the Authority within 24 hours of becoming aware of the violation by contacting the wastewater plant superintendent. The user shall repeat sampling and pollutant analysis and submit, in writing, the results of this second analysis within 30 days of the first violation, except if:

(A) The Authority performs sampling at the facility at a frequency of at least once per month, or

(B) The Authority performs sampling between the time the user performs the initial sampling and the time when the user receives the results of this sampling.

2.05.4 Hazardous Waste Notification

Industrial users shall notify the Authority, the EPA Regional Waste Management Division Director, and the State Hazardous Waste Authorities in writing of any discharge into the POTW of a substance, which, if otherwise disposed of, would be a hazardous waste under 40 CFR Part 261. Such notification must include the name of the hazardous waste as set forth in 40 CFR Part 261, the EPA Hazardous Waste Number, the type of discharge (continuous, batch, or other), and other requirements set forth in 40 CFR 403.12 (P)(1).

2.05.5 Notification of Operating Upsets

(A) If a discharger experiences an upset in operations which places that discharger in a temporary state of non-compliance with these Rules and Regulations or with a condition of its Waste-water Discharge Permit, the discharger shall inform the Authority by contacting the wastewater plant superintendent within 24 hours of first becoming aware. The discharger shall file a written report with the Authority within five (5) days. That report shall specify:

(1) Description of the upset, its cause, and impact on the discharger's compliance status.

(2) Duration of non-compliance, including exact dates and times of non-compliance, and if the non-compliance continues, the time by which compliance is reasonably expected to resume.

(3) All steps taken or to be taken to reduce, eliminate and prevent recurrence of such an upset or other conditions of non-compliance.

(B) An upset shall constitute an affirmative defense to an action brought for non-compliance with Categorical Pretreatment Standards if the requirements of 40 CFR 403.16 (C) are met.

(C) In any enforcement proceeding the industrial user seeking to establish the occurrence of an upset shall have the burden of proof.

(D) The industrial user shall control production of all discharges to the extent necessary to maintain compliance with Categorical Pretreatment Standards and/or local limits upon reduction, loss, or failure of its treatment facility until the facility is restored or an alternative method of treatment is provided. This requirement applies in the situation where, among other things, the primary source of power of the treatment facility is reduced, lost or fails.

2.05.6 Notification of Bypass

(A) An industrial user may allow any bypass to occur which does not violate any Pretreatment Standards, requirements or local limits, but only if it also is for essential maintenance to assure efficient operation. These bypasses are not subject to the provision of paragraphs (B) and (C) of this section.

(B) Notice.

(1) If an industrial user knows in advance of the need for a bypass, it shall submit prior notice to the Authority, if possible, at least ten (10) days before the date of the bypass.

(2) An industrial user shall submit oral notice of an unanticipated bypass that exceeds applicable Pretreatment Standards, requirements or local limits to the Authority by contacting the wastewater plant superintendent within 24 hours from the time the industrial user becomes aware of the bypass. A written report shall also be provided within 5 days of the time the industrial user becomes aware of the bypass. The written report shall contain a description of the bypass and its cause; the duration of the bypass, including exact dates and times, and, if the bypass has not been corrected, the anticipated time it is expected to continue; and steps taken or planned to reduce, eliminate, and prevent recurrence of the bypass. The Authority may waive the written report on a case-by-case basis if the oral report has been received within 24 hours.

(C) Prohibition of Bypass

(1) Bypass is prohibited, and the Authority may take enforcement action against an industrial user for a bypass, unless:

(a) Bypass was unavoidable in order to protect the public health, prevent loss of life, personal injury, or severe property damage;

(b) There were no feasible alternatives to the bypass, such as the use of auxiliary treatment facilities, retention of untreated wastes, or maintenance during normal periods of equipment downtime. This condition is not satisfied if adequate back-up equipment should have been installed in the exercise of reasonable engineering judgment to prevent a bypass which occurred during normal periods of equipment downtime or preventative maintenance; and

(c) The industrial user submitted notices as required under paragraph (B) of this section.

(2) The Authority may approve an anticipated bypass, after considering its adverse effects, if the Authority determines that it will meet the three (3) conditions listed in paragraph (C)(1) of this section.

2.06 Records Retention

A discharger subject to these Rules and Regulations shall retain, preserve and make available upon request of the SHVUA, State or USEPA for no less than three (3) years, all records books, documents, memoranda, reports, correspondence, and all summaries thereof, relating to monitoring, sampling and chemical analyses made by or in behalf of a discharger in connection with its discharge.

All records which pertain to matters which are the subject of conciliation action or any other enforcement or litigation activities brought by the Authority pursuant hereto shall be retained and preserved by the discharger until all enforcement activities have concluded and all periods of limitation with respect to any and all appeals have expired.

All users shall also retain any records when requested to do so by a representative of the EPA, State or SHVUA.

2.07 Sample Analysis

All sampling and analyses of the characteristics of samples, to which reference is made in these Rules and Regulations, shall be performed pursuant to laboratory procedures set forth in 40 CFR 136 "Guidelines for Establishing Test Procedures for Analysis of Pollutants" or methods set forth in the latest edition, at the time of analysis, of "Standard Methods for the Examination of Water and Wastewater" prepared and published jointly by the APHA, AWWA and WPCF.

Where these two references are in disagreement on procedures for the analysis of a specific pollutant, the methods given in 40 CFR 136 shall be followed.

Where 40 CFR 136 does not contain sampling and analytical techniques for the pollutant in question, or where the administrator determines that the part 136 sampling and analytical techniques are inappropriate for the pollutant in question, sampling and analysis shall be performed by using validated analytical methods or any other applicable sampling and analytical procedures approved by the administrator.

2.08 Confidential Information

(A) Information on an industrial user derived from written reports, questionnaires, permits, monitoring programs and inspections shall be available to the public and other governmental agencies without restriction unless the user specifically requests and is able to demonstrate to the Authority that release of such information would disclose trade secrets or secret processes of the industrial user.

The user, furnishing the report must clearly mark "Confidential" any portion of a report which contains trade secrets or secret processes. Confidential information shall not be released to the public, but shall be made available upon request to the State and USEPA for uses related to these Rules and Regulations, the NPDES Permit or the Pretreatment Program in judicial review or enforcement proceedings involving the person furnishing the report. However, the information provided shall be treated as confidential by the aforementioned agencies.

(B) All effluent data submitted to the Authority will not be recognized as confidential.

(C) Requests regarding right to inspect, copy or receive copies of all information with respect to an industrial user, on file with the Authority, shall be processed in accordance with the Michigan Freedom of Information Act (MCL 15.231 et seq.)

2.09 Right of Entry

Authorized representatives of the Authority, the State and USEPA, upon presentation of credentials, shall have the right to enter the premises of any user who may be subject to the requirements of these Rules and Regulations for the purpose of inspecting, sampling, examining records or copying records in accordance with Article VII of these Rules and Regulations. Denial of entry shall constitute a violation of these Rules and Regulations and be subject to enforcement action.

implementation of the industrial pretreatment program, sampling, testing, handling and treating the wastes not covered by existing wastewater charges in addition to the annual industrial surveillance fee referred to above.

(d) Cost of handling and treating wastewater into the sewer, not otherwise provided.

The above charges and fees are separate from any sewage or excess sewage fees collected pursuant to Michigan Public Act 185 of 1987.

3.03 Non-Residential User Surcharge

The SHVUA shall adopt as a part of its schedule of rates and charges, a non-residential user surcharge to be collected by the local communities in conjunction with the basic sewage disposal charges from all non-residential users as identified by the local community. These charges are to be paid to the SHVUA as part of the sewage disposal billing process.

3.04 Surcharges

Users discharging wastewater containing excess compatible pollutants may be assessed a surcharge to recover the additional costs incurred for treating said excess compatible pollutants. The threshold concentrations for BOD, TSS and P are as follows:

BOD 275 MG/L
TSS 350 MG/L
P 12 MG/L

These surcharges shall be calculated and assessed in accordance with a surcharge policy as approved by the Authority.

Such surcharges shall be credited to the treatment facility's operation fund.

3.05 Rate Review

Such charges and fees may be changed from time to time by the SHVUA to provide for recovery of the full actual cost of these programs from the users thereof. Before submitting a proposed change for SHVUA approval, the SHVUA shall provide all proposed fee and surcharge changes, and shall provide an opportunity to review the basis for them, including necessary financial statements, and to provide an opportunity to the municipalities to object or comment upon those proposed changes in fees and surcharges. The municipalities shall be given the opportunity to review and audit pertinent Authority records. The Authority books and records shall be kept in accordance with generally accepted Accounting Standards.

3.06 Late Filing Fees

A user failing to timely submit any reports as required by Section 5 of this Article, or as required by a Permit issued in accordance with these Rules and Regulations on the date said report is required to be submitted, shall be subject to a late filing fee as set forth in the Schedule of Rates and Charges as adopted by the Authority for sewerage systems owned and operated by the Authority, from time to time.

Failure to pay the late filing fees shall subject the user to enforcement actions as determined appropriate by the Authority including the revocation of any permits issued in accordance with these Rules and Regulations.

SECTION 4 WASTEWATER DISCHARGE PERMITS

4.01 Permit Application

(A) Prior to issuing an industrial or commercial certificate of occupancy, a community contracting for wastewater services with the Authority shall require each industrial and commercial discharger to file an Industrial/Commercial Waste Questionnaire with the Authority. The Questionnaire shall serve as the application for obtaining a Wastewater Discharge Permit. All industrial users proposing to connect to or to discharge sewage, industrial wastes and other wastes to the POTW shall, at least 90 days prior to said connection, complete and file an Industrial/Commercial Waste Questionnaire in the form prescribed by the Authority with a copy to the local community. Existing industrial or commercial dischargers who do not have a permit, shall complete and file this Questionnaire with the Authority within 180 days after the effective date of these Rules and Regulations.

(B) The Authority will evaluate the data furnished by the user and may require additional information to be submitted. After full evaluation of the data furnished, the Authority shall determine whether the facility is a significant industrial user (SIU) or a non-significant industrial user.

(1) All significant industrial users, as defined by these Rules and Regulations and 40 CFR 403.3, shall be required to obtain a Wastewater Discharge Permit from the Authority in order to discharge any wastewater into the SHVUA sewerage system.

(2) If the Industrial/Commercial Waste Questionnaire evaluation determines that the industrial user is a non-significant industrial user, a Permit will not be required, provided, however, that the Authority may require a permit for the purpose of imposing special conditions on the discharge pursuant to Section 4.07.

(3) Any user is subject to fine, imprisonment, or both, who discharges wastewater, industrial wastes or other wastes to a sewer tributary to a wastewater facility subject to the jurisdiction of the SHVUA or to its POTW's, without first complying with the provisions of this Section.

4.02 Permit Contents

Wastewater Discharge Permits shall contain, as appropriate, the following:

(A) Effective and expiration dates of the Permit; (duration not greater than 5 years);
(B) Fees and charges to be paid as required by the Authority;
(C) Discharge limitations based on the more stringent of Categorical Pretreatment Standards, Local Limitations as established in these Rules and Regulations, and State and Local Law;
(D) Limits on average or maximum rate or time of discharge or requirements for flow regulation or equalization, or any combination of those limits or requirements;
(E) Requirements for installation, operation and maintenance of the necessary pretreatment equipment including sampling facilities;
(F) Self-monitoring, sampling, reporting, notification and record keeping requirements, including an identification of the pollutants to be monitored, sampling location, sampling frequency, and sample type, based on the applicable General Pretreatment Standards in 40 CFR 403, Categorical Pretreatment Standards, Local Limits and State and Local Law;

(G) Compliance schedules;

(H) Requirements for submission of technical reports or discharge reports if different from those prescribed by these Rules and Regulations;

(I) Requirements for notification of the Authority of any new introduction of wastewater constituents or any substantial change in the volume or character of the wastewater constituents being introduced into the Wastewater Treatment System;

(J) Requirements for notification of spills, potential problems to the POTW including slug loadings, upsets or violations;

(K) Statement of applicable civil and criminal penalties for violation of Pretreatment Standards, requirements, Local Limits, and any applicable compliance schedule;

(L) Requirements for collecting, retaining and providing access to plant records relating to the user's discharge and for providing entry for sampling and inspection;

(M) Requirements to develop and implement spill and slug control plans;

(N) Statement of non-transferability;

(O) Conditions for modification or revocation of the permit;

(P) Other conditions as deemed appropriate by the Authority to ensure compliance with these Rules and Regulations, State and Federal Pretreatment Standards and Requirements.

4.02.1 Additional Permit Conditions

In the event that the Authority determines that a user is discharging pollutants in quality, quantity or in locations that can cause problems to the POTW or the receiving stream, the Authority has the authority to develop and enforce effluent limits applicable to the user.

4.03 Permit Duration

Wastewater Discharge Permits are issued for a five year period unless site specific constraints dictate a shorter time period, but in no case shall the duration exceed 5 years.

Existing Permittees who received a Permit from the County of Wayne, shall continue to operate under said Permit, but shall apply for Permit reissuance a minimum of 90 days prior to the expiration of their existing Permit. Upon timely application for reissuance of a Permit in accordance with this paragraph, the expired Permit shall be automatically extended until a final decision regarding the application is made by the Authority.

4.04 Permit Issuance and Reissuance

The Authority shall issue, or reissue, as the case may be, a wastewater discharge permit in draft form to the user for a 30-day review and comment period. During this period, the user may submit written comments on the draft permit to the Authority. After the 30-day review and comment period and the Authority's consideration of any comments received, the final permit may be issued. The user may appeal any final permit pursuant to Article VII of these Rules and Regulations.

4.05 Permit Modification

The Authority may modify a Wastewater Discharge Permit in order to:

- (A) Require compliance with National Categorical Pretreatment Standards. Permit modification shall occur within 9 months of the promulgation of the applicable standard. Where an industrial user, subject to a National Categorical Pretreatment Standard has not previously submitted a questionnaire as required by Section 5.01, the industrial user shall submit a completed questionnaire within 180 days after the promulgation of the applicable National Categorical Pretreatment Standard by the EPA.
- (B) Assure compliance with the POTW NPDES Permit.
- (C) Incorporate new conditions or parameters of concern due to substantial change in the user's operations or new information concerning existing conditions.
- (D) Incorporate changes in Federal or State Laws or changes in the Authority's approved Industrial Pretreatment Program.
- (E) Change or terminate special conditions of the Permit, including but not limited to monitoring frequency or parameters to be monitored.
- (F) Correct any omissions or typographical errors.
- (G) Reflect changes in the monitoring location.
- (H) To address a user's noncompliance with portions of an existing permit.
- (I) For any other reason, if the Authority reasonably believes the modification is necessary to ensure either that the POTW complies with its NPDES permit or that the POTW does not negatively affect the receiving water quality standards, the national air quality standards or any other applicable permit, order, statute, regulation or limitation.

The Permittee shall be given written notice of any proposed changes in its Permit, at least 30 days prior to the effective date of change, unless a shorter time is necessary to protect the treatment plant, protect human health or the environment.

4.06 Permit Transfer

Wastewater Discharge Permits shall be issued to a specific discharger for a specific operation and may not be assigned or transferred to another discharger or to another location without the prior written approval of the Authority of the change, and the written approval of the Authority.

4.07 Special Condition Discharge Authorization

For any user wishing to discharge wastewater which does not meet the requirements of Section 4.01 B.1, the AUTHORITY may, at its discretion, issue a permit with special conditions as part of its authorization to discharge. These special conditions shall apply to discharges, determined by the AUTHORITY, to prevent any potential adverse affect on the POTW's operations or any provision of these Rules and Regulations. It may contain the following conditions as deemed necessary:

- (A) Duration of Permit (in no case more than 5 years).
- (B) Statement of nontransferability.
- (C) Discharge limits based on applicable General Pretreatment Standards in 40 CFR 403.3, Categorical Pretreatment Standards, Local Limits or State Regulations and Statutes.
- (D) Self-monitoring, sampling, reporting, notification and record keeping requirements, including a listing of pollutants to be monitored, sample location, sampling frequency and sample type.
- (E) Statement of applicable civil and criminal penalties for violation of special conditions.

4.08 Permit Revocation

The SHVUA may, with written notice and pursuant to procedures specified in Sections 6.06 and 6.07, revoke the Discharge Permit for the following reasons:

- (A) Violation of the terms and conditions of the Permit, Local Ordinances, State and Federal Laws, Statutes and Regulations.
- (B) Failure to factually report the wastewater constituents and characteristics of the discharge.
- (C) Failure to report significant changes in wastewater constituents and characteristics.
- (D) Refuse reasonable access to the Permittee premises by Authority for the purpose(s) of inspection or monitoring.

Section 5. Reporting

5.01 Baseline Monitoring Reports

Within 180 days after the effective date of a Categorical Pretreatment Standard, or 180 days after the final administrative decision made upon a category determination submission under 40 CFR 403.6(A)(4), whichever is later, existing industrial users subject to such Categorical Pretreatment Standards and currently discharging to or scheduled to discharge to the Authority shall be required to submit to the Authority a report which contains the information listed in 40 CFR 403.12(B) (1) - (7), at least 90 days prior to commencement of discharge. New sources, and sources that become industrial users subsequent to the promulgation of an applicable Categorical Standard, shall be required to submit to the Authority a report which contains the information listed in 40 CFR 303.12(B) (1) - (5). New sources shall also be required to include in this report information on the method of pretreatment the source intends to use to meet applicable pretreatment standards. New sources shall give estimates of the information requested in 40 CFR 403.12(B) (4) and (5).

Industrial users subject to Categorical Pretreatment Standards shall submit an additional baseline monitoring report 90 days prior to commencing discharge from any new process regulated by said standards.

Any changes to information requested under this Section shall be submitted to the Authority within sixty (60) days of any such changes.

5.02 Compliance Date Report

Within 90 days following the date for final compliance with applicable Categorical Pretreatment Standards or, in the case of a new source, following commencement of the introduction of wastewater into the POTW, any user subject to Categorical Pretreatment Standards shall submit to the Authority a report containing the information described in 40 CFR 403.12(B) (4)-(6). Where equivalent mass or concentration limits are established by the Authority for a user, this report shall contain a reasonable measure of the user's long-term production rate. Where a user is subject to Categorical Pretreatment Standards expressed in terms of allocable pollutant discharge per unit of production, the report shall include the user's actual production during the appropriate sampling period.

The report shall state whether the applicable pretreatment standards are being met on a consistent basis and, if not, what additional O & M and/or pretreatment is necessary to bring the user in compliance with the applicable pretreatment standards. This statement shall be signed by an authorized representative of the industrial user.

5.03 Periodic Compliance Reports

The reports required by this section shall be based on the user's self-monitoring, performed during the period covered by the report, and performed in accordance with Section 2.07 of these Rules and Regulations.

5.03.1 Categorical Industrial Users

(A) Any user subject to a Categorical Pretreatment Standard, after the compliance date of such pretreatment standard, or in the case of a new source, after commencement of the discharge into the POTW, shall submit to the Authority on a quarterly basis, unless required more frequently in the Pretreatment Standard or by the Authority, a report indicating the nature and concentration, of pollutants in the effluent which are limited by such Pretreatment Standards. In addition, this report shall include the measured or estimated average and maximum daily flows for the reporting period.

(B) The Authority may impose mass limitations on users which are using dilution to meet applicable pretreatment standards, or in other cases where the imposition of mass limitations are appropriate. In such cases, the report required by subparagraph (A) above shall indicate the mass of pollutants regulated by Pretreatment Standards in the effluent of the user. These reports shall contain the results of sampling and analysis of the discharge, including the flow and the nature and concentration, or production and mass where requested by the SHVUA of pollutants contained therein which are limited by the applicable Pretreatment Standards.

(C) For industrial users subject to equivalent mass or concentration limits established by the Authority in accordance with the procedures in 40 CFR 403.6 (C), the report required by paragraph (e)(1) shall contain a reasonable measure of the user's long-term production rate. For all other industrial users subject to Categorical Pretreatment Standards expressed only in terms of allowable pollutant discharge per unit of production (or other measure of operation), the report required by paragraph (e)(1) shall include the user's actual average production rate for the reporting period.

5.03.2 Significant Non-Categorical Industrial Users

Significant non-categorical industrial users shall submit to the Authority once per quarter, on dates specified in the Wastewater Discharge Permits, a report detailing the nature, concentration, flow of the pollutants and other pertinent information as requested by the Authority. The report shall be submitted on a form provided by the Authority.

5.03.3 More Frequent Monitoring

If an industrial user subject to the reporting requirements in Section 5.03.1 of this Article monitors or samples any pollutant or parameter more frequently than required by the Authority using the procedures prescribed in Section 2.07 of these Rules and Regulations, the results of this monitoring shall be included in any report submitted to the Authority pursuant to Section 5.03 of this Article.

5.04 Signatory Requirements

Pursuant to Michigan Administrative Code R 323.2310(1) and R 323.2311(2)(b)(ii), the reports required under Sections 5.01, 5.02 and 5.03 of this Article shall include the following Certification Statement and shall be signed by an authorized representative as defined in Article I of these Rules and Regulations:

I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.

5.05 Self-Monitoring

Significant industrial users may be required to perform self-monitoring of their wastewater discharge. Any required self-monitoring program shall be described in the users Discharge Permit and shall include designation of the sampling location, frequency of sampling, number of samples, types of samples, type of analysis required, standards for testing and increased reporting schedules. A self-monitoring program may also be the result of enforcement action taken by the Authority against the user, and shall be a part of any subsequent conciliation agreement or administrative orders.

A user subject to the self-monitoring requirements of this Section shall also be required to make notification and resample upon becoming aware of a violation in accordance with Section 2.05.03 of these Rules and Regulations.

5.06 Timing

Written reports and/or notifications shall be deemed to have been submitted on the date postmarked. For reports and/or notifications which are not mailed, postage prepaid, into a mail facility serviced by the U. S. Postal Service, the date of receipt of the report shall govern.

Section 6. Enforcement

6.01 Notification of Violation

Upon determination of a violation of these Rules and Regulations or Wastewater Discharge Permit issued, the SHVUA shall take the appropriate enforcement action which may include a written notice of violation. Within 10 days of the receipt from the Authority of a written notice of violation by a user, the user shall submit to the Authority an explanation of the violation and a plan for satisfactory correction and prevention of the cause of the violation shall be submitted to the Authority. Submission of this plan in no way relieves the user of liability of any previous or future violations.

6.02 Notice of Non-Compliance

If the Authority finds that a discharger is in significant non-compliance, as defined in Article I of these Rules and Regulations, with applicable Categorical Pretreatment Standards, Permit requirements and/or Local Limits, the Authority may serve or cause to be served upon that discharger a written notice either personally or by certified or registered mail, return receipt requested, stating the nature of the alleged violation. The notice shall set forth a time, date and location for a conciliation meeting.

The Authority shall also forthwith notify the local contracting community of that meeting and shall request that its representatives attend. The discharger shall attend the meeting and present a corrective plan of action to resolve the non-compliance. The corrective plan of action and related compliance schedule may be set forth in a mutually agreed upon conciliation agreement to be signed by the discharger and the Authority.

If, however, mutual agreement cannot be reached or the discharger refuses to sign the conciliation agreement, the Authority may issue a unilateral administrative order to force timely compliance with specified requirements and/or permit limitations.

6.03 Compliance Schedule Progress Report

A discharger subject to a compliance schedule resulting from any enforcement actions, or as a condition of its Wastewater Discharge Permit, shall submit a progress report to the Authority no later than 14 days following each increment milestone date specified in the compliance schedule. This report shall disclose whether the user complied with the increment of progress to be met on that date, the reason for delay if the date was not met, and the steps being taken to return to the original compliance schedule.

In no event, however, may more

(B) In non-emergency situations, the Cease and Desist Order may be used to suspend or permanently revoke Industrial Wastewater Discharge Permits.
 (C) The Cease and Desist Order may order the industrial user to take such appropriate remedial or preventive action as may be needed to properly address a continuing or threatened violation, including halting operations and terminating the discharge.

6.05 Administrative Fines and Penalties

Notwithstanding any other section of these Rules and Regulations, any user who is found to have violated any provision of these Rules and Regulations, or Permits and Orders issued hereunder, may be assessed a fine of \$1,000 per day, or the maximum allowable under State Law for each violation. Each day on which non-compliance shall occur or continue shall be deemed a separate and distinct violation. The fine shall be incorporated into a Notification of Violation, Notice of Non-Compliance, Conciliation Agreements or Administrative Orders, as applicable. Such assessments shall be added to the user's next scheduled sewer service charge and the Authority shall have such other collection rights and remedies as designated by law and these Rules and Regulations to collect said service charges. Unpaid charges, fines and penalties shall constitute a lien of the individual user's property. Industrial users desiring to dispute such fines must file a request for the Authority to reconsider the fine within 10 days of being notified of the fine. A hearing on the matter shall be held by the Authority within 15 days of receiving the request from the user. Users may appeal the Authority determination in accordance with provisions of Article VII.

6.06 Emergency Suspension of Service and Discharge Permits

The Authority may for good cause suspend the Wastewater Treatment Service and the Wastewater Discharge Permit of a discharger if the Authority finds that an actual or threatened discharge presents or may present an imminent or substantial danger to the health or welfare of persons, substantial danger to the environment, or interference with the operation of the POTW or passthrough. A discharger who is notified of the suspension of Wastewater Treatment Service and/or the discharger's Wastewater Discharge Permit, shall, within a reasonable period of time, as determined by the Authority cease all discharges.

If a discharger fails to comply voluntarily with the suspension order within the specified time, the Authority shall take such steps as deemed necessary, including severance of the sewer connection, to prevent or minimize damage to the POTW, its receiving stream or endangerment to any individuals. The Authority shall allow the user to recommence its discharge when the user has demonstrated to the Authority's satisfaction that the endangerment has passed, unless termination proceedings are initiated against the user.

A user that is responsible, in whole or in part, for any discharge presenting imminent endangerment shall submit a full report to the Authority within five days of the incident. This report shall be a detailed written statement describing the causes of the harmful contribution and the measures taken to prevent any future occurrence. The information in this report shall be considered during any related Show Cause or Termination Hearing.

Local communities whose wastewater is transported or treated by the facilities of the Authority may join with the Authority in enforcement action and take such other action to effectuate these Rules and Regulations.

6.07 Revocation of Permit

Any user who violates the following conditions of these Rules and Regulations or a Wastewater Discharge Permit or Order, or any applicable State or Federal Law is subject to permit revocation.

(A) Violation of the terms and conditions of the Permit
 (B) Failure to factually report the wastewater constituents and characteristics of the discharge.
 (C) Failure to report significant changes in wastewater constituents and characteristics.
 (D) Refuse reasonable access to the Permittee premises by Authority personnel for the purpose(s) of inspection or monitoring.
 (E) Failure to pay fines, penalties or costs incurred by the Authority, pursuant to this Section 6 of Article V.

Non-compliant industrial users shall be notified of the proposed termination of their Wastewater Discharge Permit and be given an opportunity to show cause under Section 6.041 of these Rules and Regulations why the proposed action should not be taken.

6.08 Annual Publication

A list of all users which were determined to be in significant non-compliance, as defined in these Rules and Regulations, with any provisions of these Rules and Regulations or any Permit or Order issued hereunder during the period since the previous publication shall be annually published by the Authority in the largest daily newspaper, published in the municipalities in which the Authority is located. All users identified in a proposed publication shall be provided a copy of that proposed notice at least 30 days before publication and provided with an opportunity to comment as to its accuracy.

6.09 Affirmative Defenses

A user shall have an affirmative defense in any action brought against it alleging a violation of the prohibitions pursuant to Michigan Administrative Code R. 323.2303(3), where the user can demonstrate that it meets the criteria set forth in both the following:

(A) It did not know or have reason to know that its discharge, alone or in conjunction with a discharge or discharges from other sources, would cause pass through or interference.

(B) A local discharge limit designed to prevent pass through or interference was developed in accordance with 40 CFR 403.5(c) for each pollutant in the user's discharge that caused pass through or interference, and the user was in compliance with each local discharge limit directly before and during the pass through or interference, or if a local limit designed to prevent pass through or interference has not been developed in accordance with 40 CFR 403.5(c) for the pollutant that caused the pass through or interference, the user's discharge directly before and during the pass through or interference did not change substantially in nature or constituents from the user's prior or discharge activity when the publicly owned treatment works was regularly in compliance with its national pollutant discharge elimination system permit requirements and, in the case of interference, applicable requirements for sewage sludge use or disposal.

6.10 Judicial Proceedings

The Authority may commence an action for appropriate legal and/or equitable relief in the appropriate Court, in any instances of conduct contrary to the provisions of these Rules and Regulations. Nothing in this Section is intended to supersede any applicable actions or penalties by the State or USEPA or to prevent the Authority from enforcing the requirements of other sections of these Rules and Regulations.

6.10.1 Injunctive Relief- Public Nuisance

Whenever an industrial user has violated or continues to violate the provisions of these Rules and Regulations or Permit or Order issued hereunder, the SHVUA, may petition the Court for the issuance of a Preliminary or Permanent Injunction, or both, (as may be appropriate) which restrains or compels the activities on the part of the industrial user.

Nothing contained in this Article shall be construed as limiting in any manner the powers of the local health officer in the community or communities affected, and if any unsanitary conditions exist, the same is hereby declared to be a public nuisance and shall be abated in accordance with the provisions of applicable law.

6.10.2 Civil Fines

(A) Any industrial user who has violated or continues to violate these Rules and Regulations or any Order or Permit issued hereunder, shall be liable to the Authority for a civil fine of \$1,000, plus actual damages incurred by the POTW per violation per day for as long as the violation continues. In addition to the above described fine and damages, the SHVUA may recover reasonable attorney's fees, court costs, and other expenses associated with the enforcement activities, including sampling, monitoring and analysis expenses.

(B) The SHVUA shall petition the Court to impose, assess, and recover such sums. In determining amount of liability, the Court shall take into account all relevant circumstances, including, but not limited to, the extent of harm caused by the violation, the magnitude and duration, any economic benefit gained through the industrial user's violation, corrective actions by the industrial user, the compliance history of the user, and any other factor as justice requires.

6.10.3 Criminal Prosecution

(A) A person who is found guilty of violating any provision of these Rules and Regulations which is listed below, is guilty of a misdemeanor and is expressly made subject to fine or imprisonment, or both, and upon conviction, may be punished by a fine of not more than \$500, or the maximum allowable under State Law, or by imprisonment in the Wayne County Jail for not more than 90 days, or both.

(1) Intentional unpermitted discharge,

(2) Falsification of monitoring report,

- (3) Improper sampling, with evidence of intent to falsify or mislead,
- (4) Intentional failure to install monitoring equipment after deadline was established by administrative order,
- (5) Intentional recurring violation of compliance schedule in permit, or a violation of a compliance schedule in an administrative order, and
- (6) Illegal discharge when the discharge causes harm and there is evidence of intent.

(B) A person who is found guilty of failure to comply with an affirmative requirement of these Rules and Regulations which is expressly made subject to fine or imprisonment, or both, may be punished by a fine of not more than \$500, or by imprisonment in the Wayne County Jail for not more than 90 days, or both.

(C) If a violation is committed by a person who acts or fails to act upon behalf of a corporation or a partnership, that person shall be held personally liable for fine or imprisonment, or both.

6.10.4 Falsifying Information

A person is subject to fine or imprisonment, or both, who knowingly makes a false statement, representation or certification in an application, record, report, plan or other document filed or required by these Rules and Regulations or by an express condition of a Permit issued under authority of these Rules and Regulations, or who tampers with or renders inaccurate a monitoring device or method required under these Rules and Regulations or by an express condition of a Permit issued under the authority of these Rules and Regulations.

6.11 Recovery of Costs

In addition to the civil and criminal penalties prescribed by these Rules and Regulations, a user is liable for all costs incurred if the user:

- (A) is in violation of its permit, an order, this Ordinance, prohibitions or mandates;
- (B) causes a deposit or obstruction;
- (C) causes damage to disposal system equipment, a sewer or POTW;
- (D) impairs the treatment process, or precipitates extraordinary treatment procedures; or
- (E) discharges pollutants which enter the receiving waters by either POTW passthrough or through an overflow facility resulting in a NPDES permit violation.

The Authority shall determine all costs incurred as a result of the user's action, including the amount of that loss, NPDES fines, if applicable, and the expense of the cleaning, repair and replacement work needed to remedy that damage and subsequent administrative charges, and shall bill the user for the full amount of all such costs and expenses. Failure to pay that amount, in full, within thirty days after receipt of the billing, shall constitute grounds for the immediate revocation of that user's Wastewater Discharge Permit. The Authority may commence the appropriate proceeding to recover such costs and expenses.

Section 7 Miscellaneous

7.01 Removal Credits

Where applicable, the Authority may elect to initiate a program of removal credits as part of these Rules and Regulations to reflect the POTW's ability to remove pollutants in accordance with 40 CFR Part 403.7.

7.02 Net/Gross Calculations

Categorical Pretreatment Standards and Local Limits may be adjusted to reflect the presence of pollutants in the industrial user's intake water in accordance with this Section.

Any industrial user wishing to obtain credit for intake pollutants must make application to the Authority. Upon request of the industrial user, the applicable standard will be calculated on a "NET" basis (i.e., adjusted to reflect credit for pollutants in the intake) if the requirements of 40 CFR 403.15 are met.

7.03 Miscellaneous

Hauled Wastewater

Hauled Wastewater and septic tank waste may be introduced into the SHVUA POTWS only at locations and such times as designated by the Authority provided:

- (A) Such waste shall not violate Section 201, these Rules and Regulations

or any requirements established by the Authority. A waste analysis may be required prior to discharge when a prohibited discharge is suspected.

- (B) All dischargers shall be subject to the provisions of the hauled wastewater and septic policy as established by the Authority.

7.04 Pollution Prevention

The Authority shall encourage users to voluntarily adopt pollution prevention measures.

7.05 Mercury Reduction Plans

The Authority may require a user to develop, submit for approval and implement a Mercury Reduction Plan ("MRP") if the user discharges wastewater that will, or has a reasonable potential to, exceed the quantification level for mercury, as set forth in Appendix A of these Rules and Regulations. Such plan shall include a written commitment by the user to reduce the concentration of mercury in the user's effluent to concentrations below the quantification level within three years of the implementation of the approval of the plan by the Authority. The plan shall be submitted on a form provided by the Authority. The user must submit to the Authority a semiannual report on the status of the mercury reduction efforts.

To ensure compliance with the Local Discharge Limit for mercury as set forth in Appendix A of these Rules and Regulations, a user may elect to implement a Mercury Reduction Plan.

ARTICLE VI

AUTHORITY AND DUTIES OF INSPECTORS AND PROTECTION OF OWNERS

This section defines the extent and limitations of the authority of the Authority to police wastewater systems connected to SHVUA wastewater facilities to insure compliance with these Rules and Regulations.

Section 1. AUTHORITY

(A) An authorized representative of the Authority who bears proper credentials and identification shall be promptly permitted to enter non-residential properties which are tributary to the publicly-owned treatment works for the purposes of inspection, observation, measurement, sampling, and testing of wastewater and affiliated equipment in accordance with the provisions of these Rules and Regulations. At the time of permit application or renewal, the Authority shall negotiate and execute a written agreement with the applicant which sets forth those times, places, and conditions under which an inspector may enter the applicant's premises. The agreement may include provisions which hold the permittee harmless for injury to an inspector upon the premises which is not caused by negligence of the permittee or its employees.

(B) An authorized representative of the Authority who bears proper credentials and identification shall be promptly permitted to enter all private properties through which the Authority or local municipality holds a duly negotiated easement, for the purposes of, but not limited to, inspection, observation, measurement, sampling, repair, and maintenance of any portion of the wastewater transmission facilities which lie within that easement. All entry and subsequent work, if any, on said easement, shall be done in full accordance with the terms of the duly negotiated easement pertaining to the private property involved.

Section 2. Duties

While performing necessary work on private properties pursuant to Section 1, an authorized representative of the Authority shall observe and comply with all safety rules applicable to the premises as established by the company.

ARTICLE VII

APPEAL PROCEDURES

A user who believes it is aggrieved of the actions of the Authority in enforcing this ordinance may appeal to the Director for the relief of that grievance. An appeal shall be made as follows:

Section 1- Appeal Request

(A) The appeal request must be in writing, directed to the Director and received by the Director within twenty (20) days of the decision or act that is the subject of the appeal. The appeal request shall be made in triplicate, and shall set forth the specific act or matter complained of and in dispute. Additionally, the appeal request shall include all documentation which supports the appellant's position.

(B) The Director or his designee shall, within thirty (30) business days of receipt of a written appeal request, acknowledge such receipt in writing to all interested parties. Thereafter, the Director or his designee shall arrange for a hearing to be held in accordance with Section 3 of this Article, or if appropriate, direct a representative of the Industrial Pretreatment Program Section of the Authority (IPP Representative) to schedule a conciliation meeting with the appellant, as soon as practicable, at the mutual convenience of the parties to resolve the dispute.

Section 2- Conciliation Meeting

(A) If a conciliation meeting is held, it shall be open to all interested parties and their representatives. The meeting, if necessary, may be adjourned to a mutually acceptable date or dates.

(B) If the appellant or IPP Representative determines that the dispute cannot be resolved through the conciliation meeting process, the parties shall so inform the Director in writing and request a hearing in accordance with Section 3 of this Article. If future conciliation meetings are no longer needed, the Director or his designee, shall so notify the parties involved and issue a decision within fifteen (15) days, in writing, by mail, to the interested parties to the dispute.

(C) If it is determined by all interested parties and the IPP Representative that the dispute has been satisfactorily resolved through the conciliation meeting process hereto. Within thirty (30) days of the last conciliation meeting the IPP Representative shall reduce such resolution to the form of a written agreement or order for signature by the interested parties.

Section 3- Hearing Procedure

(A) In the event a hearing is required pursuant to Sections 1 or 2b) of this Article, the Director shall promptly appoint a disinterested hearing officer of suitable qualifications to conduct an administrative hearing and to receive testimony and evidence presented by the aggrieved party. The hearing officer shall also receive testimony and evidence from the Authority or others as he or she deems necessary.

(B) The hearing officer shall conduct the hearing and file a written report of said hearing with the Director within thirty (30) days of his/her appointment. The hearing officer shall have the right to extend this thirty day period for good cause. However, in such event, his/her report will be submitted to the Director within fifteen (15) days of the conclusion of the hearing and the taking of testimony and evidence.

(C) The hearing officer's report shall include a brief statement of factual matters at issue, the nature of the testimony and evidence received and shall include a recommendation to either uphold or modify the decision or action in question on such terms as the hearing officer deems equitable.

(D) Upon receipt of the hearing officer's report, the Director shall render his/her decision in writing within fifteen days of the receipt of the report. In any event, the Director shall not be bound by the recommendation of the hearing officer. The decision of the Director shall be final and enforceable at law, unless the appeal involves a citation and a subsequent appeal is made within sixty (60) days and the Authority Commission grants a review of the Director's decision. The decision of the Authority Commission shall be final.

1. A person or Municipality aggrieved by a final decision of the Director or the Authority Commission may petition to the Wayne County Circuit Court for judicial review. The petition shall be filed not later than sixty (60) days following the receipt of the final decision. An aggrieved person or municipality shall exhaust all administrative remedies provided in this Section before seeking judicial review.

(E) With respect to the hearing conducted, the hearing officer shall not be bound strictly by the rules of evidence which would apply in a court of competent jurisdiction. The hearing officer shall have the authority to receive such evidence as he/she deems relevant and material and to give the evidence as is received such weight and probative value as, in the hearing officer's discretion, is deemed proper.

ARTICLE VIII

SEPARABILITY AND REPEALER CLAUSE

If any part or parts of these Rules and Regulations are held to be invalid or of no effect by any Court, Board or Agency, the remaining part or parts of these Rules and Regulations shall remain in full force and effect and continue to be the full Rules and Regulations. Further, all Rules and Regulations inconsistent with or conflicting with any part of these Rules and Regulations are hereby repealed to the extent of such inconsistency or conflict.

Nothing in these Rules and Regulations shall be construed to require an existing discharger to possess a permit prior to completion of proceedings for issuance of a permit for which a timely and sufficient application has been submitted, or to require an existing discharger to achieve any of the numerical limitations of Appendix "A" prior to the expiration of a compliance schedule contained in an issued permit or prior to expiration of a period of time necessary to provide such discharger a reasonable opportunity to achieve compliance with these Rules and Regulations.

These Rules and Regulations shall become effective 30 days after the date of publication of the Notice and the Rules and Regulations.

The foregoing Rules and Regulations were adopted by the Commission of the South Huron Valley Utility Authority on March 9, 1999 and said Rules and Regulations were approved by the respective constituent communities as follows:

- (1) The City of Gibraltar by Resolution dated March 9, 1999.
- (2) The Charter Township of Huron by Resolution dated March 24, 1999.
- (3) The Village of South Rockwood by Resolution dated April 5, 1999.
- (4) The Charter Township of Van Buren by Resolution dated April 7, 1999.
- (5) The Charter Township of Brownstown by Resolution dated April 19, 1999.
- (6) The City of Woodhaven by Resolution dated April 20, 1999.
- (7) The City of Romulus by Resolution dated May 3, 1999.
- (8) The City of Flat Rock by Resolution dated September 7, 1999.
